PREFACE	V
<i>Chapter 1. INTRODUCTION</i>	1
References	3
<i>Chapter 2. METHODS OF INVESTIGATIONS</i>	5
2.1. X-ray diffraction analysis	6
2.2. Atomic absorption spectroscopy	6
2.3. Electron-optical methods	9
References	12
<i>Chapter 3. GEOLOGICAL FEATURES AND MINERALOGICAL STUDIES OF MAJOR BENTONITE OCCURRENCES</i>	13
3.1. Bentonites in the United States of America	13
Black Hills region	14
Rocky Mountain and California areas	23
Gulf Coast area	31
Other areas	37
References	40
3.2. Bentonites in the Western Hemisphere (excluding those in the U.S.A.)	41
Argentina	41
Brazil	49
Canada	51
Colombia	53
Cuba	53
Equador	53
Jamaica	53
Mexico	54
Peru	57
Puerto Rico	57
Uruguay	58
References	58
3.3. Bentonites in Africa	60
Algeria and Morocco	60
Union of South Africa	67
Mozambique (Portuguese East Africa)	71
Egypt	74
Kenya and Tanganyika	74
Sudan Republic	74
Southwest Africa	74
References	75
3.4. Bentonites in European and eastern Mediterranean countries	75
Austria	75
Bulgaria	76
Cyprus	76

VIII

Czechoslovakia	77
England	77
Denmark	83
Faroe Islands (Denmark)	84
Federal Republic of Germany	84
France	86
Greece	88
Hungary	89
Israel	90
Italy	91
Poland	94
Portugal	94
Rumania	95
Spain and Spanish Morocco	95
Switzerland	98
Turkey	99
Yugoslavia	100
References	101
3.5. Bentonites in U.S.S.R., Asia, and the Southwest Pacific	106
Australia	106
Burma	107
China	107
India	108
Indonesia	109
Iran	109
Iraq	109
Japan	111
Korea	115
New Zealand	115
Pakistan	118
Philippines	119
U.S.S.R.	119
References	123
3.6. Origin of Bentonites	126
Alteration of volcanic ash or tuff essentially in situ	127
Hydrothermal alteration generally of igneous rocks	131
Deuteric alteration of igneous material	133
Miscellaneous and uncertain modes of origin	133
References	135
3.7. Crystal growth aspects of smectite morphology	137
Factors affecting smectite morphology	138
Crystal-growth mechanisms	141
References	142
3.8. Chemical variations in the montmorillonite—beidellite series	143
Description of the chemical data in the literature	143
Methods for calculating structure formulae for the dioctahedral smectites	149
Factor analysis of the chemical data	151
References	154
3.9. Summary of geology and mineralogy of bentonites	155
Geological features of bentonites	155
Mineralogical features of bentonites	158

Chapter 4. SELECTED AREA ELECTRON DIFFRACTION STUDIES ON MUSCOVITE, BEIDELLITE, AND MONTMORILLONITE	161
4.1. Interference function	161
Properties of the interference function for undeformed lattices	161
Properties of the interference function for bent lattices	168
Spherically bent lattice	169
Cylindrically bent lattice	171
Diffraction effects of bending on the single crystal reflections	172
hk reflections from spherically bent crystal	173
hk reflections from cylindrically bent crystal	174
Effects of bending on $00l$ reflections	176
The parameters of bending	177
4.2. Selected area electron diffraction on muscovite	178
Lattice properties of micas	179
Properties of the Ewald sphere for electron diffraction	180
Finite thickness of crystal	181
Orientation of the crystal: tilt and bending	183
Objective lens properties	183
Comparison between experimental and theoretical intensity variations of SAD patterns of $2M_1$ muscovite	185
Discrepancies between SAD symmetry and crystal symmetry	191
4.3. Crystal structure of beidellite	191
Structural models for beidellite with different octahedral configurations	193
SAD patterns of beidellite crystals with multiple layers in thickness	196
4.4. Crystal structure of montmorillonite	203
Previous studies	203
Characteristic features of the SAD spot patterns from montmorillonite crystallites	205
Interpretation of the SAD patterns and conclusions	213
References	214
Chapter 5. PROPERTIES AND USES OF BENTONITE	217
5.1. General statement	217
5.2. Properties related to ceramics	218
Plasticity	218
Green strength	219
Drying shrinkage	220
Dry strength	220
Firing properties	221
General statement	222
5.3. Properties related to uses in foundry molding sands	222
Green compression strength	222
Dry compression strength	224
Hot strength	225
Flowability	226
Permeability	226
General comments	227
5.4. Properties related to uses in the Petroleum industry	227
Drilling fluids	227
Catalysts	229
Decolorization	231
Other uses	232

5.5. Miscellaneous uses of bentonites	232
Adhesives	232
Animal bedding	232
Atomic (radioactive) waste disposal	233
Cement, mortar, and aggregates	233
Clarification of wines, cider, beer, etc.	233
Emulsifying, suspending, and stabilizing agents	233
Fabrics	234
Floor absorbents	234
Food	234
Greases	234
Ink	234
Medicines, pharmaceuticals, and cosmetics	234
Paint	235
Paper	235
Pelletizing ores, fluxes, fuels, etc.	235
Pesticides	236
Rubber	236
Smectite-organic complexes	236
Soaps, cleaning, and polishing compounds	237
Water clarification	237
Water impedance	237
5.6. Properties related to engineering applications	237
Plasticity	238
Activity	238
Water sorption	240
Unconfined compression strength	240
Shear strength	240
Sensitivity	242
Permeability	242
Frost heaving	242
Compressibility and consolidation	243
Soil stabilization	245
5.7. Properties related to agricultural use	245
References	246
INDEX	249
