Table of Contents

Foreword by John D. Gunther, Ph.D. i

Preface v

Acknowledgments vii

Chapter One – Introduction 1
Research Questions 5
Intersections of Race, Class, and Gender 5
Ethical and Financial Considerations 8
Types of Treatment Programs 9
Changes in Treatment Programs 10
Substance Dependence and the Disease Concept 10
Theoretical Models 13
From Meta Theory to Mid Level Theory 13
Hypotheses 16
Hypotheses 1 16
Hypothesis 2 17
Hypothesis 3 17

Chapter Two – Literature Review 19

Chapter Three – Methodology 27
NTIES Participant Sample 27
How Individual Participants were Chosen 27
The Number of Clients Who Participated 28
Demographics of NTIES Population 28
Study Protocol 28
Data Collection 29
Full Sample 29
Study Sub-Sample 30
Validity and Reliability of NTIES Data 30
The Dependent Variable 31
Treatment Outcome 31
The Independent Variables 34
Type of Treatment Program 34
Length of Stay or Length of Treatment Experience 34
Ancillary Services During Treatment 35

Analysis of Data 35
Human Subjects Research 36

Chapter Four – Study Results 39
Study Participants 40
Education, Housing, and Familial Responsibilities 42
Treatment Factors 43
Dependent Variable 45
Analysis of Independent Variables: Types of Treatment Programs, Length of Stay in Treatment, Services Received While in Treatment ... 48
The Relationship between Treatment Modality and Drug Use 48
Hypothesis 1 48
Respondents Who Took Crack, Cocaine, Marijuana, or Alcohol 50
The Effect of Length of Stay on Drug Use 51
Hypothesis 2 51
Analysis of Ancillary Services Received during Treatment 57
Hypothesis 3 57
Predictive Value of All Independent Variables on the Dependent Variable 63
Sub-Sample of African-American Women One Year Post-Treatment Discharge 66

Chapter Five – Discussion 69
Type of Treatment Program 69
Assessing Program Impact 69
Length of Stay in Treatment 72
Receipt of Ancillary Services 73
Assessment of All Independent Variables on the Dependent Variable 74
Limitations 75
Future Directions 76

Appendices 79
Appendix A: NTIES Demographics 81
Appendix B: NTIES Code Book Questions 85
Appendix C: Type of Treatment Programs 91
Appendix D: Variables Used for Analysis 93
Appendix E: UCHRIS Letter of Approval 95

References 97

Index 103

List of Tables

Table

1. Identification of Referral Source as a Percentage of the Sub-Population of African-American Women 41

2. Identification of Reasons for Entering Treatment as a Percentage of the Sub-Population of 641 African-American Women 41

3. Types of Housing One Year Pre-Treatment and One Year Post Treatment 42

4. Number of Children Being Raised 43

5. Prior Treatment Experiences of the Sub-Population of 641 African-American Women 44

6. Time in Treatment for the Sub-Population of 641 African-American Women 44

7: Demographics for the Sub-Population of 641 African-American Women 45

8: Drugs Used One Year Post-Discharge 46

9. Percentage of Women Who Used Poly Drugs One Year Post-Treatment Discharge 47

10. Types of Treatment Programs 48

11. Omnibus Tests of Model Coefficients of Types of Treatment Programs on Drug Use 49

12. Classification from SPSS 49

13. Percentage of Dependent Variable and Non-Drug Use, Attributed to Independent Variable, Type of Treatment Program 50

14. Logistic Regression – Type of Treatment Program Analysis of Maximum Likelihood Estimates 51

15. Duration of Treatment Episode in Months *ALLDRUG Respondents Who Took Crack, Cocaine, Marijuana, or Alcohol Cross-stabulation 54

16. Omnibus Tests of Model Coefficients for Length of Stay 55

17. Classification Table 55

18. Percentage of Dependent Variable, Non-Drug Use, Attributed to Independent Variable, Length of Stay in Treatment 55

19. Logistic Regression – Length of Stay Analysis of Maximum Likelihood Estimates – Variables in the Equation 56

20. Services Clients Indicated at Intake that were Important to Them 58

21. Services Received During Treatment of 641 Cases of African-American Women 59

22. Frequencies of Services Received During Treatment 60

23. Omnibus Tests of Model Co-efficients 61

24. Percentage of Dependent Variable, Non Drug Use, Attributed to Independent Variable, Services Received 62

25. Classification Table 62

26. Logistic Regression – Services Received. Analysis of Maximum Likelihood Estimates 62

27. Significance of the Overall Logistic Regression Model. Omnibus Tests of Model Co-efficents 64

28. Predictive Value of the Independent Variables on Drug Use 64

29. Percentage of Dependent Variable, Non Drug Use, Attributed to Independent Variable, Type of Treatment Program, Length of Stay, And Services Received 64

30. Logistic Regression – All Independent Variables. Analysis of Maximum Likelihood Estimates: Backward Stepwise 65

31. Demographic Information of Sub-Sample of Women One Year Post-Treatment Discharge 65

List of Figures

Figure
1.1. Urie Bronfenbrenner's Ecological Theory of Human Development 14

4.1. Treatment Protocol Status 52

4.2. Length of Stay 53

4.3. A Cross Tabulation of all Drug Respondents Who took Crack, Cocaine, Marijuana, or Alcohol 57

4.4. Sub-Sample of African-American Women One Year Post-Treatment Discharge in 12-step Recovery Program 67

4.5. Employment Status of Sub-Sample of Women Pre-Treatment 68

4.6. Employment Status of Sub-Sample of Women Post-Treatment 68
