

Table of Contents

Shallow Marine Gas Hydrates: Dynamics of a Sensitive Methane Reservoir (OMEGA) <i>Bohrmann G., Abegg F., Amann H., Brückmann W., Drews M., Gust G., Hohnberg H.-J., Kipfstuhl J., Klauke I., Rehder G., Suess E., Wallmann K., Weinrebe W.</i>	4	-	19
Long-term Observatory for the Study of Control Mechanisms for the Formation and Destabilisation of Gas Hydrates (LOTUS) <i>Linke P., Abegg C., Eisenhauer A., Gubsch S., Gust G., Greinert J., Keir R., Liebetrau V., Luff R., Pfannkuche O., Sommer S., Spiess V., Wallmann K.</i>	20	-	39
Gas Hydrates: Occurrence, Stability, Transformation, Dynamics, and Biology in the Black Sea (GHOSTDABS) <i>Michaelis W., Seifert R., Blumenberg M., Pape T., Lüdmann T., Wong H.K., Konerding P., Zillmer M., Petersen J., Flüh E., Reitner J., Reimer A.</i>	40	-	57
Microbial Methane Turnover at Marine Methane Seeps (MUMM – SPI) <i>Treude T., Niemann H., Orcutt B., Joye S., Witte U., Jørgensen B. B., Boetius A.</i>	58	-	63
Microsensor Measurements in Gas Hydrate Bearing Sediments (MUMM – SPII) <i>De Beer D.</i>	64	-	67
Biomarker Signatures of the Anaerobic Oxidation of Methane (MUMM – SPIII) <i>Elvert M., Niemann N., Orcutt B., Jørgensen B.B.</i>	68	-	73
Distribution and Diversity of Microorganisms in Gas Hydrate Bearing Sediments (MUMM – SPIV) <i>Knittel K., Lösekann T., Amann R.</i>	74	-	79
Physiology of Microorganisms in Gas Hydrate Bearing and other Methane-Rich Marine Sediments (MUMM – SPV) <i>Krüger M., Nauhaus K., Meyerdierks A., Widdel F.</i>	80	-	85
High resolution imaging and physical properties of hydrate and gas-bearing sediments within the INGGAS project <i>Reston T.J., Bialas J., Breitzke M., Flueh E.R., Kläschen D., Klein G., Talukder A., Zillmer M.</i>	86	-	97

Table of Contents

An in-situ laboratory to study terrestrial, permafrost related gas hydrates (Mallik 2002) <i>Weber M., Bauer K., Kulenkampff J., Henniges J., Huenges E., Wiersberg T., Erzinger J., Löwner, R.</i>	98	-	117
Gas hydrate induced submarine slides - An engineering geological approach <i>Grupe B., Kreiter S., Feeser V., Hoffmann K., Becker H.J., Savidis S., Rackwitz F., Schupp J.</i>	118	-	133
Microstructure, thermodynamics, formation- and decomposition-kinetics of gas hydrates <i>Itoh H., Klapproth A., Goreshnik E., Techmer K., Kuhs W.F.</i>	134	-	137
New perspectives for the extraction of oceanic gas hydrates <i>Schultz H.J., Deerberg G., Fahlenkamp H.</i>	138	-	151
Experimental determination of the petrophysical and thermodynamic properties of gas hydrates and hydrate bearing sediments <i>Schicks J., Spangenberg E., Naumann R., Kulenkampff J., Erzinger J.</i>	152	-	165
GASHYDRATES – Paleoatmospheric archive Reconstruction of paleoclimatic changes in the source strength of potential methane sources using the methane isotopic signature in bubble enclosures in polar ice cores <i>Fischer H.</i>	166	-	169
Gas Hydrates in Hemipelagic Sediments – CONGO <i>Spieß V., Zühlsdorff L., Villinger H., Flueh E., Bialas J., Kasten S., Schneider R., Bohrmann G., Sahling H.</i>	170	-	185
Techniques and Instruments for Gas Hydrates Exploration and Research (TIGER) <i>Degenhardt A., Hanken T., Helmke J., Jaguttis J., Masson M., Poppen B.</i>	186	-	197
Detailed seismic study of a gas hydrate deposit at the convergent continental margin off Costa Rica – DEGAS <i>Müller C., Bönnemann C., Neben S.</i>	198	-	217
