Preface i

Chapter 1	Introduction and History	1
2	The Underlying Framework	5
	1 The Role of Grammar Formalisms	5
	2 Some Particular Design Choices	6
	3 Coverage of the Framework	8
3	The Simplest Unification-Based Formalism	11
	1 Overview of the Formalism	11
	2 The Informational Domain	12
	2.1 Basic Concepts	14
	2.2 Subsumption	14
	2.3 Unification	16
	2.4 Feature Structures as Graphs	20
	3 Combinatory Rules	21
	3.1 Identity and Unification Revisited	22
	3.2 Notational Sugar	24
	4 Some PATR-II Grammars	24
	4.1 Sample Grammar One: Agreement	25
	4.2 Sample Grammar Two: Subcategorization	27
	4.3 Sample Grammar Three: Logical Form	32
	4.4 Coverage of the Sample Grammars	35
	4.5 Encoding Lexical Generalizations	35
4	Extended Formalisms	37
	1 Introduction	37
	2 Two Classes of Formalisms	38
	3 Functional Unification Grammar	38
	3.1 Patterns and Constituent Sets	39

3.2	Disjunction	42
3.3	ANY Values	43
4	Definite-Clause Grammars	44
4.1	Term Unification	44
5	Lexical-Functional Grammar	46
5.1	Notational Differences	47
5.2	Semantic Forms	47
5.3	Other Devices	49
5.4	Summary	49
6	Generalized Phrase Structure Grammar	50
6.1	The Information Domain	50
6.2	The Combinatory Rules	51
6.3	Satisfying the Rules	51
6.4	GPSG Semantics	52
6.5	Summary	53
7	Head Grammar and Head-Driven Phrase Structure Grammar	53
8	Lexical Organization	54
8.1	Simple Inheritance	55
8.2	Default Inheritance	59
8.3	Transformation of Lexical Structure	61
8.4	Other Techniques of Lexical Organization	63
9	Other Extensions of Formalisms	63
5	Conclusions	65
1	Emergent Issues Concerning Formalisms	65
2	A Summary	67
Appendix A	Sample PATR-II Grammars	69
1	Sample Grammar One	69
2	Sample Grammar Two	71
3	Sample Grammar Three	76
4	Sample Grammar Four	83
B	The Literature	89
	Bibliography	95
	Index	101
