
• Contents

Preface **xv**

Acknowledgments **xlx**

1 • Accumulating Stratigraphic Data **1**

Surface Observations **2**

Subsurface Observations **6**

Remote Sensing **27**

Summary **29**

References **29**

2 • Sedimentary Textures, Mineralogies, and Structures **33**

Conglomerates and Sandstones **33**

Mudrocks **51**

Limestones 54

Dolostones 62

Summary 63

References 63

3 • Completeness of the Stratigraphic Record 67

Uniformitarianism 67

Distribution and Mass of Sedimentary Rocks 68

Rates of Sediment Accumulation 70

Evidences of Interruptions in Deposition 78

Summary 85

References 86

4 • Geologic Time and Correlation 89

Zones and Stages 90

Neogene Time Scale 95

Fossils and Isochroneity 95

Lithostratigraphic Correlation 98

Radiometric Dating 102

Strontium Isotopic Dating 104

Magnetostratigraphy 105

Fission-Track Dating 111

Seismic Stratigraphy and Eustatic Sea Level Changes 111

Summary 112

References 117

5 • Patterns in the Distribution of Organisms 121

Biogeography and Biostratigraphy 122

Faunal Character 124

Paleohypsometry and Paleobathymetry 133

Communities 140

Summary 142

References 142

6 • Evolution and Biostratigraphy 145

Biogeography and Evolution 146

Evolution—Speciation Through Time 150

Limits to Biostratigraphic Resolution 168

Biozones 176

Chronostratigraphic Significance of Biozones 179

Tests of Chronostratigraphic Significance 188

Quantitative Methods 188

Conclusions 189

Summary 190

References 190

7 • Depositional Environments and Facies I: Continental Environments 195

Walther's Law 196

Facies in Modern Environments 197

Alluvial Fans 198

Braided Stream Deposits 202

Meandering Stream Deposits 206

Eolian Deposits 209

Lacustrine Deposits 213

Swamps 217

Glacial Deposits 218

Paleosols 222

Summary 230

References 231

**8 • Depositional Environments and Facies II:
Transitional Environments 237****Deltaic Environments 237****Nondeltaic Coastlines 252****Summary 266****References 267**

**9 • Depositional Environments and Facies III:
Marine Environments 269****Terrigenous Shelf Sediments 270****Continental Slope Sediments 278****Deep-Sea Fans 279****Abyssal Sediments 283****Carbonate Shelf Sediments 294****Evaporite Sediments 308****Summary 312****References 313**

10 • Lithostratigraphy 319**Flysch 321****Molasse 322****Intracratonic Tectonic Arkose Lithofacies 324****Cratonic Lithofacies 327****Black Shales 328****Bentonites 334****Cyclic Sequences 340****Summary 352****References 352**

11 • Physical Framework for Stratigraphic Analysis 357

- Crustal Geotectonics **357**
- Plate-Associated Basins **360**
- Marginal Rift Basins **375**
- Intracontinental Basins **390**
- Summary **395**
- References **396**

12 • Economic Stratigraphy I: Primary Deposits 399

- Types of Occurrences **400**
 - Building Stone **400**
 - Sand and Gravel **402**
 - Placer Deposits **403**
 - Bentonite **409**
 - Kaolinite **411**
 - Aluminous (Bauxitic) and Ferruginous Laterite **412**
 - Diatomite **413**
 - Evaporites **415**
 - Phosphate Rock **420**
 - Bedded Iron Ore **423**
 - Manganese **428**
 - Coal **429**
 - Oil Shale **433**
- Summary **436**
- References **437**

13 • Economic Stratigraphy II: Deposits Formed by Secondary Mineralization 443

- Porosity **443**
- Permeability **444**

Groundwater 445

Petroleum and Natural Gas 451

Tar Sands 457

Uranium 459

Copper 465

Lead and Zinc 468

Sulfur 472

Summary 475

References 475

Subject Index 479

Author Index 505
