Preface by <i>John C. Rodda & Lucio Ubertini</i>	v
1 The Rise of Understanding in Water Science	
Background to modern hydrology <i>James C. I. Dooge</i>	3
The impact of new technologies (1975–2000) on water science and consequently on civilization <i>Gert A. Schultz</i>	13
Water supply and the development of Hong Kong <i>Mervyn R. Peart</i>	23
Water management: the central Italy model and its dissemination <i>Paolo Buonora</i>	31
A short history of isotopes in hydrology <i>R. Letolle & Ph. Olive</i>	49
Water for agriculture, environment and human needs in the Fucino area (central Italy) <i>Ezio Burri & Marco Petitta</i>	67
Historical meadow irrigation in Europe—a basis for agricultural development <i>Chris Leibundgut</i>	77
On the role of hydrology in water resources management <i>Ognjen Bonacci</i>	88
Water events and historical flood recurrences in the Vietri sul Mare coastal area (Costiera Amalfitana, southern Italy) <i>Eliana Esposito, Sabina Porfido, Crescenzo Violante, Chiara Biscarini, Fiorentino Alaia & Giuseppe Esposito</i>	95
2 The International Year of Freshwater: the Achievements and Successes of Similar International Initiatives	
International Year of Freshwater, 2003: activities, cooperation and lessons learned <i>Marcia Brewster</i>	109
Agriculture, food and water—managing water to feed a growing population <i>P. Steduto, S. Bangoura, M. Bazza, I. Beernaerts, O. Berney, J. Burke, B. Casentini, Z. Chen, Å. Eliasson, T. Facon, J. M. Faures, L. Fletcher-Paul, K. Frenken, C. Garces, L. Hermans, J. Hoogeveen, G. Izzi, B. Kiersch, S. Koo-Oshima, F. Maraux, J. Martinez-Beltran, G. Munoz, R. Pavlovic, D. Renault, M. Sonou, P. Torrekens, G. Van Halsema, N. Van Leeuwen, R. Wahaj & J. Van Wambeke</i>	117
Isotope Hydrology at IAEA: history and activities <i>Klaus Froehlich, Roberto Gonfiantini & Pradeep Aggarwal</i>	125
3 The Impact of Water Resources Development and Management on Society	
Water resource development and the environment in the 20th century: first the taking, then the putting back <i>J. A. Allan</i>	135

Integrated water resources management for the Yellow River in China: a discussion of scientific and ethical approaches <i>Rongchao Li, Eelco Van Beek & Peter Gijssbers</i>	150
Role of water in the development of civilization in India—a review of ancient literature, traditional practices and beliefs <i>K. Shadananan Nair</i>	160
New horizons for natural resources and water resources: a case study of the southeastern Anatolia region and the southeastern Anatolia Project (GAP) <i>Bulent Acma</i>	167
Living with water in Vojvodina <i>Andjelka Belić, Radovan Savić & Sima Belić</i>	178
The “Zabo” soil and water management and conservation system in northeast India: tribal beliefs in the development of water resources and their impact on society—an historical account of a success story <i>U. C. Sharma & Vikas Sharma</i>	184
 4 Trends in the Reduction of Risks Involving Water, both Natural and Human-Induced	
Dujangyan and Shingenteh: lessons from the world’s longest living flood control works <i>Kuniyoshi Takeuchi</i>	195
Floods and flood protection: business-as-usual? <i>Zbigniew W. Kundzewicz</i>	201
On the importance of scientific methodology for the progress of water science <i>Elena Asabina</i>	210
Rainfall and drought in southern Italy (1821–2001) <i>Maurizio Polemio & Domenico Casarano</i>	217
Procedures in multifractal analysis of river networks: a state-of-the-art review <i>Roberto Gaudio, Samuele G. De Bartolo, Leonardo Primavera, Massimo Veltri & Salvatore Gabriele</i>	228
Conflicts over water—Can hydrology contribute anything towards their solution? <i>Hans-Jürgen Liebscher</i>	238
Agricultural drought: indices, definition and analysis <i>Francesco Mannocchi, Francesca Todisco & Lorenzo Vergni</i>	246
Climatic trends: an investigation for a Calabrian basin (southern Italy) <i>Roberto Coscarelli, Roberto Gaudio & Tommaso Caloiero</i>	255
Will ecology provide the next major advance in freshwater science? <i>Anne Powell</i>	267

5 Issues of Governance in the Historical and Current Context

Civilization—the basis for water science <i>J. A. A. Jones</i>	277
--	-----

Water, civilizations and governance <i>Alain Gioda & Mike Baker</i>	284
Adapting the law of water management to global climate change and other hydropolitical stresses <i>Joseph W. Dellapenna</i>	291
The water balance and the solution of water problems in the central Asian region <i>I. Sh. Normatov</i>	300
Water as a symbol of national identity in Norway <i>Helena Nynäs</i>	315
Freshwater—the basis of an economic development and democracy plan: a case study for Merka (Somalia) <i>Elio Sommovilla & Maria Chiara Turrini</i>	322
Key word index	333
