PART ONE

THE DEVELOPMENT OF A FIRST LANGUAGE

	Preface	vii
[1]	How Shall a Thing be Called?	3
[2]	Linguistic Determinism and the Part of Speech	16
[3]	Control of Grammar in Imitation, Comprehension, and Production	28
[4]	Explorations in Grammar Evaluation	56
[5]	Three Processes in the Child's Acquisition of Syntax	75
[6]	The Child's Grammar from I to III	100
[7]	Derivational Complexity and Order of Acquisition in Child Speech	155
[8]	The First Sentences of Child and Chimpanzee	208

PART TWO
PSYCHOLINGUISTIC
PROCESSES
IN
ADULT LIFE

[9]	A Study in Language and Cognition	235
[10]	Phonetic Symbolism in Natural Languages	258
[11]	The "Tip of the Tongue" Phenomenon	274
[12]	The Pronouns of Power and Solidarity	302
[13]	Personality and Style in Concord	336
[14]	A Review of Nabokov's <i>Lolita</i>	370
	Author Index	379
	Subject Index	385

Figures

- 3-1. Pictures Illustrating a Grammatical Contrast. 34
- 6-1. Mean Utterance Length and Age in Three Children. 102
- 8-1. Growth in Utterance Length with Age for Adam, Eve, and Sarah. 216
- 8-2. Pictures Illustrating Agent-Object Relations. 226
- 11-1. Percentages of Letter Matches between Target Words and SS Words for Six Serial Positions. 287
- 12-1. The Two-Dimensional Semantic (a) in Equilibrium and (b) under Tension. 310
- 12-2. Social Dyads Involving (a) Semantic Conflict and (b) their Resolution. 312

Tables

- 2-1. Picture Selections for Words Belonging to Various Parts of Speech. 24
- 3-1. Possible Outcomes and Reasons for Expecting Each One. 37
- 3-2. Sample Utterances (Set A) and Scoring for the I.C.P. Test. 38-39
- 3-3. Order of Tasks and Problems Correct for Each Subject. 42
- 3-4. Mean Task Scores and Order of Performing Tasks. 46
- 3-5. Task Scores on Grammatical Problems in Order of Increasing Total Difficulty. 47
- 3-6. Cases in Which the Two Relevant Responses (r_1 and r_2) Were Produced. 49
- 4-1. The Sample Lexicon. 59
- 4-2. The Lexicon Distributed among Word Classes. 60
- 4-3. The Matrix of Two-Word Combinations. 62
- 4-4. Two-Word Combinations in the 15-Hour Corpus and the 11-Hour Corpus. 63
- 4-5. Possible Grammar-Evaluating Ratios. 64
- 4-6. Values of the Three Descriptions for the Two Ratios. 65
- 5-1. A Section from Adam's First Record. 79
- 5-2. Some Imitations Produced by Adam and Eve. 81
- 5-3. Expansions of Child Speech Produced by Mothers. 86
- 5-4. Utterances Not Likely to be Imitations. 90
- 5-5. Noun Phrases in Isolation and Rule for Generating Noun Phrases at Time 1. 92

- 5-6. Subdivision of the Modifier Class. 94
- 5-7. Rules for Generating Noun Phrases at Time 2. 96
- 5-8. Some Privileges of the Noun Phrase. 97
- 5-9. Pronouns Replacing Nouns or Noun Phrases and
Pronouns Produced Together with Nouns or Noun
Phrases. 98
- 6-1. Phrase Structure Rules and a Derivation. 106
- 6-2. Subcategorization Rules and a Derivation. 110
- 6-3. Transformation Rules and a Derivation. 113
- 6-4. The Forms *It* and *It's* in Early Adam Samples. 127
- 6-5. Systematic Relations among Questions and Answers.
132
- 6-6. The Child's Wh Question as a Hypothetical Inter-
mediate in Adult Grammar. 136
- 6-7. *Why* and *Why Not* Questions from Adam 17-19 with
Apparent Bases. 137
- 6-8. Eve's Performance in Supplying Various Prepositions
in Samples 7-12 Compared with Eve's Mother's Mod-
eling Frequencies and Expansions in Samples 1-6. 146
- 6-9. Emergence of Inflections and Two Features of Paren-
tal Speech. 150
- 7-1. Derivation of Interrogative Tag. 165
- 7-2. Transformational Rules for Negation, Interrogation,
Truncation, and Tagging. 171
- 7-3. Derivations of SAAD, Q, N, and Tr. 172
- 7-4. Derivation of Paired Operations from the Set: Inter-
rogation, Negation, Truncation, and Tag. 173

- 7-5. Derivation of Triples from the Set: Interrogation, Negation, Truncation, and Tag. 174
- 7-6. Occurrences Across Time of Seven Sentence Types in Adam. 179
- 7-7. Occurrences Across Time of Seven Sentences Types in Sarah. 179
- 7-8. Occurrences Across Time of Seven Sentence Types in Eve. 182
- 7-9. Occurrences in All Samples for Eighteen Months of Five Sentence Types in Adam. 183
- 7-10. Predictions Confirmed, Disconfirmed, and Unsettled for Derivational Complexity and Order of Acquisition. 185
- 7-11. Sequiturs and Non-Sequiturs Following Primitive and Well-Formed Constructions. 196
- 7-12. Relations between Syntactic Correctness of Antecedent Child's Utterance and Approving or Disapproving Parental Response. 201
- 7-13. Examples of Utterances Approved and Disapproved. 202
- 8-1. Some of Washoe's Sign Sequences as Classified by the Gardners. 214
- 8-2. The Available Data in Developmental Order. 218
- 8-3. The First Sentences in Child Speech. 220
- 9-1. The Munsell Notation and Scores for Discriminability, Codability, and Recognition for the 24 Test Colors. 247

- 9-2. Correlation Matrix for Five Indices of Codability. 249
- 9-3. Recognition Procedures. 252
- 9-4. Correlations Involving Scores on Codability, Discriminability, and Recognition with Four Experimental Conditions for Recognition. 253
- 10-1. Percentages of Correct Translations in Three Studies. 261
- 10-2. Percentages of Correct Translations for Three Languages in Experimental Condition A. 264
- 10-3. Percentage of Correct Translations for Each Pair in Three Languages for Experimental Conditions A and B. 265-266
- 10-4. Summary Data of Translations for 21 Pairs of Words in Three Languages for Experimental Conditions A and B. 267
- 10-5. Frequency Distributions of Percentages of Correct Translations for Three Languages in Experimental Condition A. 267
- 11-1. Actual Numbers of Syllables and Guessed Numbers for All TOTs in the Main Experiment. 283
- 11-2. Syllables Receiving Primary Stress in Target Words and SS Words. 286
- 12-1. Scores on the Pronoun Scale in Relation to Scores on the Radicalism Scale. 328
- 13-1. Paired Passages and the Propositions they Express. 346-349
