

CONTENTS

CHAPTER 1 THE GEOLOGICAL FRAMEWORK OF CONTINENTAL RED BEDS	1
INTRODUCTION	1
GEOSYNCLINES	2
Pre-orogenic phase	4
Pre-flysch	4
Flysch	6
Molasse	6
PLATE TECTONICS AND SEDIMENTATION	6
Divergent plate margins	7
Intracontinental rifts and aulacogens	7
Intercontinental rifting	9
Convergent plate margins	13
Forearc areas	13
The magmatic arc	14
Back-arc areas	15
Transform faults	16
Continental collision	21
THE TECTONIC SETTING OF ANCIENT CONTINENTAL RED BEDS	26
Introduction	26
Proterozoic red beds of western Canada	26
The Caledonian orogen	29
Early Mesozoic red beds formed in graben associated with the opening of the Atlantic Ocean	35
Cenozoic molasse	39
The Alpine molasse	40
The molasse of the Canadian cordillera	44
THE CLIMATIC SETTING OF ANCIENT CONTINENTAL RED BEDS	50
The significance of first-cycle arkosic red beds	51
The significance of size-composition trends	55
THE CLASSIFICATION OF ANCIENT CONTINENTAL RED BEDS	60
Introduction and previous classifications	60
Reddening and depositional environment	63
Palaeomagnetic classification of continental red beds	64
A practical classification of continental red beds	66
CHAPTER 2 DESERT RED BEDS	69
INTRODUCTION	69
MODERN DESERT SEDIMENTS	69
DESERT FLUVIAL SEDIMENTS	71
AEOLIAN SAND DEPOSITS	72
Ripples	74
Dunes and draas	77
Barchans	78
Seifs	80
Transverse forms	82
Parabolic dunes	84
Rhourds	84
The internal structure of modern and ancient aeolian deposits	85

X

The textural characteristics of aeolian sands	88
Grain size	89
Roundness and frosting	91
DESERT LAKES AND INLAND SABKHAS	95
THE REDDENING OF DESERT SEDIMENTS	96
Introduction	96
The detrital model - Simpson Desert, Australia	100
The diagenetic model - Sonoran Desert	102
Early diagenetic reddening	104
Late diagenetic reddening	104
ANCIENT AEOLIAN RED BEDS	105
Introduction	105
Distinguishing aeolian from shallow marine sandstones	107
The Lower Permian of NW Europe	108
Marginal fanglomerates and wadi deposits	111
Aeolian sands	113
Desert lake and sabkha deposits	114
Diagenesis and reddening of the Rotliegendes	116
Mechanical infiltration of clay	117
Authigenic quartz, feldspar and clay minerals	120
Carbonate and sulphate cements	122
CONCLUSIONS AND FURTHER READING	125
 CHAPTER 3 DELTA PLAIN RED BEDS	 126
INTRODUCTION	126
DELTA MODELS	127
DELTAIC FACIES ASSOCIATIONS	131
The delta plain	132
River-dominated delta plains	132
Fluvial distributary channels	132
Interdistributary environments	134
Swamps	137
Lacustrine and lacustrine delta-fill deposits	138
Tide-dominated delta plains	138
Tidal distributary channels	139
Interdistributary areas	139
The delta front	139
DELTA GROWTH AND ABANDONMENT	146
ANCIENT DELTAIC SUCCESSIONS	147
RED BEDS IN ANCIENT DELTA PLAINS	150
Introduction	150
The Difunta Group of northeastern Mexico	153
The delta plain facies	155
Colour variations and mineralogy	156
The origin of the delta plain red beds	158
Carboniferous red beds in Europe and North America	159
Introduction	159
Secondary post-diagenetic reddening beneath the sub-Permian unconformity	160
Red beds of the Upper Coal Measures of the UK	163
A. South Wales	164
B. The Blackband and Etruria Marl Groups of North Staffordshire	168
Upper Carboniferous red beds at Joggins, Nova Scotia	175
CONCLUSIONS AND FURTHER READING	178

CHAPTER 4 ALLUVIAL RED BEDS	179
INTRODUCTION	179
RIVER CHANNELS	180
ALLUVIAL FANS	182
Alluvial fan deposits	183
Debris flow deposits	184
Sheet flood deposits	185
Stream channel deposits	185
Sieve deposits	185
PEBBLY BRAIDED RIVERS	185
Longitudinal bars	186
Bars in curved channel reaches	188
Sedimentary organization of pebbly alluvium on a large scale	189
SANDY LOW-SINUOSITY RIVERS	190
EPHEMERAL STREAM CHANNELS	194
MEANDERING RIVERS	198
Introduction	198
Point bars	200
RIVER BANKS AND FLOODPLAINS	204
Bank deposits	204
Floodplains	207
Interfluvial areas	208
THE TRANSPORT OF IRON IN RECENT ALLUVIUM	213
ANCIENT ALLUVIAL RED BEDS	220
The Old Red Sandstone	221
Internal facies - reddened pebbly alluvium	222
The reddening of pebbly alluvium	230
External facies - reddened sandy and muddy alluvium	233
A. Coarse members	233
B. Fine members	237
The reddening of sandy and muddy alluvium	244
A. Fine member reddening	246
B. Coarse member reddening	250
The Lower Triassic red beds of NW Europe	253
Upper Cretaceous red beds of the southern Bohemian Basins	259
CONCLUSIONS AND FURTHER READING	264
CHAPTER 5 THE DIAGENESIS OF CONTINENTAL RED BEDS	265
INTRODUCTION	265
SANDSTONE DIAGENESIS	265
The composition of natural waters and early diagenetic reactions	267
Cementation	269
Mineral transformation and replacement	272
Textural changes during diagenesis	273
Red bed diagenesis	274
THE MECHANICAL INFILTRATION OF DETRITAL CLAY	275
Cenozoic alluvium of southwestern USA and northwestern Mexico	275
Mechanically infiltrated clay in ancient red beds	280
DISSOLUTION OF FRAMEWORK SILICATES	280
Feldspars	282
Micas	284

XII

Ferromagnesian minerals	291
CLAY REPLACEMENT	293
AUTHIGENIC MINERALS	299
Potassium feldspar	299
Zeolites	302
Clay minerals	308
Illite-montmorillonite	308
Illite	309
Kaolinite-dickite	309
Chlorite	313
Calcite	314
Haematite and precursor oxides	316
Quartz	319
STAGES IN THE DIAGENESIS OF CONTINENTAL RED BEDS	319
 CHAPTER 6 THE MINERALOGY AND GEOCHEMISTRY OF IRON OXIDES IN RED BEDS	323
IRON OXIDE MINERALS	323
The titanomagnetites-titanomaghemites	323
The haematite-ilmenite series	326
Ferric oxyhydroxides	329
OPAQUE OXIDES IN RED BEDS	330
Titanomagnetite	330
Haematite-ilmenite	333
PRECIPITATION AND STABILITY OF FERRIC OXYHYDROXIDES	338
The dehydration of ferric oxyhydroxides	340
ENVIRONMENTAL CONTROLS ON THE PRECIPITATION AND DIAGENETIC HISTORY OF FERRIC OXYHYDROXIDES	344
Marine conditions	345
An ancient example: The Catskill clastic wedge	348
Lacustrine conditions	351
An ancient example: The Orcadian Basin	359
POST-DEPOSITIONAL INFLUENCE OF GROUNDWATER ON THE MINERALOGY AND GEOCHEMISTRY OF RED BEDS	365
Reddening by groundwater	365
Secondary reduction zones	367
IRON CONTENT OF ANCIENT RED BEDS	376
CONCLUSIONS AND FURTHER READING	379
 CHAPTER 7 THE MAGNETIZATION OF CONTINENTAL RED BEDS	380
INTRODUCTION	380
Palaeomagnetism and rock magnetism	380
The physical basis of magnetism	382
Hysteresis	384
Anisotropy, magnetic domains and the time dependence of magnetization	384
MINERAL MAGNETISM	388
The titanomagnetites and titanomaghemites	389
Haematite	390
Grain size effects	394
The relative stability of spin canted and defect moments	398
MAGNETIZATION PROCESSES IN SEDIMENTS	403
Detrital remanent magnetization	403
The occurrence of DRM in nature	408

Chemical remanent magnetization	411
CRM of the goethite - haematite transition	413
THE MAGNETIC PROPERTIES OF CONTINENTAL RED BEDS	417
Induced magnetization (J_i -H) and isothermal remanence (IRM) curves	418
J_i -T analysis	424
The NRM of red beds	427
Chemical demagnetization	429
Comparative thermal demagnetization of pigment, specularite and rock	434
 CHAPTER 8 THE PALAEOMAGNETISM OF CONTINENTAL RED BEDS	 440
INTRODUCTION	440
PROTEROZOIC BASINS OF WESTERN CANADA	441
The Martin Formation	443
The Christie Bay Group	446
THE LATE PRECAMBRIAN OF NORTH WEST SCOTLAND	453
THE OLD RED SANDSTONE	460
The Anglo-Welsh Basin	460
The Orcadian Basin	463
TRIASSIC RED BEDS OF THE WESTERN USA	468
The Moenkopi Formation	469
LATE CENOZOIC RED BEDS OF BAJA CALIFORNIA	475
THE RELATIONSHIP BETWEEN DIAGENESIS AND PALAEOMAGNETISM IN CONTINENTAL RED BEDS	481
Models of remanence acquisition	481
The palaeomagnetic evolution of red beds	484
Type A red beds	485
Type B red beds	487
Type C red beds	488
REFERENCES	493
SUBJECT INDEX	537
