

Contents

<i>Preface</i>	v
<i>How volcanism affects the biostratigraphic record</i>	1
Martin G. Lockley	
<i>An early terrestrial biota preserved by Visean volcanicity in Scotland</i>	13
W.D.I. Rolfe, G. P. Durant, A. E. Fallick, A. J. Hall, D. J. Large, A. C. Scott, T. R. Smithson, and G. M. Walkden	
<i>Preservation, evolution, and extinction of plants in Lower Carboniferous volcanic sequences in Scotland</i>	25
Andrew C. Scott	
<i>The role of volcanism in K/T extinctions</i>	39
Alan Rice	
<i>Plant successions and interruptions in Miocene volcanic deposits, Pacific Northwest</i>	57
Ralph E. Taggart and Aureal T. Cross	
<i>Taphonomy and sedimentology of Arikaree (lower Miocene) fluvial, eolian, and lacustrine paleoenvironments, Nebraska and Wyoming; A paleobiota entombed in fine-grained volcaniclastic rocks</i>	69
Robert M. Hunt, Jr.	
<i>Evidence of flora and fauna in the gardens and cultivated land destroyed by Vesuvius in A.D. 79</i>	113
Wilhelmina F. Jashemski
