Preface	ix
Preface to the First Edition	xi
Copyright Acknowledgments	xiii
Abbreviations and Symbols Used in the Text	xv
Chapter 1. An Introduction to Crystallography	1
Crystals	1
The Interfacial Angle	1
Crystal Symmetry	2
Crystal Systems	4
Unit Cells and Axial Ratios	6
Miller Indices	6
Crystal Forms	8
Crystal Zones	9
Crystal Habit	10
Cleavage, Fracture, and Parting	10
Twinned Crystals	10
Stereographic Projection	11
Chapter 2. The Polarizing Microscope	19
The Rotating Stage	19
The Polarizer and Analyzer	19
The Objectives	21
The Eyepiece (or Ocular)	22
Condenser System	22
Substage Diaphragm	23
Illumination System and Mirror	23
The Bertrand Lens	24
Upper Diaphragm	24

Accessory Plates	24
Centering the Microscope	24
Care of the Microscope	25
Chapter 3. Principles of Optical Mineralogy	26
Polarized Light	26
Isotropic and Anisotropic Minerals	28
Refractive Index and the Velocity of Light	29
Double Refraction and Birefringence	30
Isotropic Minerals in Crossed-Polarized Light	31
Anisotropic Minerals in Crossed-Polarized Light	31
Retardation and Interference Colors	32
Uniaxial and Biaxial Minerals	36
Interference Figures	43
Dispersion	50
Color and Pleochroism	52
Chapter 4. Flat-Stage Techniques—Thin Sections	54
Sample Preparation	54
Refractive Index Determination	56
Exercise in Estimating RI from Relief	57
Exercises in Movement Directions of Becke Lines	59
Determination of Birefringence	60
Exercises in Determining Birefringence	63
Fast and Slow Directions and the Use of Accessory	
Plates (Compensators)	65
Exercises Using Compensators	68
Interference Figures, Determination of Optic Sign, and	
the Measurement of $2V$	69
Exercises	78
Crystal Shape and Cleavage	81
Orientation Diagrams and Extinction Angles	82
Exercises	85
Color and Pleochroism	89
Exercises	89
Chapter 5. Flat-Stage Techniques—Grain Mounts	91
Sample Preparation	92
Refractive Index Determination	93
Determination of Birefringence	97
Crystal Shape, Cleavage, Extinction Angles, and	
Interference Figures	98
Color	98
Exercises with Crushed Grains	98

Chapter 6. Universal-Stage and Spindle-Stage Techniques	106
Universal-Stage Methods	107
Spindle-Stage Methods	117
Chapter 7. Routine Laboratory Procedures	126
Thin-Section Procedures	126
Loose- or Crushed-Grain Mount Procedures	129
Chapter 8. Determinative Tables	131
Table I List of Minerals in Order According to Lowest Refractive Index	132
Table II Minerals that Commonly Display Anomalous Interference Colors	137
Table III List of Minerals in Order According to Birefringence	138
Table IV Colored Minerals in Thin Section	142
Table V Isotropic Minerals in Order According to Refractive Index	144
Table VI Uniaxial Positive Minerals in Order According to Refractive Index	144
Table VII Uniaxial Negative Minerals in Order According to Refractive Index	145
Table VIII Biaxial Positive Minerals in Order According to Refractive Index	146
Table IX Biaxial Negative Minerals in Order According to Refractive Index	148
Table X Opaque Minerals	151
Chapter 9. Mineral Descriptions	152
A. Nesosilicates and Sorosilicates	153
B. Cyclosilicates	183
C. Inosilicates	188
D. Phyllosilicates	219
E. Tectosilicates	240
F. Volcanic Glass	275
G. Nonsilicates	277
References	307
Index	313
