

## Contents

<b>Preface .....</b>	vii
<b>Introduction .....</b>	1
<b>CHAPTER 1</b>	
<b>Components of verbal communication .....</b>	7
Implicit and explicit memory .....	7
Pragmatics .....	15
Motivation and affect .....	24
The Activation Threshold Hypothesis .....	28
Conclusion .....	30
<b>CHAPTER 2</b>	
<b>Implicit and explicit language processes .....</b>	33
The nature of implicit rules .....	33
Knowledge is not automatic and competence is not controlled .....	38
The role of metalinguistic knowledge in L2 language acquisition .....	50
The role of implicit/explicit memory in bilingual aphasia and amnesia..	53
The fundamental import of implicit/explicit memory for the study of bilingualism .....	57
The critical period hypothesis .....	59
Conclusion .....	61
<b>CHAPTER 3</b>	
<b>Bilingual aphasia .....</b>	63
Recovery patterns .....	63
Attempted explanations .....	68
The assessment of bilingual aphasia .....	70
Implications of implicit/explicit memory dissociation for bilingual aphasia .....	87
The contribution of bilingual aphasia research .....	88
Implications for rehabilitation .....	88
Conclusion .....	94

## CONTENTS

**CHAPTER 4**

<b>Cerebral lateralization and localization . . . . .</b>	<b>97</b>
Differential lateralization . . . . .	97
Differential localization . . . . .	109
Conclusion . . . . .	116

**CHAPTER 5**

<b>Neurofunctional modularity . . . . .</b>	<b>119</b>
Characteristics of neurofunctional modules . . . . .	119
Neurofunctional subsystems . . . . .	130
Evidence of modularity . . . . .	138
Cognition: The subsystems Hypothesis generalized . . . . .	143
The human organ analogy . . . . .	148
Conclusion . . . . .	150

**CHAPTER 6**

<b>Neuroimaging studies of the bilingual brain . . . . .</b>	<b>153</b>
What do neuroimaging studies of language evidence?	
How do we know? . . . . .	153
The problems with neuroimaging studies . . . . .	158
The need for a neurolinguistically informed theory . . . . .	166
Results cannot be generalized from single words to “language” . . . . .	173
Looking for converging evidence . . . . .	180
Conclusions . . . . .	183

**CHAPTER 7**

<b>An integrated perspective on bilingualism . . . . .</b>	<b>187</b>
What is represented vs. how it is organized and processed . . . . .	187
Neurofunctional modularity . . . . .	191
Language and thought in bilinguals . . . . .	192
The Direct Access Hypothesis . . . . .	203
The Subsystems Hypothesis . . . . .	210
The integration of pragmatics . . . . .	219
The integration of conscious and unconscious processing . . . . .	222
The integration of motivation and affect . . . . .	223
The integration of the various hypothetical constructs . . . . .	223
Basic principles of an integrated neurolinguistic theory of bilingualism .	224
Conclusion . . . . .	226

<b>Glossary . . . . .</b>	<b>233</b>
<b>References . . . . .</b>	<b>249</b>
<b>Subject Index . . . . .</b>	<b>295</b>
