FOREWORD	xi
ORGANIZING COMMITTEE	xiii
LIST OF SPONSORS	xvii
KEYNOTE PAPERS	
A review of linear geostatistics for fisheries survey design and stock assessment	1
PETITGAS, P.	
Representation of conditional random distributions as a problem of “spatial” interpolation	13
VON STORCH, H.	
Sampling, estimating and understanding soil pollution	25
WEBSTER, R.	
AIR POLLUTION	
Spatial analysis of particulate matter in an urban environment	41
CRESSIE, N., KAISER, M. S., DANIELS, M. J., ALDWORTH, J., LEE, J., LAHIRI, S. N. AND COX, L. H.	
Space-time geostatistical modelling: a case study of sea-salt measured on lichens	53
FIGUEIRA, R., SOUSA, A. J., PACHECO, A. M. G. AND CATARINO, F.	
Spatial prediction of sulfur dioxide in the eastern United States	65
HOLLAND, D. M., SALTZMAN, N., COX, L. H. AND NYCHKA, D.	

Spatial interpolation of ozone exposure in Norway from space-time data	77
HØST, G. AND FOLLESTAD, T.	
Stochastic modelling of spatiotemporal distributions: application to sulphate deposition trends over Europe	89
KYRIAKIDIS, P.C. AND JOURNEL, A.G.	
Sampling multiphase noise exposure time series	101
LAJAUNIE, C., WACKERNAGEL, H. THIERY, L. AND GRZEBYK, M.	
Evaluation of environmental costs of SO₂ emissions using stochastic images	113
NUNES, C., SOARES, A. AND FERREIRA, F.	
The Larsen model from a De Wijsian perspective	125
WACKERNAGEL, H., THIERY, L. AND GRZEBYK, M.	
CLIMATOLOGY	
Geostatistical segmentation of rainfall data	139
ALLARD, D. AND MONESTIEZ, P.	
Downscaling of precipitation combining kriging and empirical orthogonal function analysis	151
BIAU, G.	
Kriging with categorical external drift: use of thematic maps in spatial prediction and application to local climate interpolation for agriculture	163
MONESTIEZ, P., ALLARD, D., NAVARRO SÁNCHEZ, I. AND COURAULT, D.	
Modelling of non-stationary spatial structure using parametric radial basis deformations	175
PERRIN, O. AND MONESTIEZ, P.	
A maximum likelihood estimator for semi-variogram parameters in kriging	187
TODINI, E. AND PELLEGRINI, F.	
ECOLOGY	
A geostatistical analysis of the spatial distribution and abundance of cod, haddock and whiting in North Scotland	201
FERNANDES, P. G. AND RIVOIRARD, J.	
Geostatistical data versus point process data: analysis of second-order characteristics	213
MATEU, J. AND RIBEIRO JR., P. J.	

Mapping the spatial distribution of waders on south Tagus riverside	225
PEREIRA, M. J., ALMEIDA, J., RODRIGUES, A. AND MOURA, D.	

Geostatistics for ecology: an application of the variogram to radio-telemetry data	237
SALVATORI, V., SKIDMORE, A. K., VAN DER MEER, F. AND CORSI, F.	

HYDROGEOLOGY

Interpolation of groundwater quality parameters using geological and land use classification	247
BÁRDOSY, A., GIESE, H., AND GRIMM-STRELE, J.	

A coupled Markov chain model for quantification of uncertainty in transport in heterogeneous formations	259
ELFEKI, A. M. M., UFFINK, G. J. M. AND BAREND, F. B. J.	

Prediction of steady state flow in randomly heterogeneous formations by conditional nonlocal finite elements	271
GUADAGNINI, A., GUADAGNINI, L. AND TARTAKOVSKY, D. M.	

Inverse modelling of groundwater flow in a 3D fractured media	283
HENDRICKS FRANSSEN, H. J. W. M., CASSIRAGA, E. F., GÓMEZ-HERNÁNDEZ, J. J., SAHUQUILLO, A. AND CAPILLA, J. E.	

Inverse geostatistical modeling of pumping and tracer tests within a shear-zone in granite	295
MEIER, P.M., MEDINA, A. AND CARRERA, J.	

Comparison of stochastic calibration methods for Modflow using the real-world case 'Wierden'	307
MINNEMA, B. AND TE STROET, C. B. M.	

Geostatistical analyses of the Gorleben Channel	319
RÖHLIG, K.-J.	

Simulation of non-ergodic transport in 2-D heterogeneous anisotropic media	331
SÁNCHEZ-VILA, X., WIPFLER, E. L. , CARRERA, J. AND SOLÍS-DELFIN	

Geostatistical generation of three-dimensional aquifer realizations using the conditional sis approach with direction trends imposed on variogram models	343
VERT, M., PTAK, T., BIVER, P. AND VITTORI, J.	

SOIL SCIENCE

- Performance comparison of cumulative and class indicator approaches for pollution risk assessment** 357
BENAMGHAR, A. AND SONNET, PH.
- A geostatistical analysis of cropped and uncropped soil from the Jimperding Brook catchment of Western Australia** 369
BLOOM, L.M. AND KENTWELL, D. J.
- Geostatistical estimation techniques applied to radionuclide deposition** 381
CHARNOCK, T. W., DANIELS, W. M. AND HIGGINS, N. A.
- Optimising the size of sampling units in an area frame** 393
GALLEGO, F. J., FEUNETTE, I. AND CARFAGNA, E.
- Accounting for scale-dependent correlation in the spatial prediction of soil properties** 405
GOOVAERTS, P.
- Geostatistic survey and amelioration of an inland salt affected area in the lake of Texcoco, México** 417
ORTIZ OLGUIN, M., BATLLE-SALES, J. AND GARCÍA CALDERÓN, N. E.
- Mapping heavy metals in soil by (non-)linear kriging: an empirical validation** 429
PAPRITZ, A. AND DUBOIS, J.-P.
- Geostatistic study of salt distribution in “Laguna de Salinas”, Alicante, Spain** 441
PEPIOL SALOM, E., BATLLE SALES, J. AND BORDÁS VALLS, V.
- Conditional stochastic cosimulations of the Chernobyl fallout** 453
SAVELIEVA, E., KANEVSKI, M., DEMYANOV, V., CHERNOV, S. AND MAIGNAN, M.
- Sampling to monitor soil in England and Wales** 465
SCHOLZ, M., OLIVER, M. A., WEBSTER, R., LOVELAND, P. J. AND MCGRATH, S. P.

THEORY

- Assessing the variability of the variogram estimator** 479
BOGAERT, P.

Criteria for multivariate spatial sampling design based on covariance matrix perturbation	491
BUESO, M. C. AND ANGULO, J. M.	
OTHER APPLICATIONS	
Coastal evolution by dual kriging	505
AUÑÓN, J., AND GÓMEZ-HERNÁNDEZ, J. J.	
Hydric erosion in talus by terrestrial photogrammetry	515
DELGADO-GARCÍA, J., CARDENAL, J. AND GARCÍA-LÓPEZ, S.	
Smoothing cancer ratios in Tirol: A bayesian model in epidemiology	527
KOBOLTSCHNIG, R.-G. AND PILZ, J.	
The effect of scale-related issues on the geostatistical analysis of Ordnance Survey® digital elevation data at the national scale	537
LLOYD, C. D., AND ATKINSON, P.M.	
Image filtering by kriging analysis	549
OLIVER, M. A., WEBSTER, R. AND SLOCUM, K.	
Author Index	561
