Preface v

Introduction 1

Part One The Earth as a Planet (Astronomy, Geodesy, and Terrestrial Magnetism)

1. The earth in its orbit 7
2. The rotating earth 20
3. Time 36
4. Planet Earth in the sun's rays 49
5. The solar family 61
6. Our Sun as a star in galaxy and universe 76
7. The earth as a magnet 97
8. The moon and man-made satellites 113
9. The tide 129
10. The earth's figure and gravity 149
11. Position, elevation, and direction on the earth's surface 164

Part Two The Atmosphere and Oceans (Meteorology and Oceanography)

12. The atmosphere and oceans 181
13. The earth's radiation balance 197
14. Heat and cold at the earth's surface 212
15. Atmospheric circulation 232

- 16. Oceanic circulation 256
- 17. Ocean waves and sea ice 269
- 18. Atmospheric moisture 288
- 19. Air masses, fronts, and storms 308

Part Three The Solid Earth (Geology and Geophysics)

- 20. Introduction to rocks and minerals 339
- 21. Igneous activity and the igneous rocks 354
- 22. The sedimentary rocks 368
- 23. The earth's interior 385
- 24. The ocean basins and their sediments 407
- 25. The crust of the continents and ocean basins 429
- 26. Tectonic forms and continental evolution 452
- 27. Origin and early history of the earth 475
- 28. Principles of stratigraphic interpretation 491
- 29. Changing life forms in a changing environment:
 - 1. The Paleozoic Era 512
- 30. Changing life forms in a changing environment:
 - 2. The Mesozoic and Cenozoic Eras 528
- 31. The geology of planetary space 546

Part Four The Continental Surfaces (Geomorphology and Hydrology)

- 32. Weathering, soils, and mass wasting 569
- 33. Water in the subsurface zone 585
- 34. Runoff of surface waters 603
- 35. Geologic work of running water 623
- 36. Systems of fluvial denudation 645
- 37. Landform and rock structure 662
- 38. Shoreline processes and forms 677
- 39. Wind as a geologic agent 694
- 40. Glacial processes and forms 706
- 41. The Pleistocene Epoch and Man 727

Appendixes

- I. Maps for the data of the earth sciences 759
- II. World climates, soils, and vegetation 771
- III. Conversion graphs 778

Index 781
