

Contents

Preface xiii

Part One

Theoretical Considerations 1

1 Introduction to Mineralogy 2

- Matter and Its States 3
- The Crystalline State 4
- Minerals 5
- A Historical Perspective 7
- Concluding Remarks 8
- Suggested Readings 9

2 Symmetry 10

- Structure and Lattice 11
- Lattices 11
- Tiling a Plane 12
- Symmetry of a Lattice 13
- Identical Operations 16
- Handedness 16
 - Box 2.1 Defining Cell Symmetry 17
- Subsymmetries 17
- Space Lattices 18
 - Cells Based on a General Parallelogram 19
 - Cells Based on Rectangles and Diamonds 20
 - Cells Based on a Square 20
 - Cells Based on a 120° Rhombus 20
- Indexing 21
 - Notation for Lines 22
 - Notation for Planes 23
 - Zones 25
- Stereographic Projection 26
 - Using a Stereonet 28
 - An Example of Stereographic Projection 29

Point Groups 32

Box 2.2 An Introduction to Space Groups 36

Concluding Remarks 37

Suggested Readings 37

3 Crystallography 38

- Crystal Systems and Classes 39
 - Triclinic System 39
 - Monoclinic System 39
 - Orthorhombic System 39
 - Tetragonal System 39
 - Hexagonal System 39
 - Isometric System 40
- Interfacial Angles and Axial Ratios 40
 - Box 3.1 Axial Relations in the Six Crystal Systems 41
- Crystal Forms 43
 - Box 3.2 The Nomenclature of Forms 44
 - Types of Forms 45
 - Forms in the Isometric System 46
 - Positive and Negative Forms 46
 - Right and Left Forms 47
 - Combined Forms 48
- Real versus Ideal Crystals 49
- Concluding Remarks 51
- Suggested Readings 51

4 Fundamentals of Crystal Chemistry 52

- The Architecture of Atoms 53
 - Atoms 53
 - Nuclear Progression 53
 - The Electronic Cloud 53
 - Quantum States 54
 - Pauli Exclusion Principle 55

Periodic Classification of the Elements	55
Principles	55
The Periodic Table	56
Some Intrinsic Properties of Atoms	58
Valence	58
Shielding	59
Bonds and Bonding	60
Ionic Bonding	60
Covalent Bonding	61
Box 4.1 Another View of Bonding	62
Metallic Bonding	63
Spatial Distribution of Bonds	63
The Size and Shape of Atoms and Ions	66
Mineral Classification	69
Suggested Readings	72

5 Mineralogic Variations 73

Chemical Variations	74
Solid Solution	74
Box 5.1 Construction and Use of Triangular Composition Diagrams	76
Calculations Based on Mineral Chemistry	78
Exsolution	79
Isostructure and Isotype	81
Box 5.2 The Effect of Crystal Fields	82
Derivative Structures	82
Geometrical Variations	84
Polymorphism	84
Polytypism	86
Order-Disorder	86
Twinning	88
Concluding Remarks	94
Suggested Readings	94

6 Mineral Stability and Mineral Reactions 95

Physicochemical Equilibrium	96
Equilibrium in Mineralogic Systems	96
Thermodynamic Considerations	98
Fundamental Concepts	98
Energy Distribution	99
Mineralogic Reactions	100
The Phase Rule	104
One- and Two-Component Systems	104
Three-Component Systems	108
Mineral-Aqueous Systems	110
Mineral Assemblages	112
Concluding Remarks	113
Suggested Readings	114

7 Crystallization, Growth, and Habit 115

Energy Considerations	116
Nucleation	117

Crystal Growth	118
Secondary Nucleation	118
Dendritic Crystallization	122
Crystal Faces	123
Crystal Habit	124
Crystal Imperfection	125
Intergrowths	129
Concluding Remarks	129
Suggested Readings	129

8 Geological Framework for Mineral Study 131

Igneous Rocks	132
Magma and Its Products	132
Crystallization of Igneous Rocks	134
Classification of Igneous Rocks	137
Box 8.1 Estimating Volume Percent of Minerals by Point Counting	138
Weathering and Its Products	138
Sedimentary Rocks	140
Clastic Sediments	140
Precipitates	142
Metamorphism and Metamorphic Rocks	143
Types of Metamorphism	143
Classification of Metamorphic Rocks	144
Controls of Metamorphism	145
Box 8.2 A Method of Estimating Rock Chemistry	146
Economic Mineralogy	148
Magmatic Ore Deposits	150
Hydrothermal Ore Deposits	152
Sedimentary Ore Deposits	154
Weathering and Ore Deposition	154
Concluding Remarks	155
Suggested Readings	155

Part Two

Practical Mineralogy 157

9 The Physical Properties of Minerals 158

Identification of Minerals	159
Manner of Breaking	159
Hardness and Tenacity	161
Specific Gravity	164
Interrelationships of Physical Properties	166
Properties Dependent on Light	167
Light from Excited Atoms	169
Magnetic, Electrical, and Thermal Properties	170
Magnetic Properties	170
Electrical Properties	170
Thermal Properties	170

Concluding Remarks 173
Suggested Readings 173

Part Three

Mineral Descriptions 219

10 Interaction of Light and Matter 174

The Nature of Light 175
Refractive Index 175
The Optical Indicatrix 177
Dispersion and Absorption 178
Polarization of Light 179
Retardation and Color 181
Interference Figures 182
The Petrographic Microscope 183
Concluding Remarks 184
Suggested Readings 184

11 Mineral Analysis 186

Differential Thermal Analysis 187
Infrared Spectrometry 187
Neutron Activation Analysis 190
Nuclear Magnetic Resonance 191
Mössbauer Spectrometry 192
Mass Spectrometry 192
Polarography 193
Analysis Using Electromagnetic Radiation 193
 X-ray Fluorescence Spectrometry 194
 Electron Microscope and
 Electron Microprobe 196
 Optical Emission Spectrography 198
 Atomic Absorption Spectrometry 199
Basic Statistical Concepts 199
Concluding Remarks 202
Suggested Readings 202

12 X rays in Mineralogy 203

Physics of X rays 204
Diffraction 205
The Powder Method 207
 Powder Diffractometry 208
 Powder Photography 208
Identification of an Unknown 209
Determination of Cell Parameters 210
Single-Crystal Diffractometry 213
 Laue Patterns 213
 Rotation Methods 214
Scattering by Atoms and Unit Cells 215
Quantitative Analysis by Diffraction 215
 Magnesian Calcite 216
 Olivine 216
 The Plagioclase Series 216
Concluding Remarks 218
Suggested Readings 218

Mineral Description Format 220
Mineral Formulas 220
Mineral Structures 221
Suggested Readings 221

13 Native Elements 223

Native Elements 224
 Box 13.1 Close Packing of Atoms 225
 Gold 227
 Silver 227
 Copper 228
 Platinum 228
 Arsenic 229
 Sulfur 230
 Diamond 230
 Graphite 231

14 Sulfides and Sulfosalts 232

Sulfides 233
 Chalcocite 235
 Acanthite 235
 Bornite 236
 Galena 236
 Sphalerite 236
 Chalcopyrite 237
 Nickeline 238
 Pyrrhotite 239
 Pentlandite 239
 Covellite 240
 Cinnabar 240
 Realgar 241
 Orpiment 242
 Stibnite 242
 Pyrite 243
 Cobaltite 245
 Marcasite 245
 Arsenopyrite 246
 Molybdenite 247
 Skutterudite Series 247
Sulfosalts 248
 Pyrargyrite 248
 Tetrahedrite Series 249
 Enargite 250
 Bournonite 250
 Jamesonite 251

15 Halides 252

Halite 253
Chlorargyrite 254
Fluorite 255

16 Oxides and Hydroxides 256

Oxides 257
Cuprite 258
Ice 259
Corundum 259
Hematite 260
Ilmenite Series 261
Rutile 261
Pyrolusite 262
Cassiterite 263
Uraninite 264
Spinel Group 264
Spinel 265
Magnetite 266
Chromite 267
Columbite-Tantalite Series 267
Romanechite 268
Hydroxides 268
Brucite 270
Diaspore 270
Goethite 271
Gibbsite 272

17 Carbonates 273

Carbonates 274
Calcite 275
Magnesite 276
Siderite 277
Rhodochrosite 277
Smithsonite 278
Aragonite 278
Witherite 279
Strontianite 280
Cerussite 280
Dolomite 280
Malachite 281
Azurite 282

18 Borates 283

Borates 284
Borax 284
Colemanite 285

19 Sulfates 286

Sulfates 287
Barite 287
Celestite 288
Anglesite 289
Anhydrite 289
Gypsum 290
Melanterite 291
Epsomite 292
Jarosite 292
Alunite 293

20 Phosphates, Arsenates, Vanadates, Chromates, Tungstates, and Molybdates 294

Phosphates, Arsenates, Vanadates,
and Chromates 295
Monazite 296
Amblygonite Series 296
Apatite Series 297
Turquoise 298
Pyromorphite Series 299
Carnotite 299
Crocoite 300
Tungstates and Molybdates 300
Wolframite Series 301
Scheelite 301
Wulfenite 302

21 Silicates 303

Tectosilicates (Networks) 307
Silica Group 307
α-Quartz 308
Opal 310
Feldspar Group 311
Orthoclase Series 313
Microcline Series 314
Plagioclase Series 314
Feldspathoid Group 315
Leucite 315
Nepheline 316
Sodalite 316
Cancrinite 317
Zeolite Group 318
Stilbite 319
Chabazite 320
Natrolite 321
Miscellaneous Tectosilicates 321
Scapolite Group 321
Marialite 321
Meionite 321
Cordierite 322
Analcime 323

Phyllosilicates (Sheets)	323	Sorosilicates (Pairs)	352
Clay Family	324	<i>Melilite Group</i>	353
Kaolinite	326	<i>Hemimorphite</i>	353
<i>Smectite Group</i>	326	<i>Vesuvianite</i>	354
<i>Montmorillonite</i>	326	<i>Epidote Series</i>	354
<i>Beidellite</i>	326	Nesosilicates (Units)	355
Talc Group	327	<i>Olivine Group</i>	356
<i>Pyrophyllite</i>	327	<i>Garnet Group</i>	357
Talc	327	Zircon	359
Chlorite Group	328	<i>Humite Group</i>	359
<i>Clinochlore</i>	328	<i>Chondrodite</i>	359
<i>Chamosite</i>	328	<i>Humite</i>	359
<i>Nimite</i>	328	<i>Clinohumite</i>	359
<i>Pennantite</i>	328	Topaz	360
Brittle Mica Group	329	<i>Chloritoid</i>	361
<i>Margarite</i>	329	Subsaturates	362
Elastic Mica Group	330	<i>Andalusite</i>	362
<i>Muscovite</i>	330	<i>Sillimanite</i>	363
<i>Phlogopite</i>	331	<i>Kyanite</i>	363
<i>Biotite</i>	331	<i>Titanite</i>	364
<i>Lepidolite Series</i>	332	<i>Staurolite</i>	365
Miscellaneous Phyllosilicates	332		
<i>Serpentine Group</i>	333	Appendix A	
<i>Chrysotile</i>	333	Table of Atomic Parameters	367
<i>Antigorite</i>	333	Appendix B	
<i>Lizardite</i>	333	Determinative Tables	371
<i>Glauconite</i>	334		
<i>Prehnite</i>	335	References	397
Inosilicates (Chains) and Cyclosilicates (Rings)	336	Credits	399
Double Chains	337	Mineral Index	401
<i>Anthophyllite Series</i>	340	Subject Index	407
<i>Cummingtonite Series</i>	341		
<i>Grunerite</i>	341		
<i>Actinolite Series</i>	341		
<i>Hornblende Series</i>	342		
<i>Magnesio-Hornblende</i>	342		
Single Chains	342		
Pyroxene Group	342		
<i>Enstatite Series</i>	345		
<i>Ferrosilite</i>	345		
<i>Diopside Series</i>	345		
<i>Hedenbergite</i>	345		
<i>Augite</i>	346		
<i>Spodumene</i>	347		
Pyroxenoids	347		
<i>Rhodonite</i>	347		
<i>Chrysocolla</i>	348		
<i>Wollastonite-1T</i>	348		
<i>Pectolite</i>	349		
Cyclosilicates (Rings)	349		
<i>Tourmaline Group</i>	350		
Beryl	351
