<i>Preface</i>	xi		
<i>Acknowledgements</i>	xii		
PART I THE GLOBAL FRAMEWORK	1		
1 Global Geological Background	3		
1.1 The Ancient Earth	3		
1.2 Core, Mantle and Crust	3		
1.3 The Nature of the Ocean Floors	4		
1.4 The Surface of the Land	6		
1.5 Earthquakes	8		
1.6 The Shape of the Continents	8		
1.7 The Question of Plates	14		
1.8 Microplates and Exotic Terranes	31		
1.9 The Earth's Rock Types	31		
1.10 The Subdivisions of the Earth's History	39		
1.11 Conclusions	43		
<i>Key Terms and Concepts</i>	43		
<i>Points for Review</i>	43		
<i>Further Reading</i>	44		
2 Global Climatic Background	45		
2.1 A Vertical Profile through the Atmosphere	45		
2.2 Global Climate	46		
2.3 World Patterns of Precipitation	51		
2.4 World Patterns of Temperature	54		
2.5 The Major Climatic Zones	55		
2.6 The Hydrological Cycle	57		
2.7 Ocean Currents	57		
2.8 Ocean-atmosphere Interactions	63		
2.9 Climatic Change			63
2.10 Causes of Long-term Climatic Change			77
2.11 Sea-level Changes			81
2.12 Future Climates			82
2.13 Conclusions			88
<i>Key Terms and Concepts</i>			88
<i>Points for Review</i>			88
<i>Further Reading</i>			89
3 The Organic World			90
3.1 Major Vegetation Types			90
3.2 Human Modification of Major Vegetation Types			95
3.3 Floral Realms			102
3.4 Faunal Realms			106
3.5 The World's Great Soil Orders			108
3.6 Human Modifications of Soil			112
3.7 Climatic Geomorphology: The Influence of Climate, Soil and Vegetation			114
<i>Key Terms and Concepts</i>			115
<i>Points for Review</i>			115
<i>Further Reading</i>			115
PART II MAJOR WORLD ZONES			117
4 Cold Environments			119
4.1 Polar Climates			119
4.2 Vegetation and Wildlife			120
4.3 Glacier Types			122
4.4 The Formation of Glacier Ice			125
4.5 How Glaciers Move			126

4.6	Glacial Erosion	128	6.5	Past Climates in Deserts	202
4.7	Glacial Deposits	137	6.6	Desert Vegetation and Animals	205
4.8	Glacier Ice and Sea-level Change	140	6.7	Soils and Surface Materials	208
4.9	Permafrost	141	6.8	Insolation and Salt Weathering	210
4.10	Ground Ice	145	6.9	Wind Action in Deserts	213
4.11	Thermokarst	146	6.10	Sand Deposition – Dunes	215
4.12	Ice Segregation and Frost Heaving	146	6.11	The Work of Rivers	223
4.13	Frost Shattering and Soil Formation	149	6.12	Desert Slopes	229
4.14	Slope Processes, Avalanches and River Regimes	151	6.13	Groundwater	230
4.15	Environmental Problems and Hazards for Tundra Development	155	6.14	Dams, Reservoirs and Inter-basin Water Transfer	231
	<i>Key Terms and Concepts</i>	156	6.15	Land Degradation	238
	<i>Points for Review</i>	157	6.16	Problems of the Desert Realm	239
	<i>Further Reading</i>	157		<i>Key Terms and Concepts</i>	239
				<i>Points for Review</i>	239
				<i>Further Reading</i>	240
5	The Mid-latitudes	158	7	The Tropics	241
5.1	The Westerlies	158	7.1	The General Atmospheric Circulation	241
5.2	Cyclones and Anticyclones	158	7.2	The Wet Tropics	242
5.3	Air Masses	160	7.3	Tropical Seasonal Climates	243
5.4	Cool Temperate Climates	162	7.4	Monsoons	243
5.5	Western Margin Warm Temperate Climates (the Mediterranean Type)	165	7.5	Tropical Disturbances	245
5.6	Eastern Margin Warm Temperate Climates	167	7.6	Tropical Rainforest	250
5.7	Boreal Forest	169	7.7	Secondary Forest	259
5.8	Deciduous Forest	171	7.8	Tropical Seasonal Forest and Savanna	260
5.9	Mid-latitude Grassland	171	7.9	Mangrove Swamps	262
5.10	Mediterranean Evergreen Woodland	172	7.10	Coral Reefs	264
5.11	Soils of Cool Temperate Climates	172	7.11	Weathering of Rocks	268
5.12	Soils of Warm Temperate Climates	172	7.12	Slope Movements	271
5.13	The Impact of Climatic Change on the Landscape	174	7.13	Some Problems of the Humid Tropics	271
5.14	Loess Sheets	177		<i>Key Terms and Concepts</i>	272
5.15	Dry Valleys and Mis-fit Streams	177		<i>Points for Review</i>	272
5.16	Tors	181		<i>Further Reading</i>	272
5.17	Natural Hazards in Western Europe	183			
	<i>Key Terms and Concepts</i>	193	PART III MOUNTAIN AND MARITIME ENVIRONMENTS		273
	<i>Points for Review</i>	194			
	<i>Further Reading</i>	194	8 Mountains		275
6	Deserts	195	8.1	Introduction	275
6.1	Introduction	195	8.2	Mountain Climates	275
6.2	What Causes Aridity?	199	8.3	Snow and the Snow-line	281
6.3	Desert Rainfall	199	8.4	Mountain Vegetation	282
6.4	Desert Temperatures	201	8.5	The Timber-line	285
			8.6	Alpine Tundra	286
			8.7	Mountain Hazards	287

8.8	Changing Climates	290	11.2	Volcanoes	355
	<i>Key Terms and Concepts</i>	292	11.3	Intrusive Igneous Rocks	369
	<i>Points for Review</i>	292	11.4	Earthquakes	371
	<i>Further Reading</i>	293	11.5	Man-made Seismic Activity	377
9	Coasts	294	11.6	Faults	379
9.1	Coastlines	294	11.7	Folding	383
9.2	Waves	295		<i>Key Terms and Concepts</i>	385
9.3	Barrier Beaches and Related Forms	300		<i>Points for Review</i>	385
9.4	Tides	303		<i>Further Reading</i>	386
9.5	Storm Surges	304	12	Slopes	387
9.6	Estuaries	305	12.1	Mass Movements	387
9.7	Coastal Dunes	305	12.2	Slope Instability	392
9.8	Salt Marshes	308	12.3	Other Processes Operating on Slopes	395
9.9	Coast Erosion	310	12.4	Slope Forms	396
9.10	The Human Impact on the Coastline	312	12.5	Slope Development through Time	399
	<i>Key Terms and Concepts</i>	317		<i>Key Terms and Concepts</i>	403
	<i>Points for Review</i>	318		<i>Points for Review</i>	403
	<i>Further Reading</i>	318		<i>Further Reading</i>	403
PART IV	LANDSCAPES AND ECOSYSTEMS	319	13	Soils and Weathering	404
10	Plants and Animals	321	13.1	Factors of Soil Formation	404
10.1	Ecology and Ecosystems	321	13.2	Soil Profiles	408
10.2	Plants and their Habitats	326	13.3	Types of Weathering	409
10.3	Life in the Oceans	329	13.4	Mechanical Weathering	409
10.4	Community	330	13.5	Chemical Weathering	410
10.5	Succession	331	13.6	Accelerated Soil Erosion	419
10.6	Dispersal and Migration of Plants	333		<i>Key Terms and Concepts</i>	425
10.7	Dispersal and Migration of Animals	334		<i>Points for Review</i>	426
10.8	The Importance of Area	335		<i>Further Reading</i>	426
10.9	Human Impact on Plants and Animals	336	14	The Hydrological Cycle	427
10.10	Domestication	336	14.1	Introduction	427
10.11	Introductions	338	14.2	Precipitation	427
10.12	Pollution	340	14.3	Interception	432
10.13	Habitat Change	347	14.4	Evapotranspiration	433
10.14	Extinction	348	14.5	Infiltration	434
10.15	Conservation	352	14.6	Surface Runoff	435
	<i>Key Terms and Concepts</i>	353	14.7	Groundwater	439
	<i>Points for Review</i>	354	14.8	Streamflow and the Hydrograph	443
	<i>Further Reading</i>	354	14.9	Annual River Regimes	448
11	Tectonic Features	355	14.10	Lakes	449
11.1	Introduction	355		<i>Key Terms and Concepts</i>	454
				<i>Points for Review</i>	454
				<i>Further Reading</i>	454
15	Rivers	456			
15.1	Introduction	456			

15.2	Morphometry of Drainage Basins	456	16.6	Soil Erosion and Sediment Yield Associated with Construction and Urbanisation	497
15.3	Drainage Basin Patterns	457	16.7	Animals in Cities	497
15.4	Concave Long Profiles	458		<i>Key Terms and Concepts</i>	498
15.5	Channel Cross-section and Hydraulic Geometry	460		<i>Points for Review</i>	499
15.6	Channel Patterns	461		<i>Further Reading</i>	499
15.7	Floodplains	464	PART V CONCLUSION		501
15.8	Terraces	464	17 Nature, Humans and the Environment		503
15.9	Deltas	465	17.1	Introduction	503
15.10	Stream Transport	468	17.2	Environmental Complexity	503
15.11	Rates of Fluvial Denudation	475	17.3	Environmental Interactions	503
15.12	Floods	477	17.4	The Importance of Scale	504
15.13	The Human Impact on Rivers	481	17.5	The Influence of Environment on Humans	504
	<i>Key Terms and Concepts</i>	483	17.6	The Human Impact	504
	<i>Points for Review</i>	484	17.7	The Ever-changing Environment	505
	<i>Further Reading</i>	484	17.8	Humans or Nature?	506
16 Cities		485	17.9	Equifinality	507
16.1	Introduction	485	17.10	The Relevance and Application of Physical Geography	508
16.2	The Climate of Cities	485	17.11	Global Environmental Change	510
16.3	Air Pollution and its Problems	490			
16.4	Urbanisation and River Flow	495	<i>Index</i>		511
16.5	Thermal Pollution of River Water	496
