

Contents

| | | |
|----------|--|-----------|
| 1 | Introduction | 1 |
| 2 | Mapping in Gneiss Terrains | 4 |
| 2.1 | Introduction | 4 |
| 2.2 | General Problems | 4 |
| 2.3 | Working Method | 5 |
| 2.4 | Outcrop Analysis | 5 |
| 2.5 | What to Map | 7 |
| 2.6 | Types of Maps | 8 |
| 2.7 | Scheme of Events | 11 |
| 2.8 | Sampling | 11 |
| 3 | Fabric Development in Gneiss Terrains | 15 |
| 3.1 | Introduction | 15 |
| 3.2 | The Geometry of Ductile Flow in Rocks | 15 |
| 3.2.1 | Coaxial or Non-Coaxial Flow | 15 |
| 3.2.2 | Effects of Progressive Deformation | 18 |
| 3.3 | Fabric Elements | 21 |
| 3.3.1 | Granoblastic Fabrics | 21 |
| 3.3.2 | Shape and Mineral Fabrics | 22 |
| 3.3.3 | Layering | 25 |
| 3.3.4 | Augen Structures in Gneiss | 35 |
| 3.4 | Shear Zones in High-Grade Conditions | 35 |
| 3.4.1 | Introduction | 35 |
| 3.4.2 | Development of Fabrics in Shear Zones | 37 |
| 3.4.3 | Isoclinal Folds in Shear Zones | 39 |
| 3.5 | Fabric Distribution in Shear Zones | 40 |
| 3.5.1 | Introduction | 40 |
| 3.5.2 | The Semi-Brittle Deformation Regime | 41 |
| 3.5.3 | Cataclasite and Pseudotachylyte | 43 |
| 3.5.4 | The Transition Zone | 44 |
| 3.5.5 | Relation of Brittle and Ductile Fault Rocks in Gneiss Terrains | 45 |
| 4 | Interpretation of Structures and Fabrics | 47 |
| 4.1 | The Inadequate Memory of Rocks | 47 |
| 4.2 | Igneous or Sedimentary Origin of Gneisses | 50 |
| 4.2.1 | General Guidelines | 50 |
| 4.2.2 | Apparent Sedimentary Structures | 51 |
| 4.3 | Assessment of Strain Intensity | 54 |
| 4.4 | Shear Zones | 55 |
| 4.4.1 | Recognition of Shear Zones | 55 |

VIII

| | | |
|-------|---|-----|
| 4.4.2 | Deformation in Shear Zones | 59 |
| 4.4.3 | Determining Movement Direction Using Lineations | 59 |
| 4.4.4 | Determining Movement Direction in Absence of Lineations | 61 |
| 4.4.5 | Shear Sense Criteria | 62 |
| 4.5 | Folds and Boudins | 64 |
| 4.6 | Overprinting Relations Involving Folds and Boudins | 69 |
| 4.6.1 | Introduction | 69 |
| 4.6.2 | Fold Interference | 71 |
| 4.6.3 | Deformed Vein Sets | 73 |
| 4.7 | Overprinting Relations Involving Intrusions | 78 |
| 4.7.1 | General Guidelines | 78 |
| 4.7.2 | Intersection Geometry of Planar Intrusions | 82 |
| 4.7.3 | Interaction of Dykes and Shear Zones | 85 |
| 4.7.4 | Reactivated Shear Zones | 88 |
| 4.7.5 | Partial Melt Veins | 89 |
| 4.8 | Outcrop Surface and Fabric Patterns | 90 |
| 4.8.1 | General Problems | 90 |
| 4.8.2 | Lineations and Foliation Traces | 92 |
| 5 | Metamorphic History of Gneiss Terrains | 94 |
| 5.1 | Introduction | 94 |
| 5.2 | Metamorphic History | 95 |
| 5.3 | Fabric Evidence for Metamorphic History | 96 |
| 5.4 | Metamorphic Conditions | 98 |
| 5.4.1 | Introduction | 98 |
| 5.4.2 | Mineral Assemblages in High-Grade Metamorphism | 100 |
| 5.4.3 | Mineral Assemblages in High to Medium Grade Retrogression ... | 101 |
| 5.4.4 | Mineral Assemblages in Low-Grade Retrogression | 102 |
| 5.5 | Sites to Study Retrogression Fabrics | 103 |
| 5.6 | Relative Dating of Metamorphic Events | 104 |
| 5.7 | Isograd Patterns | 105 |
| 5.8 | Geothermobarometry | 107 |
| 6 | Geochemistry, Isotope Geochemistry and Geochronology: Application to Field Studies | 108 |
| 6.1 | Introduction | 108 |
| 6.2 | Geochemistry | 108 |
| 6.3 | Isotope Geochemistry | 111 |
| 6.4 | Geochronology | 113 |
| 6.4.1 | Introduction | 113 |
| 6.4.2 | Sm-Nd Method of Dating | 114 |
| 6.4.3 | U-Pb Dating of Zircons | 114 |

| | | |
