

CONTENTS

Preface I. Sunagawa v
Editorial Committee xi

CHAPTER 1: SILICATE MELT

Computer Simulation of Structures of Silicate Melts and Glasses ..
..... Y. MATSUI and K. KAWAMURA 3
X-Ray Structural Studies of Molten Silicates: Anorthite and Albite
Melts..... F. MARUMO and M. OKUNO 25
Structures and Some Physical Properties of Silicate Melts of Geologi-
cal InterestI. KUSHIRO 39

CHAPTER 2: CRYSTAL GROWTH AND SYNTHESIS OF LARGE
SINGLE CRYSTALS

Growth of Crystals in NatureI. SUNAGAWA 63
Synthesis of Large Single Crystals of Silicates and Titanates.....
..... H. TAKEI, S. HOSOYA, and M. OZIMA 107
Synthesis of Single Crystals under High Pressure—Crystal Growth of
Ni₂SiO₄ Spinel and Black Phosphorus.....
.....S. AKIMOTO, N. HAMAYA, and I. SHIROTANI 131
Characterization of Olivine Crystals H. KOMATSU and T. INOUE 149

CHAPTER 3: ELECTRON AND CRYSTAL STRUCTURES

Electron Theory of Transition-Metal Compounds under High Pressure
.....S. SUGANO and S. OHNISHI 173
High-Temperature Crystallography of Olivines and Spinel
..... Y. TAKÉUCHI, T. YAMANAKA, N. HAGA, and M. HIRANO 191
In-situ Observations of Crystal Structure and Phase Transformation
under Pressure T. YAGI and S. AKIMOTO 233

CHAPTER 4: ANALYSIS OF THERMAL AND STRESS HISTORIES

Application of Transmission Electron Microscopy to the Studies of
Decomposition and Exsolution of Minerals.....
..... N. MORIMOTO and M. KITAMURA 251
Oxygen Self-Diffusion Coefficient in Single-Crystal Forsterite.....

.....Y. OISHI and K. ANDO	271
Transient and Steady State Creep of Olivine.....	
.....M. TORIUMI, S. KARATO and T. FUJII	281

CHAPTER 5: SOLID MATERIALS IN THE EARTH'S INTERIOR

Morphology of Natural and Synthetic Diamond Crystals.....	
.....I. SUNAGAWA	303
Surface Microtopographic and X-Ray Topographic Study of Octahedral Crystals of Natural Diamond from Siberia	
.....I. SUNAGAWA, K. TSUKAMOTO, and T. YASUDA	331
Synthesis Researchers of Diamond	M. WAKATSUKI 351
Ar Isotopic Ratios and K, Na and Other Trace Element Contents in Premier and Finsch Mine Diamonds	
.....M. OZIMA, N. TAKAOKA, O. NITO and S. ZASHU	375
Ultra-High Pressure Phase Relations of the System MgO-FeO-SiO ₂ and Their Geophysical Implications.....	E. ITO 387
Shock-Induced Phase Transition in Oxides and Silicates	
.....Y. SYONO	395
Petrology of Materials Derived from the Upper Mantle	
.....K. AOKI	415
Igneous Mineral Equilibria in Some Alpine-Type Peridotites in Japan	S. ARAI 445

CHAPTER 6: INTERACTION BETWEEN SOLID AND FLUID COMPONENTS

H ₂ O in the Earth's Interior	Y. HARIYA 463
Possible Hydrous Magnesian Silicates in the Mantle Transition Zone	S. AKIMOTO and M. AKAOGI 477
Problems on Water in Granite Intrusions in View of Hydrogen Isotope Study.....	Y. KURODA, T. SUZUOKI, and S. MATSUO 481
Hydrothermal Solution-Mineral Equilibria as a Clue for Studies of Geochemical Transport Phenomena in the Earth's Crust.....	
.....J. T. IYAMA	493
Hydrothermal Fluids Inferred from Fluid Inclusions.....	
.....S. TAKENOUCHI	515
Hydrothermal Synthesis and Phase Relations of the Polymetallic Sulfide System, Especially on the Cu-Fe-Bi-S System.....	
.....A. SUGAKI, A. KITAKAZE, and K. HAYASHI	545

CHAPTER 7: TECHNICAL DEVELOPMENTS

Recent Progress in the Generation of Static High Pressure by Means of the Multiple Anvil.....	M. KUMAZAWA and S. ENDO 587
--	-----------------------------

Technical Aspect of Shock Compression Experiments Using the Gun Method.	T. GOTO and Y. SYONO	605
Technique and Gas-Flame Heater for Single-Crystal X-Ray Diffraction Studies at High Temperatures Up to Around 2,500°C	T. YAMANAKA	621
Laser-Heating Device for Single-Crystal Diffractometry and Its Application to the Structural Study of High Cristobalite	K. OHSUMI, T. SAWADA, Y. TAKÉUCHI, and R. SADANAGA	633
Material Index		645
Subject Index		649
