

CONTENTS

PREFACE	VII
CHAPTER 1. SOME GENERALISATIONS CONCERNING DESERTS	1
Aridity leads to desert formation	1
Meteorological reasons for deserts	3
Trade-wind deserts	4
Monsoon deserts	5
Polar deserts	6
Desert rain	6
Desert erosion	7
Aeolian transport	7
Sources of dune sand	7
Aeolian sedimentation	8
Basins of inland drainage	8
Preservation of fossil dune sands	10
CHAPTER 2. SOME CRITERIA FOR IDENTIFYING ANCIENT DESERT SEDI- MENTS	11
Identification of wind-deposited sands in a desert environment	11
Identification of water-laid sediments in a desert environment	12
Recognition of sub-aerial exposure of water-laid sediments in a desert environment	12
CHAPTER 3. DESERT EROSION AND DEFLATION	15
General	15
Exfoliation and insolation	15
Deflation surfaces	16
Desert varnish	19
Ventifacts	20
Sand removal by wind	21
Sand accumulation	23
Differential deflation	23
Deflation hollows	24
CHAPTER 4. WADIS AND DESERT FLUVIATILE SEDIMENTS	29
Wadis in general	29
Braided pattern of wadi channels	30
Deflation of wadi sediments	32
Early cementation of wadi sediments	33
Relation between erosional highlands and wadi sediments	36
Relation between wadis and dune fields	37
Desert sedimentation in areas of low relief	39
The resistance of aeolian sand to erosion by water	39
Ancient wadi sediments	42
Wadi sediments as a source of aeolian sand	45
Interbedded wadi gravels and aeolian sand	48
Clay lags in wadis and mud cracks	49

Permo-Triassic mud cracks	49
Preservation of sun-curved clay flakes by aeolian sand	52
Clay flakes in ancient sediments	54
Interplay between wind and water in wadi sediments	55
CHAPTER 5. DESERT LAKES AND INLAND SEBKHAS	57
Salinity of lakes in basins of inland drainage	57
Wadi-flood-water origin of some desert lakes	58
Ground-water origin of some desert lakes	58
Inland sebkhas	60
The inland sebkha Um as Samim	61
Some sedimentary structures in inland sebkhas	64
Sand dykes in inland sebkhas	65
Sedimentation versus deflation in inland sebkhas	69
Horizontal bedding in inland sebkhas	69
Near-coast inland sebkhas	69
Adhesion ripples	71
Oases	73
CHAPTER 6. AEOLIAN SANDS	77
Sand ridges	77
Aeolian sand ripples	79
Sand dunes	81
Barchan dunes	81
Distribution of sand dunes	84
Dune complexes	86
Opposing wind directions	88
Seif dunes	89
Transverse dunes	95
Ancient dune sands and palaeo-wind directions	99
Forest laminae in dune sands	106
Horizontal laminae in dune sands	106
Horizontal laminae of sheet sands and interdune areas	106
Contorted bedding in dune sand versus temporary wadi deltas	108
Dikaka	113
Loess	118
CHAPTER 7. DESERT COASTAL SEDIMENTS	121
Development of coastal sebkhas behind longshore bars	121
Preservation of dunes behind protection of spit/coastal-sebkha complexes	122
Absence of fluvial deltas along desert coast lines	124
Tidal deltas	124
Prograding desert coasts	124
Coastal carbonate dunes	126
Carbonate dunes as barrier between wadi and sea	128
Cemented carbonate dunes	128
Time of cementation of carbonate dunes	132
Difficulties of recognising ancient carbonate dunes	133
The salts of coastal evaporitic lagoons	133
Recent anhydrite and contorted bedding	134
Gypsum dunes	136
The ranns of Kutch	136
CHAPTER 8. SUBSURFACE RECOGNITION OF DESERT SEDIMENTS	141
General	141
Sun-dried sediment	141

Evaporite environment	142
Recognition of dune sands in cores	143
Difficulties of deducing palaeo-wind directions from cores	150
A three-dimensional model of barchan bedding	150
Palaeo-wind direction deduced from core of barchan dune	152
Cores from seif dunes	153
Permeability in dune sands	156
Drill cuttings	156
Bedding and sorting in dune sands	157
Thin sections of carbonate dune sands	159
Dolomitised carbonate dune sands	159
Dune sand and roundness of quartz grains	165
Frosting of quartz grains in a desert	165
Frosting and calcite corrosion of quartz grains	166
Frost-free conchoidal fractures on desert quartz sand and relict desert soils	167
Dune sand from deflation to top of dune	167
Possible preservation of environmental history on a quartz grain	170
The significance of red-stained quartz grains	172
 CHAPTER 9. THE RELATION BETWEEN RED BEDS AND DESERTS	 173
Introduction	173
Hot, wet tropical origin for red sediments	173
Red sediments in tropical climate having seasonal rainfall	177
In-situ formation of red beds	179
Are red beds red throughout?	180
The "Barren Red Measures"	181
Recent desert sands	183
Permian red beds of Britain	185
The apparent anomaly of yellow ancient dune sands	188
The necessity for water in the formation of red desert sediments	190
Criteria for the recognition of a desert palaeoclimate	191
Conclusions	193
