Preface by *Alain Dassargues*

v

1 Tracer Studies for Modelling Dispersion, Transport, Existing Contamination and Protection Measures

An attempt at 3-D mass transport model verification by tracer test simulations (invited paper) <i>P. Ackerer & R. Mose</i>	3
A radial-flow tracer test in Chalk: comparison of models and fitted parameters <i>T. C. Atkinson, R. S. Ward & E. O'Hannelly</i>	7
Advanced numerical modelling for tracer flow <i>Christos Chatzichristos, Jan Sagen, Olaf Huseby & Jiri Muller</i>	17
Modelling the injection of a tracer in a well: a new mathematical and numerical approach <i>Serge Brouyère</i>	25
Tritium/ ³ He measurements as calibration tools in groundwater transport modelling <i>Martin Stute & Peter Schlosser</i>	33
Analysis of time series of locally measured bromide concentrations during the groundwater transport experiment at Krauthausen <i>Jan Vanderborght & Harry Vereecken</i>	39
Design, performance, evaluation and modelling of a natural gradient multitracer transport experiment in a contaminated heterogeneous porous aquifer <i>Detlef Bösel, Martin Herfort, Thomas Ptak & Georg Teutsch</i>	45
Estimation of alluvial aquifer parameters by a single-well dilution technique using isotopic and chemical tracers: a comparison <i>Bhishm Kumar & Rm P. Nachiappan</i>	53
Study of fluid flow and transport properties using natural and artificial tracers at the Tournemire claystone site (France) <i>Gérard Bruno, Laurent de Windt, Yann Moreau Le Golvan, Alain Genty & Justo Cabrera</i>	57
Identification of permeability heterogeneity from tracer displacement: sensitivity analysis <i>Lang Zhan & Yanis C. Yortsos</i>	63
Information gain using single tracers under steady state and transient flow conditions: the Gårdsjön G1 multiple tracer experiments <i>Gunnar Lischeid, Holger Lange & Michael Hauhs</i>	73
Comparison of three transport models for tritium release in the Fangataufa lagoon resulting from nuclear tests <i>Ghislain de Marsily</i>	79
Tracer testing as an aid to groundwater protection <i>Rob Ward, Steve Fletcher, Sarah Evers & Darminster Chadha</i>	85
Delineating groundwater protection zones in fractured rock: an example using tracer testing in sandstone <i>Nicola Robinson & John Barker</i>	91
Modelling of groundwater flow dynamics and contamination transport processes at the Vilnius oil storage area <i>Aivars Spalvins, Romans Janbickis, Janis Slangens, Inta Lace, Antanas Marcionis & Anicetas Stuopis</i>	97

Geostatistical simulation of transmissivity and flow: simplified case of the linearized diffusion equation in steady state (poster paper) <i>Chantal de Fouquet</i>	103
Stochastic modelling of tracer transport in three dimensions (poster paper) <i>Cyril Fleurant & Jan van der Lee</i>	109
On the statistics of concentration fluctuations in aquifers (poster paper) <i>Elpidio Caroni & Virgilio Fiorotto</i>	115
An alternative approach to simulate transport based on the Master equation (poster paper) <i>Martin Spiller, Rachid Ababou & Jürgen Köngeter</i>	121
Non-reactive solute dispersion in Triassic sandstone: laboratory simulation and an application to the field (poster paper) <i>Wei Huang, David N. Lerner, Colin C. Smith & Steven F. Thornton</i>	127
Large-scale field experiments on the mobility of heavy metals (As, Cd, Co, Cr, Cu, Hg, Ni, Pb, Sb, Se, Zn) in groundwater (poster paper) <i>Johannes Müller</i>	135
Location of protection zones along production galleries: an example of methodology (poster paper) <i>V. Hallet, T. Nzali, C. Rentier & A. Dassargues</i>	141
 2 New Tracer Techniques, Methodologies and Results on Tracer Behaviour	
Bacteriophages as particle migration indicators in subsurface environments (invited paper) <i>Keith G. Kennedy</i>	151
Synthetic DNA tracers: examples of their application in water related studies <i>Ifikhar H. Sabir, Sylvi Haldorsen, Jacob Torgersen, Peter Aleström, Sylvi Gaut, Hervé Colleuille, Tor Simon Pedersen, Nils-Otto Kitterød & Peter Aleström</i>	159
Use of bacteriophages as tracers for the study of removal of viruses (invited paper) <i>S. Majid Hassanizadeh & Jack F. Schijven</i>	167
Application of two new fluorescent dyes and fluorescent particles in a horizontal and vertical fracture <i>Florian Einsiedl, Heinz Langhals, Piotr Maloszewski, Kai Witthüser & Stefan Wohnlich</i>	175
Sulphur hexafluoride (SF ₆) as a new age-dating tool for shallow groundwater: methods and first results <i>Christian Fulda & Wolfgang Kinzelbach</i>	181
Sorption of fluorobenzoic acids on peat and kaolinite <i>T. C. Atkinson & A. A. Bukowiecki</i>	187
Using an aquifer storage and recovery (ASR) trial as a large scale tracer test <i>Ann Williams</i>	195
Rhodamine WT as a reactive tracer: laboratory study and field consequences <i>D. J. Sutton, Z. J. Kabala & D. Vasudevan</i>	201
The isotope composition of dissolved strontium as a tracer of pollution in the Llobregat River, northeast Spain <i>N. Antich, A. Canals, A. Soler, D. P. F. Darbyshire & B. F. Spiro</i>	207
A non-intrusive technique for investigating contaminant dispersion in porous media using image analysis (poster paper) <i>François A. Richard & Michel J. L. Robin</i>	213
Measurement of groundwater flow by the dilution method using dye tracing under natural hydraulic gradient conditions (poster paper) <i>Nathalie Courtois, Patrick Burghoffer, Odile Gerbaux-François & Daniel Getto</i>	219

3 Tracers and Modelling for Assessing Reactive Transport, Organic Contamination and Natural Attenuation

Internal characteristics of a bromide tracer zone during natural flow in the Borden aquifer, Ontario, Canada <i>Kathryn A. Laukonen, Beth L. Parker & John A. Cherry</i>	227
MTBE: a conservative tracer for estimating biodegradation and hydrodynamic dispersion at underground storage tank sites <i>Gary A. Robbins & Edward J. Gilbert</i>	235
Deuterated tracers for assessing natural attenuation in contaminated groundwater <i>G. B. Davis, B. M. Patterson, J. Thierrin & E. Benker</i>	241
Characterization of a PCE contaminated site by a partitioning interwell tracer test (poster paper) <i>Rolf Hetterschijt, Marcus van Zutphen, Johan Valstar, Sander Eskes, Chris Schuren & Karin van den Brink</i>	249
Age dating of a chlorinated solvent plume in groundwater (poster paper) <i>Gil Oudijk & Lauren M. Schmitt</i>	255
Climatic effects in transport modelling: application to performance assessment of a radioactive waste repository (poster paper) <i>Laurence Hardy, Isabelle Wemaere, Ilse van Keer, Jan Marivoet & Xavier Sillen</i>	263

4 Tracers and Modelling of Double Porosity, Macropores and Fractured/Karstified Rocks

Lumped-parameter models as a tool for determining the hydrological parameters of some groundwater systems based on isotope data (invited paper) <i>Piotr Maloszewski</i>	271
Numerical simulation of a multitracer study in a basaltic aquifer <i>Sebastian Bauer, Christian Fulda & Wolfgang Schäfer</i>	277
Flow pattern and transport behaviour of granitic rock intersected by a highly permeable fault zone <i>Roland Bäuml, Heinz Hötzl & Kai Witthüser</i>	283
Thermal inertia of Alpine massifs shown by heat transport modelling: the large-scale Mont-Blanc case study <i>Jean-Christophe Maréchal</i>	289
A pulsed-velocity method of double-porosity solute transport modelling <i>John A. Barker, Timothy E. J. Wright & Ben A. Fretwell</i>	297
Laboratory experiments for diffusion transport processes in fractured chalk <i>K. Witthüser, H. Hötzl, B. Reichert, W. Stichler & R. Nativ</i>	303
Radionuclide field tests in a single fracture <i>Jordi Guimerà, Lara Duro & Jordi Bruno</i>	309
Use of hydrochemistry and isotopes in a mixing-cell model to quantify the relative contribution of multiple-source contaminants to seepage from a fractured chalk aquitard <i>Eilon M. Adar & Ronit Nativ</i>	315
Tracer experiments as a basis for modelling the transport of water and solutes in soils with macropores <i>Alexander Neuens & Gerald Kirchner</i>	321
Transport of heavy metals in a fractured porous block: experiments and a 3-D model <i>Thomas Himmelsbach & Edson Wendland</i>	325
Hierarchical geostatistics of porosity derived from neutron logs at the Boise Hydrogeophysical Research Site, Idaho, USA (poster paper) <i>Warren Barrash & Tom Clemo</i>	333

Simulation of vertical water flow and bromide transport under temporarily very dry soil conditions (poster paper) <i>Christoph Sambale, Gerd Peschke, Stefan Uhlenbrook, Christian Leibundgut & Bernd Markert</i>	339
Measurements and models of solute behaviour in the dual-porosity Chalk aquifer of the UK: the applicability of tracer tests (poster paper) <i>Sally Watson, William Burgess, John Barker, Julio Carneiro & Sara Hazell</i>	347
 5 Tracer Studies for Studying Infiltration, Recharge and Hydrological Processes in the Unsaturated Zone	
Quantifying recharge at the city scale using multiple environmental tracers (invited paper) <i>David N. Lerner & Yuesuo Yang</i>	355
Use of natural and anthropogenic tracers to identify sources of groundwater recharge in urban areas in Barcelona <i>E. Vázquez-Suñé, O. Castillo, X. Sánchez-Vila, C. Alberich & J. Carrera</i>	363
Long-term water percolation around waste disposal sites revealed using natural isotope tracers (^3H , ^{18}O , ^{87}Sr , ^{226}Ra / ^{238}U) <i>Martin Kralik, Franz. J. Maringer, Wolfgang Papesch, Dieter Rank & Ernst Hrncsek</i>	371
Contribution des traçages à la connaissance des mécanismes d'alimentation des aquifères bressans <i>Pauline Corbier, Florent Viprey, Francis Andreux, Michel Campy, Jacques Mudry & Yvan Rossier</i>	377
Contaminant retardation within the seasonally unsaturated zone of the Chalk aquifer: the SUZ process <i>Ben Fretwell, William Burgess & John Barker</i>	385
Comparison of recharge estimates for the two largest aquifers in Niger, based on hydrodynamic and isotopic data <i>Christian Leduc, Guillaume Favreau, Christelle Marlin & Martial Dray</i>	391
Perched aquifers in arid environments and inferences for recharge rates <i>Amvrossios C. Bagtzoglou, Timothy L. Tolley, Stuart A. Stothoff & David R. Turner</i>	401
 6 Tracer Studies and Modelling of Regional Groundwater Systems	
Changements climatiques et recyclage sur plusieurs milliers d'années du chlorure entre lacs et eau souterraine: exemple de l'Altiplano bolivien (invited paper) <i>Anne Coudrain, Amal Talbi, Emmanuel Ledoux, Pierre Ribstein & Ghislain de Marsily</i>	409
Palaeohydrogeology of the sedimentary plain of Suriname <i>J. Groen, V. E. A. Post, H. Kooi & C. J. Hemker</i>	417
Geochemical modelling and isotope studies in the Sherwood Sandstone aquifer, Lagan Valley, Northern Ireland <i>A. A. Cronin, T. Elliot, Y. Yang & R. M. Kalin</i>	425
Isotopic hydrogeology within the Miocene basin of Carpentras-Valreas (southeastern France) <i>Frederic Huneau & Bernard Blavoux</i>	433
Calibration of a regional groundwater flow model using environmental isotope data <i>Jochen Plümacher & Wolfgang Kinzelbach</i>	439
Resolving patterns of groundwater flow by inverse hydrochemical modelling in a semiarid Kalahari basin <i>Christoph Kuells, Eilon M. Adar & Peter Udluft</i>	447

Identification of groundwater sources in the Ashigara Plain using temperature and environmental isotopes <i>Takahide Yokoyama & Kazuhiro Itadera</i>	453
Organic matter in karstic aquifers: a potential tracer in the carbon cycle. A small-scale laboratory model approach <i>Christelle Batiot, Christophe Emblanch, Bernard Blavoux, Roland Simler & Michel Daniel</i>	459
Natural tracers for investigating residence times, runoff components and validation of a rainfall–runoff model <i>Stefan Uhlenbrook, Christian Leibundgut & Piotr Maloszewski</i>	465
A comparison of observed and simulated hydrograph separations for a field-scale rainfall–runoff experiment <i>J. E. VanderKwaak & E. A. Sudicky</i>	473
Tritium/ ³ He measurements in young groundwater: progress in applications to complex hydrogeological systems (poster paper) <i>Peter Schlosser, Stephanie D. Shapiro, Martin Stute & Niel Plummer</i>	481
Using radon for studying groundwater circulation in the Gargano promontory (Apulia, Italy) (poster paper) <i>Donato Sciannamblo & Michele Spizzico</i>	487
Study of the vertical migration of radionuclides (poster paper) <i>V. M. Shestopalov, V. V. Gudzenko, I. P. Onyshchenko, D. E. Kukhareno & V. N. Bublias</i>	495
Numerical simulation of measured multitracers time series in shallow groundwater from a limestone aquifer (poster paper) <i>Christian Fulda, Wolfgang Schäfer & Wolfgang Kinzelbach</i>	503

7 Tracer Studies for Investigating Groundwater–Surface Water Interactions

L'aquifère du delta de la Dranse: un cas d'école (invited paper) <i>Sophie Ravailleau, Philippe Olive, Milanka Babic & Jean-Michel Talavera</i>	511
Groundwater/surface-water interactions and sources of nitrogen and uranium in an irrigated area of Nebraska, USA <i>I. M. Verstraeten, J. K. Bohlke & T. F. Kraemer</i>	525
Natural tracers to quantify seasonal variations of groundwater mixing in a complex alluvial aquifer (Pfynwald, Switzerland) <i>Marc Schürch & François-D. Vuataz</i>	533
WSIBal: a coupled water, conservative solute and environmental isotope mass balance model for lakes and other surface water bodies <i>Anthony D. Barr, Jeffrey V. Turner & Lloyd R. Townley</i>	539
Development and verification of a tritium and water balance model for estimating the water retention time of lakes <i>U. Saravana Kumar, Noble Jacob, S. M. Rao & J. S. R. Murthy</i>	545
Tracer transport through a drainage basin <i>A. Gupta & V. Cvetkovic</i>	553
Study of subsurface flow using environmental and artificial tracers: the Haute-Mentue case, Switzerland (poster paper) <i>Daniela Talamba, Christophe Joerin, Andre Musy & Ioan Balin</i>	559
Constraining models of lake water balance and groundwater–surface water interaction by stable isotope tracers (poster paper) <i>Jeffrey V. Turner, Anthony D. Barr & Anthony J. Smith</i>	565
