

## CONTENTS

|   |          |
|---|----------|
| <b>Chapter I. INTRODUCTION . . . . .</b>                        | <b>1</b> |
| 1. Choice of Information . . . . .                              | 3        |
| 2. Chemical Coordinates for Clay Mineral Assemblages . . . . .  | 4        |
| 3. Clay Mineral Names and Structures . . . . .                  | 7        |
| 4. Chemical Systems . . . . .                                   | 12       |
| 5. Chemical Potential; Inert and Mobile Components . . . . .    | 14       |
| 6. Stability and Meta-Stability . . . . .                       | 15       |
| 7. Sedimentation and Burial . . . . .                           | 19       |
| Summary . . . . .   | 23       |
| <br><b>Chapter II. MINERALS AND MINERAL GROUPS . . . . .</b>    | <br>25   |
| 1. Silica . . . . .   | 25       |
| (a) Weathering . . . . .  | 27       |
| (b) Sedimentary Environment . . . . .                           | 27       |
| (c) Sedimentary Rocks . . . . .                                 | 27       |
| (d) Hydrothermal Alterations . . . . .                          | 28       |
| Summary . . . . .   | 28       |
| 2. Kaolinite, Pyrophyllite, Gibbsite and Talc . . . . .         | 30       |
| (a) Chemoigraphic Character of Kaolinite and Gibbsite . . . . . | 32       |
| (b) 2:1 Structures . . . . .                                    | 33       |
| Conclusions . . . . .   | 34       |
| 3. Potassic Micas and Mica-like Minerals . . . . .              | 34       |
| (a) Illite . . . . .  | 35       |
| (1) Polymorphs . . . . .  | 38       |
| (2) Synthesis of Phenogites and "Illites" . . . . .             | 39       |
| a — Phenogite, 39; b — Illite, 42                               |          |
| (3) Natural Illite Compositions . . . . .                       | 43       |

|  |     |
|--|-----|
| <b>(b) Celadonites and Glauconites . . . . .</b>   | 45  |
| (1) Synthesis . . . . .  | 46  |
| (2) Sedimentary Glauconites (pelletal). . . . .  | 48  |
| (3) Thermodynamic Description of the Formation of Sedimentary Glauconite Pellets. . . . .                                  | 49  |
| <b>(c) Celadonites, Glauconites and Illites as a Compositional Series . . . . .</b>  | 51  |
| <b>(d) Phase Diagram for the Illite-Glaucnrite Mixed Layered Minerals . . . . .</b>  | 54  |
| <b>Summary . . . . .</b>   | 59  |
| <b>4. Montmorillonites . . . . .</b>   | 60  |
| (a) Montmorillonite Solid Solutions . . . . .  | 60  |
| (b) Montmorillonite Occurrences in Nature . . . . .  | 64  |
| (1) Weathering . . . . .   | 65  |
| (2) Sediments . . . . .  | 68  |
| (3) Sedimentary rocks . . . . .  | 69  |
| (4) Hydrothermal Alteration . . . . .  | 70  |
| (5) Volcanic Rocks . . . . .   | 70  |
| (c) Triacontahedral Expanding Minerals . . . . .   | 71  |
| (1) Studies in Synthetic Systems . . . . .   | 71  |
| (2) Relative Stabilities of Synthetic Triacontahedral Montmorillonites . . . . .   | 72  |
| (3) Chemical Composition of Natural Triacontahedral Montmorillonites . . . . .   | 73  |
| (4) Experiments on Natural Vermiculites . . . . .  | 74  |
| (d) Dioctahedral Montmorillonites . . . . .  | 75  |
| (1) Synthetic Dioctahedral Montmorillonites . . . . .  | 75  |
| (2) Experiments on Natural Dioctahedral Montmorillonites and Mixed Layered Minerals . . . . .                              | 77  |
| (e) Summary of the Information from Experimental Studies . . . . .   | 79  |
| (f) Chemical Composition of Natural Fully Expandable and Interlayered Dioctahedral Minerals . . . . .                      | 81  |
| (g) Phase Diagrams for Dioctahedral Montmorillonites . . . . .   | 84  |
| <b>Summary . . . . .</b>   | 89  |
| <b>5. Illite, Montmorillonite and Mixed Layered Minerals in Sequences of Buried Rocks (P-T Space) . . . . .</b>            | 90  |
| <b>Summary . . . . .</b>   | 100 |
| <b>6. Chlorites. . . . .</b>   | 100 |
| (a) Natural Occurrences . . . . .  | 101 |
| (1) Weathering . . . . .   | 101 |
| (2) Sedimentation . . . . .  | 101 |
| (3) Sedimentary 7 Å Chlorites . . . . .  | 102 |
| (4) Sedimentary Rocks . . . . .  | 104 |
| (b) Experimental Studies on Magnesian Chlorites. . . . .   | 104 |
| (c) Chlorite Chemistry and Iron-magnesium Distribution among Phyllosilicates . . . . .                                     | 107 |
| (d) Composition of Some Natural Chlorites Formed in Various Physical Environments in Pelitic Clay Mineral Suites . . . . . | 108 |
| <b>Summary . . . . .</b>   | 111 |
| <b>7. Corrensite. . . . .</b>  | 112 |
| <b>8. Zeolites . . . . .</b>   | 116 |

|   |     |
|---|-----|
| (a) Natural Occurrences . . . . .   | 117 |
| (1) Weathering . . . . .  | 117 |
| (2) Sedimentation (Continental, Shallow Marine) . . . . .   | 117 |
| (3) Deep Sea Sediments . . . . .  | 118 |
| (4) Sedimentary Rocks . . . . .   | 118 |
| (5) Summary of Natural Occurrences . . . . .  | 119 |
| (b) Zeolite Synthesis and Stability . . . . .   | 120 |
| (c) Chemiographic Analysis . . . . .  | 121 |
| (1) Zeolite Compositions . . . . .  | 121 |
| (2) Phase Diagrams for Zeolite-Clay Mineral Systems . . . . .   | 122 |
| a — Alkali zeolites, 123; b — Phase relations concerning zeolites and<br>aluminous clay minerals, 128 |     |
| (d) Systems with Variable Chemical Activities. . . . .  | 133 |
| Conclusions . . . . .   | 139 |
| <br>9. Sepiolite-Palygorskite . . . . .   | 140 |
| (a) Chemical Composition . . . . .  | 141 |
| (b) Experimental Studies (solution equilibria) . . . . .  | 142 |
| (c) Phase Diagrams (closed system) . . . . .  | 145 |
| (d) Sepiolite-Palygorskite Equilibria in Saline Lakes and Basins . . . . .                            | 149 |
| (e) Weathering Profiles . . . . .   | 152 |
| (f) Deep Sea Cores . . . . .  | 155 |
| Summary . . . . .   | 155 |
| <br>10. Organic Material in Sedimentary Rock Sequences. . . . .                                       | 156 |
| Summary . . . . .   | 161 |
| <br>Chapter III. GENERAL PHASE DIAGRAMS FOR ALUMINOUS CLAY MINERAL<br>ASSEMBLAGES . . . . .           | 163 |
| <br>1. Introduction . . . . .   | 163 |
| <br>2. Surface Conditions . . . . .   | 163 |
| (a) Composition Diagram . . . . .   | 164 |
| (b) Composition-Activity Diagram . . . . .  | 166 |
| (c) Activity-Activity Diagrams . . . . .  | 166 |
| <br>3. Temperature-Composition Diagrams . . . . .   | 169 |
| <br>4. Phase Relations in Pelitic Rocks; Composition Diagrams . . . . .                               | 171 |
| <br>5. Hydrothermal Alteration . . . . .  | 175 |
| <br>6. General Statements. . . . .  | 177 |
| (a) Weathering . . . . .  | 177 |
| (b) Sedimentation . . . . .   | 177 |
| (c) Shallow Burial . . . . .  | 177 |
| (d) Metamorphism and Diagenesis: P-T Space . . . . .  | 178 |
| (e) Cation Exchange. . . . .  | 184 |
| <br>7. Conclusion . . . . .   | 185 |
| <br>REFERENCES . . . . .  | 187 |
| <br>INDEX . . . . .   | 213 |
