The Authors	xvi
Preface	xvii
Acknowledgements	xix
1 Quaternary Environments: An Introduction	1
Prelude to the Quaternary	1
Quaternary glaciations	3
Quaternary sea-level changes	3
<i>Evidence from the oceans</i>	4
Rivers, lakes and groundwater	5
Evidence from the deserts	5
Evidence from terrestrial flora and fauna	6
Human origins, innovations and migrations	6
Atmospheric circulation during the Quaternary	6
Environmental changes: past, present, future	7
Quaternary chronology	7
Reconstructing Quaternary environments	9
Quaternary environmental analogues	12
Practical relevance of Quaternary research	13
Further reading	13
2 Prelude to the Quaternary	15
Introduction	15
The lithospheric plates and their motion	15
Tectonic control of the oceans and continents	17
Effects of plate evolution on the atmosphere and oceans	19
Global cooling and growth of the Antarctic ice cap	21
Onset of Ice Age conditions in the Quaternary	22
Possible causes of Quaternary instability	24
Conclusions	27
3 Quaternary Glaciations	29
Introduction	29
The cryosphere	29
The development of ideas about the Quaternary glaciations	33
Chronology	33
Evidence of glaciation	34
Quaternary cryosphere reconstruction	37
Dating cryosphere growth and retreat	49
Ice-core records	52
Holocene glacier records	58

	Causes of ice-sheet growth and decay	60
	Insights from global climate models	66
	Pattern of glacial–interglacial cycles	66
4	Quaternary Sea-Level Changes	69
	Introduction	69
	Causes of sea-level fluctuation	72
	The timing of sea-level fluctuations	75
	Land bridges: a product of Quaternary low sea levels	80
	Verifying the sea-level record from ice-volume studies	82
	Recent and historic changes in sea level	83
5	Evidence from the Oceans	85
	Introduction	85
	Properties of sea water and of the different water masses	86
	Microfossils as tools for palaeoenvironmental reconstruction	92
	Oxygen isotopes	94
	Transfer functions	98
	Cadmium, barium and germanium analyses	100
	Aeolian dust and pollen	102
	Ice-rafted material	103
	The Atlantic and its significance	103
6	Rivers, Lakes and Groundwater	105
	Introduction	105
	Rivers of the present day	106
	Characteristics of some contemporary rivers	107
	Factors influencing river environments during the Quaternary	108
	Examples of Quaternary riverine environmental change	110
	River metamorphosis and climatic change	118
	Evaluating river hydrology from palaeochannel evidence	119
	Lake morphology and origin	120
	Lake status	127
	Aquatic organisms	127
	Quaternary lacustrine records	129
	Lake histories	133
7	Evidence from the Deserts	138
	Introduction	138
	Present-day distribution of arid and semi-arid regions	139
	Causes of aridity	140
	The desert environment	142
	Late Cainozoic cooling and desiccation	144
	Quaternary glacial aridity	146
	Glacial and interglacial desert environments	147
	Correlating the terrestrial and marine records	153

8	Evidence from Terrestrial Flora and Fauna	156
	Introduction	156
	Pollen	157
	Fine-resolution palynology	173
	Microscopic charcoal	175
	Plant macrofossils	177
	Tree rings	178
	Vertebrates	182
	Invertebrates	184
	A global synthesis	184
	Further reading	199
9	Human Origins, Innovations and Migrations	202
	The Miocene hominids of Africa and Eurasia	202
	The Pliocene hominids of Africa	203
	<i>Homo habilis</i> : the first stone toolmaker	205
	Late Pliocene environmental changes	205
	Prehistoric meat-eating and butchery sites	206
	<i>Homo erectus</i> : fire and the Acheulian tradition	207
	Migration of <i>Homo erectus</i> from Africa to Eurasia	209
	From <i>Homo erectus</i> to <i>Homo sapiens</i>	211
	From Early Stone Age to Middle Stone Age	211
	Middle Stone Age ritual and art	212
	Late Stone Age diversity and migrations	214
	Pleistocene faunal extinctions	214
	Isotopic evidence of palaeo-diet	217
	Neolithic plant and animal domestication	218
	Further reading	221
10	Atmospheric Circulation during the Quaternary	223
	Introduction	223
	Present-day global atmospheric and oceanic circulation patterns	225
	Sea-surface temperatures during the last glacial maximum	225
	Atmospheric circulation patterns during the late Quaternary	231
	Global palaeohydrology and links between oceanic and atmospheric circulation	236
11	Environmental Changes: Past, Present, Future	239
	Introduction	239
	Agriculture and accelerated soil erosion	242
	Drought, overgrazing and desertification	243
	Irrigation and salinization	246
	Human effects on the atmosphere	247
	Conclusion	255

Appendix: Quaternary Dating Methods	256
Introduction	256
Radiocarbon dating	256
Thermoluminescence dating	261
ESR dating	264
Amino acid racemization	266
Uranium-series disequilibrium	268
Potassium-argon dating	272
Palaeomagnetism	276
Fission-track dating	280
Other dating methods	280
Bibliography	282
Index	322
