

CONTENTS

Preface	xv
Contributors	xvii
1. Epidemiology and Globalization of Foodborne Disease	1
<i>Ewen C. D. Todd</i>	
1.1. Introduction	1
1.2. Surveillance of Foodborne Disease	2
1.3. Meat and Poultry	4
1.4. Fish and Shellfish	7
1.5. Eggs and Dairy Products	10
1.6. Vegetables and Fruits	12
1.7. Environment	15
1.8. Surveys of the Public on Knowledge of Foodborne Diseases and Its Prevention	17
1.9. High-Risk Populations	18
1.10. Policies to Reduce Foodborne Disease	18
1.11. Conclusion	20
Bibliography	21
2. <i>Arcobacter</i> and <i>Helicobacter</i>	23
<i>Irene V. Wesley</i>	
2.1. <i>Arcobacter</i>	23
2.2. <i>Helicobacter</i>	29
Bibliography	33
3. <i>Aspergillus</i>	35
<i>Deepak Bhatnagar and Santos Garcia</i>	
3.1. Introduction	35
3.2. Ecology of <i>Aspergillus</i>	36
	vii

3.3. Isolation of <i>Aspergillus</i>	36
3.4. Identification of <i>Aspergillus</i> Species	37
3.5. Detection of Mycotoxins	39
3.6. Nature of Illness	40
3.7. Prevention and Control	47
References	49
Bibliography	50
4. <i>Bacillus cereus</i>	51
<i>R. W. Bennett</i>	
4.1. Introduction	51
4.2. Nature of Illness	51
4.3. Characteristics of Agent	52
4.4. Epidemiology	53
4.5. Detection of Organism and Toxins	56
4.6. Physical Methods for Destruction	58
4.7. Prevention and Control	59
References	59
Bibliography	59
5. <i>Campylobacter</i>	61
<i>Norman J. Stern</i>	
5.1. Introduction	61
5.2. Nature of Disease	62
5.3. Characteristics of Agent	62
5.4. Epidemiology	63
5.5. Detection of Organism	65
5.6. Prevention and Control	67
Bibliography	67
6. <i>Clostridium botulinum</i>	69
<i>Barbara M. Lund and Michael W. Peck</i>	
6.1. Introduction	69
6.2. Botulism	70

6.3. Properties of <i>C. botulinum</i> and Botulinum Neurotoxins	71
6.4. Epidemiology	75
6.5. Detection and Isolation	80
6.6. Prevention and Control	82
6.7. Conclusion	84
Bibliography	85
7. <i>Fusarium</i>	87
<i>Lloyd B. Bullerman</i>	
7.1. Introduction	87
7.2. Nature of Illness in Animals and Humans	87
7.3. Characteristics of <i>Fusarium</i> Toxins	92
7.4. Detection, Isolation, and Identification	94
7.5. Occurrence and Stability of Toxins in Foods	96
7.6. Prevention and Control	97
References	97
Bibliography	98
8. <i>Listeria monocytogenes</i>	99
<i>Catherine W. Donnelly</i>	
8.1. Introduction	99
8.2. Listeriosis in Humans	102
8.3. Pathogenesis	107
8.4. Foodborne Transmission	109
8.5. Sources of <i>Listeria</i> and Food-Processing Environments	114
8.6. Detection of <i>Listeria</i> in Foods	117
8.7. Conclusion	122
References	123
9. <i>Clostridium perfringens</i>	133
<i>Norma L. Heredia and Ronald G. Labbé</i>	
9.1. Introduction	133
9.2. Nature of Illness in Animals and Humans	134

9.3. Characteristics of Agent	136
9.4. Epidemiology	138
9.5. Detection of Organism	138
9.6. Physical Methods for Destruction	139
9.7. Prevention and Control	140
Bibliography	140
10. <i>Escherichia coli</i>	143
<i>Peter Feng</i>	
10.1. Introduction	143
10.2. Nature of Illness and Epidemiology	144
10.3. Detection of Organism and Pathogenicity Testing	148
10.4. Physical Methods for Destruction	159
10.5. Prevention and Control	160
References	161
Bibliography	162
11. <i>Salmonella</i>	163
<i>Jean-Yves D'Aoust</i>	
11.1. Introduction	163
11.2. Nature of Illness	164
11.3. Characteristics of <i>Salmonella</i> spp.	168
11.4. Epidemiology	170
11.5. Detection	176
11.6. Physical Methods for Destruction	181
11.7. Prevention and Control	185
References	188
12. <i>Shigella</i>	193
<i>David W. K. Acheson</i>	
12.1. Introduction	193
12.2. Nature of Illness	193
12.3. Characteristics of Agent	195

12.4. Epidemiology	196
12.5. Detection of Organism	198
12.6. Prevention and Control	199
Reference	200
Bibliography	200
13. <i>Staphylococcus aureus</i>	201
<i>R. W. Bennett</i>	
13.1. Introduction	201
13.2. Nature of Illness	203
13.3. Characteristics of Agent	203
13.4. Epidemiology	205
13.5. Detection and Identification	209
13.6. Detection of Enterotoxins	213
13.7. Physical Methods for Destruction	217
13.8. Prevention and Control	218
References	218
Bibliography	219
14. <i>Vibrio vulnificus</i>, <i>Vibrio parahaemolyticus</i>, and <i>Vibrio cholerae</i>	221
<i>Mark L. Tamplin</i>	
14.1. <i>Vibrio vulnificus</i>	221
14.2. <i>Vibrio parahaemolyticus</i>	228
14.3. <i>Vibrio cholerae</i>	234
References	238
Bibliography	238
15. <i>Yersinia enterocolitica</i>	245
<i>Saumya Bhaduri</i>	
15.1. Introduction	245
15.2. Nature of Illness	245
15.3. Characteristics of Agent	246
15.4. Epidemiology	247

15.5. Detection of Organism	248
15.6. Isolation of Pathogenic YEP ⁺ Strains from Foods	249
15.7. Prevention and Control	252
Reference	255
Bibliography	255
16. Viruses	257
<i>Dean O. Cliver</i>	
16.1. Introduction	257
16.2. Nature of Illness	257
16.3. Characteristics of Agent	258
16.4. Epidemiology	258
16.5. Detection	262
16.6. Physical Methods for Destruction	264
16.7. Prevention and Control	265
Bibliography	265
17. Seafood Toxins	267
<i>James M. Hungerford</i>	
17.1. Introduction	267
17.2. Control Measures for Shellfish Toxins	268
17.3. Detection Strategies	268
17.4. Chemical Separation Methods	269
17.5. Cytotoxicity Assays	270
17.6. Paralytic Shellfish Poisons	270
17.7. Tetrodotoxins	272
17.8. Neurotoxic Shellfish Poisoning	274
17.9. Diarrhetic Shellfish Poisoning	274
17.10. Amnesic Shellfish Poisoning	277
17.11. Ciguatera	279
17.12. Scombroid Poisoning	281
17.13. Conclusion	282
Bibliography	282

18. Parasites	285
<i>George J. Jackson</i>	
18.1. Introduction	285
18.2. Parasites and Zoological Classification	286
18.3. Spectrum of Foodborne Parasites	286
18.4. Detection Methods	288
18.5. Are All Parasites Pathogens?	289
18.6. Parasite Products and Symbionts	289
18.7. Epidemiology	291
18.8. Symptomatology	292
18.9. Inactivation Methods	293
Bibliography	293
 19. Miscellaneous Agents: <i>Brucella</i>, <i>Aeromonas</i>, <i>Plesiomonas</i>, and β-Hemolytic Streptococci	 295
<i>Eduardo Fernández-Escartín and Santos García</i>	
19.1. Introduction	295
19.2. <i>Brucella</i>	295
19.3. <i>Aeromonas hydrophila</i>	301
19.4. <i>Plesiomonas shigelloides</i>	306
19.5. β -Hemolytic <i>Streptococcus</i>	309
References	311
Bibliography	312
 20. Disinfecting and Sterilizing Agents Used in Food Industry	 315
<i>Mafu Akier Assanta and Denis Roy</i>	
20.1. Introduction	315
20.2. Control of Foodborne Pathogens	315
20.3. Resistance of Pathogens to Sanitizers	318
20.4. Disinfecting Agents	320
20.5. Criteria for Disinfectant Usage	322
20.6. Efficiency of Sanitizing Agents	323
20.7. Testing of Sanitizing Agents	327

20.8. Conclusions	329
Bibliography	331
21. Role of HACCP in Control of Foodborne Illnesses	333
<i>Robert B. Gravani</i>	
21.1. Traditional Approaches	333
21.2. Hazard Analysis Critical Control Point Concept	334
21.3. Origins of HACCP	334
21.4. Prerequisite Programs	335
21.5. HACCP Plan Development	339
21.6. Seven HACCP Principles	340
Bibliography	345
22. Prion Diseases	347
<i>Judd Aiken</i>	
22.1. Introduction	347
22.2. Nature of Illness Caused	350
22.3. Characteristics of the Agent	351
22.4. Epidemiology	355
22.5. Detection of the Organism	357
22.6. Physical Means of Destruction of the Organism	358
22.7. Prevention/Control Measures	359
Bibliography	360
Index	361
