

Contents

viii Preface

Wastewater operational methods and tools

- 1 **New simulators for the optimum management and operation of wastewater treatment plant** E. Ayesa, G. Garralon, A. Rivas, J. Suescun, L. Larrea and F. Plaza
- 9 **A model-based approach to predicting BOD₅ in settled sewage** D.A. Brydon and D.A. Frodsham
- 17 **Full-scale application of the IAWQ ASM No. 2d model** R. Carrette, D. Bixio, C. Thoeve and P. Ockier
- 25 **Environmental accounting – a decision support tool in WWTP operation and management** J. Clauson-Kaas, T.S. Poulsen, B.N. Jacobsen, T. Guildal and H. Wenzel
- 31 **Planning of wastewater treatment and disposal systems of Istanbul metropolitan area** V. Eroglu, H.Z. Sarikaya and A.F. Aydin
- 39 **Six years' practical experience with aerobic/anoxic deammonification in biofilm systems** A. Hippen, C. Helmer, S. Kunst, K.-H. Rosenwinkel and C.F. Seyfried
- 49 **Seine Centre, the new flexible Colombes sewage treatment plant – from theory to practice** C. Paffoni
- 57 **Performance of the full-scale biological nutrient removal plant at Noosa in Queensland, Australia: nutrient removal and disinfection** V. Urbain, P. Wright and M. Thomas
- 63 **Experience with an up-flow biological aerated filter (BAF) for tertiary treatment: from pilot trials to full scale implementation** M. Payraudeau, A.R. Pearce, R. Goldsmith, B. Bigot, F. Wicquart
- 69 **Operating space diagrams: a tool for designers of wastewater treatment plants** L.N. Hopkins, P.A. Lant and R.B. Newell
- 77 **Impact of solids management on nutrient ratios for in-line wastewater prefermenters** W.H. Rössle and W.A. Pretorius

Economic optimisation and management

- 85 **International product cost comparison in the field of water management** H. Bode and P. Lemmel
- 95 **Application of performance indicators in water utilities management – a case-study in Portugal** R.C. Marques and A.J. Monteiro
- 103 **Benchmarking initiatives in the water industry** R. Parena and E. Smeets
- 111 **Benchmarking – an approach to efficiency enhancement in planning, construction and operation of wastewater treatment plants** J. Stemplewski, A. Schulz and J. Schön
- 119 **Modern management instruments – control of a water resources management association by means of an agreement on targets (balanced scorecard)** A.E. von Seidnitz and J. Londong
- 127 **Using the World Wide Web to revolutionise technology transfer and training in the water and wastewater industries** P.A. Lant and D. Emmett

Industrial wastewater treatment plants

- 135 **Characterisation of the impact of aqueous industrial waste in mesocosms: biological indicators and pilot streams** A. Bassères and B. Tramier

- 145 **Validation and implementation of model based control strategies at an industrial wastewater treatment plant** D. Demey, B. Vanderhaegen, H. Vanhooren, J. Liessens, L. Van Eyck, L. Hopkins and P.A. Vanrolleghem
- 155 **Monitoring and troubleshooting of non-filamentous settling and dewatering problems in an industrial activated sludge treatment plant** B.V. Kjellerup, K. Keiding and P.H. Nielsen
- 163 **Process using DO and ORP signals for biological nitrification and denitrification : validation of a food-processing industry wastewater treatment plant on boosting with pure oxygen** M. Mauret, F. Ferrand, V. Boisdon, M. Spérandio and E. Paul
- 171 **Biological nitrogen removal from industrial wastewater discharged from metal recovery processes** A. Hirata, Y. Nakamura and S. Tsuneda

Small wastewater treatment plants

- 181 **Septage dewatering in vertical-flow constructed wetlands located in the tropics** T. Koottatep, C. Polprasert, N.T.K. Oanh, U. Heinss, A. Montangero and M. Strauss
- 189 **Choice of the sand for sand filters used for secondary treatment of wastewater** A. Liénard, H. Guellaf and C. Boutin

Aeration in wastewater treatment

- 197 **Mass balance for on-line αk_a estimation in activated sludge oxidation ditch** P. Chatellier and J.M. Audic
- 203 **Applying fine bubble aeration to small aeration tanks** Ph. Duchène, E. Cotteux and S. Capela
- 211 **The effect of acid cleaning on a fine pore ceramic diffuser aeration system** C.-H. Hung and W.C. Boyle

Nuisance-free wastewater treatment plants

- 219 **Aerobic biological treatment of grease from urban wastewater treatment plants** J.P. Canler, C. Royer and Ph. Duchène
- 227 **Modelling to solve odour problems** P.S. Childs and A.J. Dunn
- 235 **Predicting the sound power and impact of a wastewater treatment plant** B. De heyder, P. Ockier, R. Jansen and R. Huiberts
- 243 **Odour removal with a trickling filter at a small WWTP strongly influenced by the tourism season** L. Patria, M. Cathelain, P. Laurens and J.P. Barbere

Sewerage management

- 251 **Designing a new flushing machine: a compromise between tradition and modernity** J. Cardinaud and M. Martaud
- 261 **Use of real time control modelling on the urban sewage system of Nancy** M. Zug, D. Faure, B. De Belly and L. Phan
- 269 **Self-monitoring of water quality in sewer systems using absorbance of ultraviolet and visible light** G. Ruban, Y. Ruperd, B. Laveau and E. Lucas
- 277 **Optimisation of operational management practices for the detention basins** C. Jacopin, E. Lucas, M. Desbordes and P. Bourgogne
- 287 **Critical velocity of floatables in Combined Sewer Overflow (CSO) chambers** J. Cigana, G. Lefebvre and C. Marche

Watershed and water resources management

- 295 **Rainwater drainage management for urban development based on public-private partnership** J. Matsushita, M. Ozaki, S. Nishimura and S. Ohgaki
- 305 **Interest of a multibiomarker approach in the assessment of freshwater ecosystem quality: laboratory and field studies** M.L. Vidal, A. Bassères and J.F. Narbonne

- 313 **Urban catchment management in a developing country: the Lotus River project, Cape Town, South Africa** A.M.W. Grobicki
- 321 **Annual nutrients export modelling by analysis of landuse and topographic information: case of a small Mediterranean catchment** S. Payraudeau, M.G. Tournoud, F. Cernesson and B. Picot
- 329 **Effect of residence times on River Mondego estuary eutrophication vulnerability** A.S. Duarte, J.L. Pinho, M.A. Pardal, J.M. Neto J.P. Vieira and F.S. Santos
- 337 **Water quality management in the coastal city in the period of considerable water consumption decrease** R. Bogdanowicz, J. Drwal, Z. Maksymiuk and A. Osinski

Landfill management of solid wastes

- 343 **Kaolinite sorption of Cd, Ni and Cu from landfill leachates: influence of leachate composition** M. Petrangeli Papini, M. Majone and E. Rolle
- 351 **Degradation of lignin and lignin model compound under sulfate reducing condition** S. Pareek, J.-I. Azuma, S. Matsui and Y. Shimizu
- 359 **Combined ozone-activated sludge treatment of landfill leachate** D. Geenens, B. Bixio and C. Thoeys
- 367 **Nitrogen and sulfate attenuation in simulated landfill bioreactors** T. T. Onay and F.G. Pohland

Sludge characteristics

- 373 **Municipal wastewater sludge dewaterability and the presence of microbial extracellular polymer** J.I. Houghton, J. Quarmby and T. Stephenson
- 381 **The influence of biosolids treatment files on the mobility of metal trace elements** V. Maisonnave, M. Montrejeaud-Vignoles, C. Bonnin, J.-C. Revel and C. Vignoles
- 389 **Vane shear strength of dewatered sludge from Hong Kong** A. Koenig and Q.H. Bari
- 399 **Chemical characteristics and leachability of organically contaminated heavy metal sludge solidified by silica fume and cement** K.-S. Jun, B.-G. Hwang, H.-S. Shin and Y.-S. Won
- 409 **Sludge incineration tests on circulating fluidised bed furnace** V. Lotito, G. Mininni, A.C. Di Pinto, L. Spinosa

Sludge management

- 417 **Effects of solids concentration on activated sludge deflocculation, conditioning and dewatering** L.H. Mikkelsen and K. Keiding
- 427 **Size and structure effects on centrifugal dewatering of digested sewage sludge** A.J. Feitz, J. Guan and T.D. Waite
- 437 **Excess sludge reduction in activated sludge processes by integrating biomass alkaline heat treatment** M. Rocher, G. Roux, G. Goma, A. Pilas Begue, L. Louvel and J.L. Rols
- 445 **Evaluation of an ozonation system for reduced waste sludge generation** E. Egemen, J. Corpening and N. Nirmalakhandan
- 453 **Isolation of copper-binding proteins from activated sludge culture** K. Fukushi, S. Kato, T. Antsuki and T. Omura
- 461 **Aerobic and anaerobic biodegradability of a flocculant polymer** L.L. Chang, D.L. Raudenbush and S.K. Dentel
