Preface	x
Preface to the first edition	xi
Acknowledgements	xii
Introduction	xiii

PART 1	POLLUTANTS AND THEIR FATE IN ECOSYSTEMS	1
---------------	--	----------

CHAPTER 1	MAJOR CLASSES OF POLLUTANT	3
1.1	Inorganic ions	3
1.2	Organic pollutants	7
1.3	Organometallic compounds	18
1.4	Radioactive isotopes	18
1.5	Gaseous pollutants	21
1.6	Summary	22
1.7	Further reading	22

CHAPTER 2	ROUTES BY WHICH POLLUTANTS ENTER ECOSYSTEMS	23
2.1	Entry into surface waters	23
2.2	Contamination of land	26
2.3	Discharge into the atmosphere	28
2.4	Quantification of release of pollutants	31
2.5	Summary	32
2.6	Further reading	32

CHAPTER 3	LONG-RANGE MOVEMENTS AND GLOBAL TRANSPORT OF POLLUTANTS	34
3.1	Factors determining movement and distribution of pollutants	34
3.2	Transport in water	38
3.3	Transport in air	39

3.4	Models for environmental distribution of chemicals	42
3.5	Summary	45
3.6	Further reading	45
CHAPTER 4	THE FATE OF METALS AND RADIOACTIVE ISOTOPES IN CONTAMINATED ECOSYSTEMS	46
4.1	Introduction	46
4.2	Terrestrial ecosystems	48
4.3	Aquatic systems	55
4.4	Summary	57
4.5	Further reading	58
CHAPTER 5	THE FATE OF ORGANIC POLLUTANTS IN INDIVIDUALS AND IN ECOSYSTEMS	59
5.1	Fate within individual organisms	60
5.2	Organic pollutants in terrestrial ecosystems	80
5.3	Organic pollutants in aquatic ecosystems	86
5.4	Summary	88
5.5	Further reading	89
PART 2	EFFECTS OF POLLUTANTS ON INDIVIDUAL ORGANISMS	91
CHAPTER 6	TOXICITY TESTING	93
6.1	General principles	93
6.2	Determination of the toxicity of mixtures	97
6.3	Toxicity testing with terrestrial organisms	98
6.4	Toxicity testing with aquatic organisms	107
6.5	Risk assessment	112
6.6	Toxicity testing in the field	113
6.7	Alternative methods in ecotoxicity testing	114
6.8	Summary	117
6.9	Further reading	118
CHAPTER 7	BIOCHEMICAL EFFECTS OF POLLUTANTS	119
7.1	Introduction	119
7.2	Protective biochemical responses	121

7.3	Molecular mechanisms of toxicity	122
7.4	Examples of molecular mechanisms of toxicity	124
7.5	Summary	132
7.6	Further reading	132
CHAPTER 8	PHYSIOLOGICAL EFFECTS OF POLLUTANTS	133
8.1	Introduction	133
8.2	Effects of pollutants at the cellular level	134
8.3	Effects at the organ level	135
8.4	Effects at the whole organism level	139
8.5	Energy costs of physiological change	147
8.6	Effects on plants	151
8.7	Summary	152
8.8	Further reading	152
CHAPTER 9	INTERACTIVE EFFECTS OF POLLUTANTS	153
9.1	Introduction	153
9.2	Additive effects	154
9.3	Potentialiation of toxicity	156
9.4	Potentialiation due to inhibition of detoxication	158
9.5	Potentialiation due to increased activation	158
9.6	The detection of potentialiation in the field	159
9.7	Summary	161
9.10	Further reading	161
CHAPTER 10	BIOMARKERS	162
10.1	Classification of biomarkers	162
10.2	Specificity of biomarkers	164
10.3	Relationship of biomarkers to adverse effects	164
10.4	Discussion of specific biomarkers	167
10.5	Role of biomarkers in environmental risk assessment	176
10.6	Summary	177
10.7	Further reading	178
CHAPTER 11	IN SITU BIOLOGICAL MONITORING	179
11.1	Introduction	179
11.2	Community effects (type 1 biomonitoring)	180

11.3	Bioconcentration of pollutants (type 2 biomonitoring)	183
11.4	Effects of pollutants (type 3 biomonitoring)	187
11.5	Genetically based resistance to pollution (type 4 biomonitoring)	190
11.6	Conclusions	191
11.7	Summary	191
11.7	Further reading	192

PART 3 EFFECTS OF POLLUTANTS ON POPULATIONS AND COMMUNITIES 193

CHAPTER 12 CHANGES IN NUMBERS: POPULATION DYNAMICS 195

12.1	Population growth rate	196
12.2	Population growth rate depends on the properties of individual organisms	196
12.3	Density dependence	200
12.4	Identifying which factors are density dependent: k -value analysis	202
12.5	Interactions between species	202
12.6	Field studies: three case studies	205
12.7	Summary	218
12.8	Further reading	219

CHAPTER 13 EVOLUTION OF RESISTANCE TO POLLUTION 220

13.1	Chronic pollution is environmental change	220
13.2	The evolutionary process in a constant environment	221
13.3	The evolution of resistance when there is a mortality–production trade-off	223
13.4	Evolutionary responses to environmental change	224
13.5	Resistance is often monogenic	228
13.6	Case studies	229
13.7	Summary	236
13.8	Further reading	237

CHAPTER 14 CHANGES IN COMMUNITIES AND ECOSYSTEMS 238

14.1	Introduction	238
14.2	Soil processes: the functional approach	239
14.3	Changes in communities in response to pollution	241

14.4	Global processes	246
14.5	Summary	247
14.6	Further reading	247
CHAPTER 15	BIOMARKERS IN POPULATION STUDIES	248
15.1	DDE-induced eggshell thinning in raptorial and fish-eating birds	248
15.2	Reproductive failure of fish-eating birds on the Great Lakes of North America	254
15.3	Reproductive failure of molluscs caused by tributyl tin	259
15.4	Forest spraying in eastern Canada to control spruce budworm	261
15.5	Summary	265
15.6	Further reading	265
	Appendix: Introduction to population projection matrices	266
	Glossary	268
	Bibliography	275
	Index	301
