PREFACE AND ACKNOWLEDGEMENTS	ix
1 THE PHYSICAL BACKGROUND TO SEDIMENTATION	17
1.1 Physical system	17
1.2 Description of the system	19
1.3 Representation of fluid motion	22
1.4 Forces acting on fluids	26
1.5 Laminar and turbulent flow	33
1.6 Boundary layers	36
1.7 Separation of flow	40
1.8 Turbulence in boundary layers and separated flows	43
1.9 Fluid drag	45
1.10 Entrainment of sediment	49
1.11 Sediment transport	52
1.12 Some special features of loose granular solids	57
1.13 A note on hydrodynamic stability	61
Readings for Chapter 1	65
2 SOME SEDIMENTARY STRUCTURES, AND A NOTE ON TEXTURE AND FABRIC	66
2.1 General	66
2.2 Classification of structures	66
2.3 Parting lineations	67
2.4 Sand ribbons	68
2.5 Ripples and dunes in water	70
2.6 Antidunes	81
2.7 Flute marks	82
2.8 Load casts and sandstone balls	85
2.9 Sediment sorting	87
2.10 Sediment fabric	89
Readings for Chapter 2	90
3 WINDS AND THEIR DEPOSITS	92
3.1 General	92
3.2 Main environments of wind action	92

3.3	Entrainment and transport of sediment by wind	96
3.4	Textural features of wind deposits	103
3.5	Desert dunes and sand seas	104
3.6	Coastal dunes	110
3.7	Internal structure of dunes	112
3.8	Ancient wind deposits	114
	Readings for Chapter 3	116
<b>4</b>	<b>RIVER FLOW AND ALLUVIUM</b>	<b>118</b>
4.1	General	118
4.2	River networks and hydraulic geometry	119
4.3	Channel flow and sediment transport	122
4.4	Channel form and process	128
4.5	Flood-plain form and process	136
4.6	Deposits of braided and meandering streams	140
4.7	Alluvial fans and their deposits	143
4.8	Ancient alluvial sediments	145
	Readings for Chapter 4	146
<b>5</b>	<b>WAVES, TIDES, AND OCEANIC CIRCULATIONS:</b>	
	<b>SHALLOW-MARINE DEPOSITS</b>	<b>149</b>
5.1	General	149
5.2	Wave theory	150
5.3	Tidal theory	161
5.4	Oceanic circulations	166
5.5	Sedimentation on open shelves	167
5.6	Sedimentation in shallow partly enclosed seas	174
5.7	Sedimentation in estuaries and tidal flats	177
5.8	Ancient shallow-marine deposits	183
	Readings for Chapter 5	185
<b>6</b>	<b>TURBIDITY CURRENTS AND TURBIDITES</b>	<b>188</b>
6.1	General	188
6.2	Motion of the head of a gravity current	189
6.3	Motion of a steady uniform gravity current	192
6.4	Deposition from experimental turbidity currents	193
6.5	Initiation and decay of turbidity currents in recent times	195
6.6	Ancient turbidites	203
	Readings for Chapter 6	208

<b>CONTENTS</b>	<b>XV</b>
<b>7 GLACIERS AND GLACIAL DEPOSITS</b>	<b>211</b>
7.1 General	211
7.2 Some physical properties of ice	213
7.3 Glacier types	214
7.4 Glacier regime and flow	217
7.5 Glacial erosion	223
7.6 Glacial deposits	227
7.7 Ancient glacial sediments	233
Readings for Chapter 7	234
<b>APPENDIX I. PHYSICAL QUANTITIES AND THEIR DIMENSIONS</b>	<b>237</b>
<b>APPENDIX II. CLASSIFICATION OF SEDIMENTARY STRUCTURES</b>	<b>238</b>
<b>APPENDIX III. MATHEMATICAL SIGNS AND ABBREVIATED FORMS</b>	<b>239</b>
<b>INDEX</b>	<b>240</b>
