

Contents

Preface	ix
The Editor	xi
Contributors	xiii
 Chapter 1 Nanotechnology in Stem Cell Biology and Technology	1
<i>Hossein Baharvand and Narges Zare Mehrjardi</i>	
 Chapter 2 Lipid Membranes in Biomimetic Systems	25
<i>Tânia Beatriz Creczynski-Pasa and André Avelino Pasa</i>	
 Chapter 3 Mesenchymal Stem Cells and Controlled Nanotopography	35
<i>Matthew J. Dalby and Richard O.C. Oreffo</i>	
 Chapter 4 Biological Applications of Optical Tags Based on Surface-Enhanced Raman Scattering	45
<i>William E. Doering, Michael Y. Sha, David Guagliardo, Glenn Davis, Remy Cromer, Michael J. Natan, and R. Griffith Freeman</i>	
 Chapter 5 Nanostructured Titanium Alloys for Implant Applications	61
<i>Yulin Hao, Shujun Li, and Rui Yang</i>	
 Chapter 6 Commercializing Bionanotechnology: From the Academic Lab to Products	71
<i>Michael N. Helmus, Peter Gammel, Fred Allen, and Magnus Gittins</i>	
 Chapter 7 Opportunities for Bionanotechnology in Food and the Food Industry	79
<i>Frans W.H. Kampers</i>	
 Chapter 8 Engineering Nanostructured Thermal Spray Coatings for Biomedical Applications.....	91
<i>Rogério S. Lima and Basil R. Marple</i>	
 Chapter 9 Nanophenomena at Work, for Color Management in Personal Care	111
<i>Vijay M. Naik</i>	
 Chapter 10 Proteoliposome as a Nanoparticle for Vaccine Adjuvants	123
<i>Oliver Pérez, Gustavo Bracho, Miriam Lastre, Domingo González, Judith del Campo, Caridad Zayas, Reinaldo Acevedo, Ramón Barberá, Gustavo Sierra, Alexis Labrada, and Concepción Campa</i>	

Chapter 11 Australian BioNanotechnology for Delivery, Diagnostics, and Sensing 131
Jeanette Pritchard, Michelle Critchley, Sarah Morgan, and Bob Irving

Chapter 12 Development of a BioChip for Cardiac Diagnostics 141
Manoj Joshi, Nitin Kale, R. Lal, S. Mukherji, and V. Ramgopal Rao

Chapter 13 Synthesis, PhysicoChemical Properties, and Biologic Activity of Nanosized Silver Particles..... 161
Alexandra A. Revina

Chapter 14 Nanocrystalline Silicon for Biomedical Intelligent Sensor Systems 169
Alexandra Shmyryeva and Elena Shembel

Chapter 15 Wetting the Surface: From Self-Cleaning Leaves to Energy Storage Devices 177
V.A. Lifton and S. Simon

Chapter 16 Nanotechnology in Drug Delivery for Malaria and Tuberculosis Treatment 187
Hulda S. Swai, Paul K. Chelule, Boitumelo Semete, and Lonji Kalombo

Chapter 17 Nanophotonics for Biomedical Superresolved Imaging 199
Zeev Zalevsky, Dror Fixler, Vicente Mico, and Javier García

Chapter 18 DNA as a Scaffold for Nanostructure Assembly 213
Michael Connolly

Chapter 19 Directed Evolution of Proteins for Device Applications..... 227
Jeremy F. Kosciielecki, Jason R. Hillebrecht, and Robert R. Birge

Chapter 20 Semiconductor Quantum Dots for Molecular and Cellular Imaging..... 233
Andrew Michael Smith and Shuming Nie

Chapter 21 Bionanotechnology for Bioanalysis..... 243
Lin Wang and Weihong Tan

Chapter 22 Nanohydroxyapatite for Biomedical Applications 249
Zongtao Zhang, Yunzhi Yang, and Joo L.Ong

Chapter 23 Nanotechnology Provides New Tools for Biomedical Optics 261
Jennifer L. West, Rebekah A. Drezek, and Naomi J. Halas

Chapter 24	Nanomaterials: Perspectives and Possibilities in Nanomedicine.....	269
	<i>Kimberly L. Douglas, Shawn D. Carrigan, and Maryam Tabrizian</i>	
Chapter 25	Biomedical Nanoengineering for Nanomedicine.....	289
	<i>Jie Han</i>	
Chapter 26	Physiogenomics: Integrating Systems Engineering and Nanotechnology for Personalized Medicine	299
	<i>Gualberto Rúaño, Andreas Windemuth, and Theodore R. Holford</i>	
Chapter 27	Patenting Inventions in Bionanotechnology: A Guide for Scientists and Lawyers	309
	<i>Raj Bawa</i>	
Index		339
