

# CONTENTS

<b>Series Editor's Introduction</b>	<b>vii</b>
<b>Preface</b>	<b>ix</b>
<b>Acknowledgments</b>	<b>xi</b>
<b>1. Introduction</b>	<b>1</b>
1.1 Interaction and Social Science	1
1.2 Democracy Around the World	4
1.3 Introducing Spatial Dependence	8
1.4 Maps as Visual Displays of Data	11
1.5 Measuring Spatial Association and Correlation	14
1.6 Measuring Proximity	19
1.7 Estimating Spatial Models	28
1.8 Summary	33
Notes	34
<b>2. Spatially Lagged Dependent Variables</b>	<b>35</b>
2.1 Regression With Spatially Lagged Dependent Variables	35
2.2 Estimating the Spatially Lagged y Model	40
2.3 Maximum Likelihood Estimates of the Spatially Lagged y Model of Democracy	43
2.4 Equilibrium Effects in the Spatially Lagged y Model	44
2.5 Spatial Dependence in Turnout in Italy	50
2.6 Using Different Weights Matrices in a Spatially Lagged Dependent Variable Model	56
2.7 The Spatially Lagged Dependent Variable Versus OLS With Dummy Variables	61
Notes	64
<b>3. Spatial Error Model</b>	<b>65</b>
3.1 The Spatial Error Model	65

3.2	Maximum Likelihood Estimation of the Spatial Errors Model	67
3.3	Example: Democracy and Development	68
3.4	Spatially Lagged $y$ Versus Spatial Errors	69
3.5	Assessing Spatial Error in Dyadic Trade Flows	70
3.6	Summary	75
	Notes	76
<b>4.</b>	<b>Extensions</b>	<b>77</b>
4.1	Specifying Connectivities	77
4.2	Inference and Model Evaluation	82
4.3	Summary	86
	Note	86
	<b>Appendix: Software Options</b>	<b>87</b>
	<b>References</b>	<b>91</b>
	<b>Index</b>	<b>97</b>
	<b>About the Authors</b>	<b>99</b>
