Preface	ix
1 Background Material	1
1.1 Algebraic tools	1
1.1.1 Commutative algebra	1
1.1.2 Gröbner bases: a quick introduction	11
1.1.3 Sheaf theory	23
1.2 Analytical tools	34
1.2.1 Topological linear spaces	34
1.2.2 Distributions	40
1.2.3 Fourier transform and fundamental solutions	52
1.3 Elements of hyperfunction theory	60
1.3.1 Hyperfunctions in one variable	60
1.3.2 Cohomological properties of the sheaf of holomorphic functions	74
1.3.3 Hyperfunctions of several variables	78
1.3.4 Fourier transform	85
1.4 Appendix: category theory	88
2 Computational Algebraic Analysis	93
2.1 A primer of algebraic analysis	93
2.2 The Ehrenpreis–Palamodov Fundamental Principle	116
2.3 The Fundamental Principle for hyperfunctions	126
2.4 Using computational algebra software	131

3	The Cauchy–Fueter System and its Variations	139
3.1	Regular functions of one quaternionic variable	139
3.2	Quaternionic hyperfunctions in one variable	148
3.3	Several quaternionic variables: an analytic approach	166
3.4	Several quaternionic variables: an algebraic approach	173
3.5	The Moisil–Theodorescu system	198
4	Special First Order Systems in Clifford Analysis	209
4.1	Introduction to Clifford algebras	209
4.1.1	Standard Clifford algebras	209
4.1.2	Endomorphisms and spinor spaces	218
4.1.3	Classifications of real Clifford algebras	222
4.2	Introduction to Clifford analysis	225
4.2.1	Dirac operators	225
4.2.2	Radial algebra	229
4.2.3	Fischer decomposition	231
4.3	The Dirac complex for two, three and four operators	237
4.3.1	Case of two operators	237
4.3.2	Case of three operators	238
4.3.3	Case of four operators	248
4.4	Special systems in Clifford analysis	250
4.4.1	Generalized systems	250
4.4.2	Systems using the Witt basis	253
4.4.3	Combinatorial systems	262
5	Some First Order Linear Operators in Physics	267
5.1	Physics and algebra of Maxwell and Proca fields	270
5.2	Variations on Maxwell system in the space of biquaternions	277
5.3	Properties of $\mathcal{D}_Z$ -regular functions	284
5.4	The Dirac equation and the linearization problem	293
5.5	Octonionic Dirac equation	296
6	Open Problems and Avenues for Further Research	307
6.1	The Cauchy–Fueter system	307
6.2	The Dirac system	308
6.3	Miscellanea	309
	Bibliography	313
	Index	327
