Introduction	xxiii

Part 1 Pollutants and Their Fate in Ecosystems

Chapter 1 Major Classes of Pollutants	3
1.1 Inorganic Ions	3
1.1.1 Metals	3
1.1.2 Anions.....	6
1.2 Organic Pollutants.....	7
1.2.1 Hydrocarbons	8
1.2.2 Polychlorinated Biphenyls (PCBs).....	9
1.2.3 Polychlorinated Benzodioxins (PCDDs)	10
1.2.4 Polychlorinated Dibenzofurans (PCDFs).....	11
1.2.5 Polybrominated Biphenyls (PBBs).....	11
1.2.6 Organochlorine Insecticides.....	11
1.2.7 Organophosphorous Insecticides (OPs).....	13
1.2.8 Carbamate Insecticides	14
1.2.9 Pyrethroid Insecticides.....	14
1.2.10 Neonicotinoids	15
1.2.11 Phenoxy Herbicides (Plant-Growth-Regulator Herbicides).....	15
1.2.12 Anticoagulant Rodenticides	16
1.2.13 Detergents.....	16
1.2.14 Chlorophenols	16
1.2.15 Ethinylestradiol (EE2).....	16
1.2.16 Pharmaceuticals.....	18
1.3 Organometallic Compounds	18
1.4 Radioactive Isotopes	19
1.4.1 Introduction	19
1.4.2 The Nature and Intensity of the Radioactive Decay Products.....	19
1.4.3 Half-Lives.....	20
1.4.4 Biochemistry	20
1.5 Gaseous Pollutants.....	21
1.6 Summary	21
1.7 Further Reading	21

Chapter 2 Routes by Which Pollutants Enter Ecosystems

2.1 Entry Into Surface Waters.....	23
2.2 Contamination of Land.....	26
2.3 Discharge Into the Atmosphere	27
2.4 Quantification of Release of Pollutants.....	30
2.5 Summary	31
2.6 Further Reading	31

Chapter 3 Long-Range Movements and Global Transport of Pollutants

3.1 Factors Determining Movement and Distribution of Pollutants.....	33
3.1.1 Polarity and Water Solubility.....	34
3.1.2 Partition Coefficients.....	35
3.1.3 Vapor Pressure.....	35
3.1.4 Partition Between Different Compartments of the Environment.....	36
3.1.5 Molecular Stability and Recalcitrant Molecules	36
3.2 Transport in Water	36
3.3 Transport in Air.....	38
3.4 Models for Environmental Distribution of Chemicals.....	40
3.5 Summary	42
3.6 Further Reading	43

Chapter 4 The Fate of Metals and Radioactive Isotopes in Contaminated Ecosystems

4.1 Introduction.....	45
4.1.1 Localization.....	45
4.1.2 Persistence.....	45
4.1.3 Bioconcentration and Bioaccumulation Factors.....	46
4.1.4 Bioavailability	46
4.1.5 Cocktails of Inorganic Pollutants	46
4.2 Terrestrial Ecosystems	46
4.2.1 Introduction	46
4.2.2 Metals.....	47
4.2.3 Radioactivity	49
4.3 Aquatic Systems.....	52
4.4 Summary	56
4.5 Further Reading	56

Chapter 5 The Fate of Organic Pollutants in Individuals and in Ecosystems

5.1 Fate Within Individual Organisms.....	58
5.1.1 General Model.....	58
5.1.2 Processes of Uptake	59
5.1.3 Processes of Distribution	62
5.1.4 Storage.....	62
5.1.5 Metabolism.....	63
5.1.6 Sites of Excretion.....	71
5.1.7 Toxicokinetic Models.....	73

5.1.8 Toxicokinetic Models for Bioconcentration and Bioaccumulation	74
5.2 Organic Pollutants in Terrestrial Ecosystems.....	76
5.2.1 Fate in Soils	76
5.2.2 Transfer Along Terrestrial Food Chains	79
5.3 Organic Pollutants in Aquatic Ecosystems	81
5.3.1 Pollutants in Sediments.....	81
5.3.2 Transfer Along Aquatic Food Chains	82
5.4 Summary	83
5.5 Further Reading	83

Part 2 Effects of Pollutants on Individual Organisms

Chapter 6 Toxicity Testing

6.1 General Principles.....	87
6.2 Determination of the Toxicity of Mixtures	91
6.3 Toxicity Testing with Terrestrial Organisms	91
6.3.1 Introduction	91
6.3.2 Invertebrates	92
6.3.3 Vertebrates	97
6.3.4 Plants	98
6.4 Toxicity Testing with Aquatic Organisms	99
6.4.1 Tests Concerned with Direct Absorption from Water	99
6.4.2 Sediment Toxicity Tests	102
6.5 Risk Assessment	102
6.6 Toxicity Testing in the Field.....	104
6.7 Alternative Methods in Ecotoxicity Testing.....	105
6.7.1 Alternative Methods for Estimating Toxicity to Vertebrates.....	106
6.7.2 Alternative Methods and Strategies That Work to More Ecological End Points	107
6.8 Summary	108
6.9 Further Reading	108

Chapter 7 Biochemical Effects of Pollutants

7.1 Introduction.....	109
7.2 Protective Biochemical Responses	111
7.3 Molecular Mechanisms of Toxicity.....	112
7.4 Examples of Molecular Mechanisms of Toxicity	114
7.4.1 Genotoxic Compounds.....	114
7.4.2 Neurotoxic Compounds	115
7.4.3 Mitochondrial Poisons	117
7.4.4 Vitamin K Antagonists.....	117
7.4.5 Thyroxine Antagonists	118
7.4.6 Inhibition of ATPases.....	119
7.4.7 Environmental Estrogens and Androgens.....	119
7.4.8 Reactions with Protein Sulfhydryl (SH) Groups.....	120

7.4.9 Photosystems of Plants	120
7.4.10 Plant-Growth-Regulator Herbicides.....	120
7.5 Summary	120
7.6 Further Reading	121

Chapter 8 Physiological Effects of Pollutants

8.1 Introduction.....	123
8.2 Effects of Pollutants at the Cellular Level in Animals	123
8.3 Effects at the Organ Level in Animals	125
8.4 Effects at the Whole Organism Level in Animals	127
8.4.1 Neurophysiological Effects.....	128
8.4.2 Effects on Behavior.....	131
8.4.3 Reproductive Effects.....	133
8.5 Effects on Plants	135
8.6 Energy Costs of Physiological Change	136
8.7 Summary	140
8.8 Further Reading	140

Chapter 9 Interactive Effects of Pollutants

9.1 Introduction.....	141
9.2 Additive Effects.....	142
9.3 Potentiation of Toxicity	143
9.4 Potentiation Due to Inhibition of Detoxication.....	145
9.5 Potentiation Due to Increased Activation.....	145
9.6 The Detection of Potentiation in the Field.....	146
9.7 Summary	148
9.8 Further Reading	148

Chapter 10 Biomarkers

10.1 Classification of Biomarkers	149
10.2 Specificity of Biomarkers	150
10.3 Relationship of Biomarkers to Adverse Effects.....	152
10.4 Discussion of Specific Biomarkers.....	154
10.4.1 Inhibition of Esterases	154
10.4.2 The Monooxygenases	154
10.4.3 Studies on Genetic Material	155
10.4.4 Porphyrins and Heme Synthesis.....	157
10.4.5 Induction of Vitellogenin	158
10.4.6 Behavioral Biomarkers.....	159
10.4.7 Biomarkers in Plants.....	160
10.5 Role of Biomarkers in Environmental Risk Assessment.....	161
10.6 Summary	163
10.7 Further Reading	163

Chapter 11 *In situ* Biological Monitoring

11.1 Introduction	165
11.2 Community Effects (Type 1 Biomonitoring)	165
11.2.1 Terrestrial Ecosystems	165
11.2.2 Freshwater Ecosystems	167
11.2.3 Marine Ecosystems	168
11.3 Bioconcentration of Pollutants (Type 2 Biomonitoring)	169
11.3.1 Terrestrial Ecosystems	169
11.3.2 Freshwater Ecosystems	170
11.3.3 Marine Ecosystems	173
11.4 Effects of Pollutants (Type 3 Biomonitoring)	174
11.4.1 Terrestrial Ecosystems	174
11.4.2 Freshwater Ecosystems	175
11.4.3 Marine Ecosystems	175
11.5 Genetically Based Resistance to Pollution (Type 4 Biomonitoring)	176
11.6 Conclusions	177
11.7 Summary	177
11.8 Further Reading	178

Part 3 Effects of Pollutants on Populations and Communities

Chapter 12 Changes in Numbers: Population Dynamics

12.1 Population Abundance	182
12.2 Population Growth Rate	182
12.3 Population Growth Rate Depends on the Properties of Individual Organisms	183
12.3.1 The Life History and Population Growth Rate of the Coastal Copepod <i>Eurytemora affinis</i>	184
12.4 Density Dependence	187
12.5 Identifying Which Factors Are Density Dependent: <i>k</i> -Value Analysis	188
12.6 Interactions Between Species	190
12.7 Field Studies: Three Case Studies	191
12.7.1 The Decline of the Partridge	192
12.7.2 Population Studies of Pesticides and Birds of Prey in the UK	198
12.7.3 The Boxworth Project (An Experimental Analysis of the Effects of Pesticides on Farmland)	203
12.8 Modeling the Effects of Insecticides on Skylarks for Risk Assessment Purposes	206
12.9 Summary	207
12.10 Further Reading	208

Chapter 13 Evolution of Resistance to Pollution

13.1 Chronic Pollution Is Environmental Change	209
13.2 The Evolutionary Process in a Constant Environment	210
13.3 The Evolution of Resistance When There Is a Mortality–Production Trade-Off	212
13.4 Evolutionary Responses to Environmental Change	213

13.5 Resistance Is Often Monogenic.....	216
13.6 Case Studies	217
13.6.1 Evolution of Pesticide Resistance	217
13.6.2 Evolution of Metal Tolerance in Plants.....	219
13.6.3 Evolution of Industrial Melanism.....	221
13.6.4 Evolutionary Response of Dog Whelks, <i>Nucella lapillus</i> , to TBT Contamination.....	224
13.6.5 Evolution of Resistance to Pollution in Estuaries.....	224
13.7 Summary	226
13.8 Further Reading	227

Chapter 14 Changes in Communities and Ecosystems

14.1 Introduction	229
14.2 Changes in Soil Processes: The Functional Approach	230
14.3 Changes in Composition of Communities: The Structural Approach.....	233
14.3.1 Changes in Soil Ecosystems.....	233
14.3.2 Acidification of Lakes and Rivers	236
14.3.3 Mesocosms	238
14.4 Global Processes	240
14.5 Summary	241
14.6 Further Reading	242

Chapter 15 Extrapolating from Molecular Interactions to Consequent Effects at the Population Level

15.1 Introduction.....	243
15.2 The Translation of Toxic Effects Across Organizational Boundaries	244
15.2.1 From Effects at the Site of Action to Localized Cellular Disturbances.....	244
15.2.2 From Cellular Disturbances to Effects at the Level of the Whole Organism.....	248
15.2.3 From Effects Upon the Whole Organism to Population Effects	250
15.2.4. The Complete Causal Chain	252
15.3 Biomarker Strategies.....	253
15.3.1 Establishing Causality Where Pollution Already Exists	253
15.3.2 Biomarker Strategies in the Field.....	254
15.3.3 The Problem of Controls	255
15.3.4 Selection of Biomarkers for Field Studies	255
15.4 Biomarkers and Environmental Risk Assessment.....	256
15.5 Summary	257
15.6 Further Reading	257

Chapter 16 Biomarkers in Population Studies

16.1 DDE-Induced Eggshell Thinning in Raptorial and Fish-Eating Birds.....	259
16.2 Reproductive Failure of Fish-Eating Birds on the Great Lakes of North America	264
16.3 Reproductive Failure of Molluscs Caused by Tributyl Tin	268
16.4 Forest Spraying in Eastern Canada to Control Spruce Budworm.....	270
16.5 Summary	274
16.6 Further Reading	274

Appendix: Introduction to Population Projection Matrices 275

Glossary..... 277

Bibliography..... 283

Index 305
