

## CONTENTS

<b>1. Introduction</b>	<b>1</b>
1.1 Radiation pulmonary fibrosis	1
1.1.1 Concept and History	1
1.1.2 Problem and incidence	1
1.1.3 Pathogenesis	3
1.1.3.1 Radiobiology	3
1.1.3.2 Histopathology	3
1.1.3.3 Pathogenesis of radiation fibrosis	4
1.1.4 Multicultural interactions mediated by cytokines in lung fibrosis	4
1.1.5 Clinical syndromes of lung fibrosis	5
1.1.6 Treatment and prevention	6
1.2 Platelet derived growth factor (PDGF)	6
1.2.1 Historical perspective	6
1.2.2 The PDGF signaling family	7
1.2.2.1 PDGF family members	7
1.2.2.2 PDGF structure	7
1.3 PDGF receptors	9
1.3.1 Structure of PDGF receptors	9
1.3.2 Homo- and heterodimeric receptor complexes	9
1.3.3 Expression of PDGF receptors	11
1.3.4 Activation of PDGF receptors through dimerization	11
1.3.5 Different signal and signal transduction via receptor complexes	12
1.3.6 Cellular effects mediated by PDGF receptors	13
1.4 In vivo function of PDGF	14
1.5 PDGF in pulmonary fibrosis	16
1.5.1 Lung cells and PDGF production	16
1.5.2 PDGF and radiation-induced fibrosis	16
1.5.3 PDGF antagonists and SU9518	17
1.6 Animal models and radiation dose in experimental lung fibrosis	18
1.6.1 Animal models	18
1.6.2 Radiation dose	18
1.7 The aim of this study	19
<b>2. Materials and Methods</b>	<b>21</b>
2.1 Materials	21
2.1.1 Instruments and apparatus	21
2.1.2 Consumables	22
2.1.3 Chemicals	22
2.1.4 Radiation and CT scan	24
2.1.5 PDGFR inhibitor and growth factors	24
2.1.6 Animals	24
2.1.7 Medium and stock solution	24
2.1.7.1 Medium	24
2.1.7.2 Stock solution and buffers in general use	25
2.1.8 Cell lines	26
2.1.9 Antibodies	27
2.1.10 Other reagents and kits	27
2.2 Methods	28
2.2.1 Culture of cell line	28
2.2.2 Immunocytochemistry	28
2.2.3 Protein analysis	28
2.2.3.1 Preparation of protein from whole fibroblast cells lysates	28
2.2.3.2 Bio-Rad protein assay	29
2.2.3.3 SDS-PAGE	29
2.2.3.4 Western blot	29
2.2.4 Cell proliferation assay	30
2.2.5 Clonogenic assay	31
2.2.6 Proliferation of EC and FC in co-culture model in vitro	31
2.2.7 Experimental animals and study design	32

2.2.8	Irradiation and computer tomography (CT) examination	32
2.2.8.1	Irradiation	32
2.2.8.2	CT examination	33
2.2.9	Lung tissue sampling	33
2.2.10	Histology	34
2.2.11	Immunohistochemistry	35
2.2.12	Statistical Analysis	35
<b>3.</b>	<b>Results</b>	<b>37</b>
3.1	The effect of SU9518 in vitro	37
3.1.1	SU9518 inhibits proliferative activity in endothelial cells and fibroblast cells	37
3.1.2	The effects of SU9518 on clonogenic survival in ECs and FCs	41
3.1.3	PDGF signaling in vitro in a co-culture model	42
3.1.4	SU 9518 inhibits PDGF receptor kinase tyrosine phosphorylation on human dermal fibroblast cells	45
3.1.5	Immunocytochemistry analysis of PDGF-receptor expression in FCs exposed to radiation treated with or without SU9518	46
3.2	SU9518 protects against radiation induced pulmonary fibrosis in vivo	52
3.2.1	Histology analysis of mice lungs	52
3.2.2	SU9518 treatment reduces the expression of PDGF receptor in the radiation-damaged lung	55
3.2.3	Computed tomography (CT) morphology scan and CT attenuation values analysis	56
<b>4.</b>	<b>Discussion</b>	<b>58</b>
<b>5.</b>	<b>Summary</b>	<b>61</b>
<b>6.</b>	<b>Zusammenfassung</b>	<b>62</b>
<b>7.</b>	<b>References</b>	<b>63</b>
<b>8</b>	<b>Appendix</b>	<b>78</b>
8.1	Abbreviations	78
8.2	Curriculum vitae	80
8.3	Publications	82
