

CONTENTS

Preface ix

1. **Numerical Simulation Techniques for Modeling Advectively-Disturbed Thermal Regimes**
Leslie Smith, Craig Forster, and Allan Woodbury 1
2. **A Solution to the Inverse Problem of Coupled Hydrological and Thermal Regimes**
Kelin Wang, Po-Yu Shen and Alan E. Beck 7
3. **Use of Dimensional Analysis in the Study of Thermal Effects of Various Hydrogeological Regimes**
Garth van der Kamp and Stefan Bachu 23
4. **Temperatures, Fluid Flow and Heat Transfer Mechanisms in the Uinta Basin**
Sean D. Willett and David S. Chapman 29
5. **Hydrologic Constraints on the Thermal Evolution of the Rhine Graben**
Mark Person and Grant Garven 35
6. **Conductive and Convective Heat Flow Components in the Rheingraben and Implications for the Deep Permeability Distribution**
Christoph Clauser 59
7. **Numerical Thermohydraulic Modeling of Deep Groundwater Circulation in Crystalline Basement: An Example of Calibration**
Jean-Claude Griesser and Ladislaus Rybach 65
8. **Heat Flow in a Sedimentary Basin in Czechoslovakia: Evaluation of Data with Special Attention to Hydrogeology**
Vladimir Čermák 75
9. **Thermal Effect of Hydrogeology in Closed Basins**
Lajos Stegena 81
10. **Groundwater Flow and Geotemperature Pattern**
Ji-yang Wang and Liang-ping Xiong 87
11. **The Controversy Over the Significance of the Hydrodynamic Effect on Heat Flow in the Prairies Basin**
J. A. Majorowicz 101
12. **Simulation of the Hydrothermal System at Hirayu Hot Springs, Japan**
Kozo Yuhara, Yasuhiro Fujimitsu and Takashi Okabe 107
13. **Effects of Permeability Anisotropy and Throw on the Transmissivity in the Vicinity of a Fault**
D. Bernard, M. Danis and M. Quintard 119
14. **Fluid Flow in Crystalline Crust: Detecting Fractures by Temperature Logs**
Malcolm J. Drury 129
15. **Terrestrial Heat Flow Variations in the Northeastern Part of the State of Sao Paulo: A Case for Transport of Geothermal Heat by Interfracture Fluid Flows**
A. C. del Rey and V. M. Hamza 137
16. **Subsurface Conductive and Hydrogeological Related Thermal Effects in the Area of the Crustal Electrical Conductors of the Williston Basin**
J. A. Majorowicz, F. W. Jones and M. E. Ertman 149
17. **Mapping Thermally Driven Upflows by the Self-Potential Method**
T. Ishido, T. Kikuchi and M. Sugihara 151
