Foreword

xv

PART I

USING EXPERIMENTAL REMOVALS OF SPECIES TO REVEAL THE CONSEQUENCES OF BIODIVERSITY DEPLETION

P. Kareiva and S. A. Levin

1

1. Native Thistles: Expendable or Integral to Ecosystem
Resistance to Invasion?

S. M. Louda and T. A. Rand

5

2. The Overriding Importance of Environmental Context in Determining the Outcome of Species-Deletion Experiments
B. A. Menge
16
3. Species Importance and Context: Spatial and Temporal Variation in Species Interactions
C.D.G. Harley
44
4. Effects of Removing a Vertebrate versus an Invertebrate Predator on a Food Web, and What Is Their Relative Importance?
T. W. Schoener and D. A. Spiller
69
5. Understanding the Effects of Reduced Biodiversity: A Comparison of Two Approaches
J. T. Wootton and A. L. Downing
85

PART II

THE ANTHROPOGENIC PERSPECTIVE

P. Kareiva and S. A. Levin

105

6. Models of Ecosystem Reliability and Their Implications for the Question of Expendability
S. Naeem
109
7. Predicting the Effects of Species Loss on Community Stability
D. Doak and M. Marvier
140
8. One Fish, Two Fish, Old Fish, New Fish: Which Invasions Matter?
J. L. Ruesink
161
9. Ecological Gambling: Expendable Extinctions Versus Acceptable Invasions
M. J. Wonham
179
10. Rarity and Functional Importance in a Phytoplankton Community
D. E. Schindler, G. C. Chang, S. Lubetkin, S.E.B. Abella, and W. T. Edmondson
206

11. Community and Ecosystem Impacts of Single-Species Extinctions
D. Simberloff
221

PART III

LINKAGES AND EXTERNALITIES

P. Kareiva and S. A. Levin

235

12. Social Conflict, Biological Ignorance, and Trying to Agree Which Species Are Expendable
E. G. Leigh Jr.
239

13. Which Mutualists Are Most Essential? Buffering of Plant Reproduction against the Extinction of Pollinators
W. F. Morris
260

14. The Expendability of Species: A Test Case Based on the Caterpillars on Goldenrods
R. B. Root
281

15. An Evolutionary Perspective on the Importance of Species: Why Ecologists Care about Evolution
S. R. Palumbi
292

16. Recovering Species of Conservation Concern—Are Populations Expendable?
M. Ruckelshaus, P. McElhany, and M. J. Ford
305

17. Virus Specificity in Disease Systems: Are Species Redundant?
A. G. Power and A. S. Flecker
330

Conclusion

P. Kareiva and S. A. Levin

347
