

Contents

1. Introduction and historical survey by E. STACH (translation: F. ZIERKE and G. H. TAYLOR)	1
2. Fundamentals of coal petrology	5
2.1 The geological basis of coal formation by M. TEICHMÜLLER and R. TEICHMÜLLER (translation: D. G. MURCHISON)	5
2.11 Origin of peat swamps	5
2.111 Evolutionary development of the flora	5
2.112 Climate	6
2.113 Palaeogeographic and tectonic requirements	9
2.113.1 Palaeogeography	10
2.113.2 Tectonic structure	16
2.12 Peat growth, compression and the time of coal formation	17
2.13 Development of the coal facies	18
2.131 Type of deposition (autochthonous, allochthonous)	19
2.132 Peat-forming plant communities	20
2.133 Depositional milieux (telmatic, limnic, brackish-marine, calcium-rich)	26
2.134 Nutrient supply (eutrophic, oligotrophic)	28
2.135 pH value, bacterial activity, sulphur	29
2.136 Temperature of the peat	32
2.137 Redox potential (aerobic, anaerobic)	32
2.14 Diagenesis of peat and coalification	33
2.141 Peat diagenesis (peatification)	33
2.142 Coalification	34
2.142.1 The coalification process	34
2.142.2 Causes of coalification	41
2.142.3 Coalification and bituminization	47
2.142.4 Coalification and diagenesis of mineralogenic rocks	53
2.2 The microscopically recognizable constituents of coal	54
2.21 The macerals of coal by E. STACH (translation: F. ZIERKE and G. H. TAYLOR)	54
2.211 The concept of 'macerals'	54
2.212 The three maceral groups	55
2.212.1 The vitrinite group	59
2.212.11 Description of the macerals	59
2.212.111 Telinite	59
2.212.112 Collinite	61
2.212.113 Corpocollinite	64
2.212.114 Vitrodetrinitite	64
2.212.12 Physical properties of vitrinite	64
2.212.121 Fracture, lustre and fissuring	64
2.212.122 Density of vitrinite	64
2.212.123 Refractive index and absorption index of vitrinite	65
2.212.124 Reflectance of vitrinite	66
2.212.125 Microhardness of vitrinite	67
2.212.126 Porosity, ultrafine structure and X-ray structure of vitrinite	67
2.212.13 The chemical properties of vitrinite	67
2.212.2 The macerals of the exinite group	68

2.212.21 Sporinite	69
2.212.211 General remarks and morphology of fossil spores	69
2.212.212 Tenuisporites and crassispores	71
2.212.213 Sporinite and micrinite	73
2.212.214 Occurrence of sporinite and its stratigraphic significance	73
2.212.215 Physical properties of sporinite	73
2.212.216 Chemical properties of sporinite	74
2.212.22 Cutinite	75
2.212.221 Origin	75
2.212.222 Morphology of cutinite in polished surfaces and macerated preparations	76
2.212.223 Occurrence and stratigraphic significance of cutinite	79
2.212.224 Cuticular analysis	81
2.212.225 Physical properties of cutinite	82
2.212.226 Chemical properties of cutinite	82
2.212.23 Resinite	83
2.212.231 General remarks	83
2.212.232 Morphography of resinite in polished surfaces and in thin sections	84
2.212.233 Occurrence and stratigraphic significance of resinite	84
2.212.234 Physical properties of resinite	86
2.212.235 Chemical properties of resinite	87
2.212.24 Alginite	88
2.212.241 General remarks	88
2.212.242 Morphography of <i>Pila</i> and <i>Reinschia</i> alginite	89
2.212.243 Occurrence of alginite	92
2.212.244 Physical and chemical properties of alginite	92
2.212.25 Liptodetrinitite	93
2.212.26 Coalification of the exinite macerals	93
2.212.3 The macerals of the inertinite group	95
2.212.31 Fusinite	95
2.212.311 Description of fusinite	95
2.212.312 Occurrence of fusinite	97
2.212.313 Physical and chemical properties of fusinite	97
2.212.32 Semifusinite	98
2.212.321 Description of semifusinite	98
2.212.322 Occurrence of semifusinite	98
2.212.323 Physical and chemical properties of semifusinite	100
2.212.33 Macrinite	100
2.212.331 Description of macrinite	100
2.212.332 Occurrence of macrinite	100
2.212.333 Physical and chemical properties of macrinite	100
2.212.34 Inertodetrinitite	101
2.212.341 Description of inertodetrinitite	101
2.212.342 Occurrence of inertodetrinitite	101
2.212.343 Physical and chemical properties of inertodetrinitite	101
2.212.35 Micrinite	103
2.212.351 Description of micrinite	103
2.212.352 Occurrence of micrinite	103
2.212.353 Physical and chemical properties of micrinite	103
2.212.36 Sclerotinitite	103
2.212.361 Sclerotinitite in Tertiary coals	103
2.212.362 Sclerotinitite in Carboniferous coals	104
2.212.363 Occurrence of sclerotinitite	106
2.212.364 Physical properties of sclerotinitite	106

2.22 The microlithotypes of coal and their strength by E. STACH (translation: F. ZIERKE and G. H. TAYLOR)	108
2.221 The concept of microlithotypes	108
2.221.1 The monomaceral microlithotypes	111
2.221.11 Vitrite	111
2.221.12 Liptite	112
2.221.13 Inertite	112
2.221.2 The bimaceral microlithotypes	113
2.221.21 Clarite	113
2.221.22 Vitrinertite	115
2.221.23 Durite	116
2.221.3 Trimacerite	116
2.222 The physical and chemical properties of microlithotypes	117
2.223 Carbominerites	118
2.23 Minerals and trace elements occurring in coal by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	121
2.231 Clay minerals	122
2.232 Carbonate minerals	126
2.233 Sulphides	128
2.234 Oxides and hydroxides	129
2.235 Phosphates	131
2.236 Heavy minerals	131
2.237 Salts	131
2.238 Trace elements	131
2.24 The lithotypes of humic and sapropelic coals by E. STACH (translation: F. ZIERKE and G. H. TAYLOR)	132
2.241 The lithotypes of humic coals	133
2.241.1 Vitrain (bright coal)	133
2.241.2 Clarain	133
2.241.3 Durain (dull coal)	134
2.241.4 Fusain	134
2.242 Sapropelic coals	134
2.242.1 Cannel coals	134
2.242.2 Transitions from cannel to boghead coals	135
2.242.3 Boghead coals	137
2.243 Carbonaceous shale, cannel and boghead shale	137
2.25 Gondwana coals by D. CHANDRA and G. H. TAYLOR	139
2.251 Introduction	139
2.252 Conditions of deposition	140
2.253 Macroscopic seam characteristics	142
2.254 Microscopic petrography	142
2.254.1 Macerals	143
2.254.11 Exinite group	143
2.254.111 Alginite	144
2.254.112 Sporinite	144
2.254.113 Resinite	145
2.254.114 Cutinite	145
2.254.12 Vitrinite group	146
2.254.13 Inertinite group	148
2.254.131 Micrinite	149
2.254.132 Macrinite	149
2.254.133 Inertodetrinite	149
2.254.134 Sclerotinite	151
2.254.135 Semifusinite	152
2.254.136 Fusinite	152

2.254.2 Microlithotypes	152
2.254.3 Mineral matter	153
2.254.31 Clay minerals	154
2.254.32 Carbonate minerals	154
2.254.33 Sulphide minerals	155
2.254.34 Silica minerals	155
2.254.35 Other minerals; mineral associations	156
2.255 Rank: Thermal and tectonic alteration	156
2.256 Use and assessment	158
2.26 Oxidized coals by D. CHANDRA	159
2.261 Microstructure and reflectance	159
2.261.1 Oxidation at lower temperature (up to $\sim 150^\circ \text{C}$)	160
2.261.2 Oxidation at higher temperature (greater than $\sim 150^\circ \text{C}$)	163
2.261.3 Oxidation rims	164
2.27 Thermally altered coals by D. CHANDRA and G. H. TAYLOR	165
2.271 Introduction	165
2.272 Microstructure	166
2.272.1 Groundmass	167
2.272.2 Original constituents	167
2.272.3 Newly-formed constituents	169
2.273 Reflectance	172
2.273.1 Relation between reflectance and chemical composition	173
2.273.2 Effect of pressure on thermally affected coals	173
2.273.3 Evaluation of temperature of alteration of affected coals	174
3. Origin of the petrographic constituents of coal by M. TEICHMÜLLER (translation: D. G. MURCHISON)	176
3.1 Introduction and methods of investigation	176
3.2 Origin of macerals	180
3.21 General	180
3.22 The vitrinite group	182
3.221 Chemical and botanical precursors	182
3.222 Alteration during the peat and brown-coal stages	184
3.223 Individual macerals	187
3.223.1 Telinite, telocollinite	187
3.223.2 Desmocollinite, vitrodetrinitite, degradinite	193
3.223.3 Gelocollinite	195
3.223.4 Corpocollinite	197
3.224 Alteration of vitrinite in the bituminous coal and anthracite stages	198
3.23 The liptinite (exinite) group	200
3.231 Chemical and botanical precursors	200
3.232 Alteration during peatification and coalification	200
3.233 Individual macerals	201
3.233.1 Sporinite	201
3.233.2 Cutinite	203
3.233.3 Resinite	205
3.233.31 Terpene resinite	206
3.233.32 Lipid resinite	207
3.233.33 Secondary 'resinite' (exsudatinite)	210
3.233.4 Alginite	212
3.233.5 Suberinite	214
3.233.6 Liptodetrinitite	215
3.233.7 Bituminite	215
3.24 The inertinite group	216
3.241 Chemical and botanical precursors	216

3.242 Alteration during peatification and coalification	217
3.243 Individual macerals	217
3.243.1 Fusinite and semifusinite	217
3.243.11 Pyrofusinite	218
3.243.12 Degradofusinite (oxyfusinite)	219
3.243.13 Rank fusinite	220
3.243.14 Primary fusinite	222
3.243.2 Sclerotinitite	223
3.243.3 Macrinite	225
3.243.4 Inertodetrinitite	227
3.243.5 Micrinite	228
3.3 Origin of microlithotypes	229
3.31 Vitrite	230
3.32 Clarite	230
3.33 Durite	232
3.34 Trimacerite	233
3.35 Vitrinertite	233
3.36 Fusite, semifusite	234
3.37 Rare microlithotypes	234
3.4 Origin of sapropelic coals (cannels and bogheads)	235
3.5 Origin of liptobioliths	238
4. Methods and tools of examination	239
4.1 Sampling and preparation of polished surfaces or thin sections by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	239
4.11 Sampling	239
4.12 Preparation of polished surfaces	240
4.13 Preparation of polished surfaces from particulate samples	240
4.131 Preparation of specimens without pressure	241
4.132 Preparation of specimens under pressure	242
4.133 Grinding	242
4.134 Polishing	243
4.14 Preparation of thin sections of coal	243
4.2 Methods of examination of coal	244
4.21 Macropetrographic seam section and microscopic seam section analysis by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	244
4.211 Macropetrographic seam section	244
4.211.1 Survey of the gross structure of the seams	244
4.211.2 Macropetrographic description of the seam	244
4.212 Microscopic analysis of seam profiles	249
4.212.1 Sampling and preparation of polished sections	249
4.212.11 Pillar samples	249
4.212.12 Drill cores	249
4.212.13 Preparation of polished surfaces	250
4.212.14 Performance of the analysis	250
4.212.2 Macropetrographic analysis of seam profiles	252
4.212.21 Survey of the gross structure of the seams	252
4.212.22 Macropetrographic description of the seam	252
4.212.23 Microscopic analysis of seam profiles	253
4.212.231 Survey of the gross structure of the seams	253
4.212.232 Macropetrographic description of the seam	253
4.212.233 Microscopic analysis of seam profiles	253
4.212.234 Evaluation of the results and accuracy of analysis	255
4.212.3 Macropetrographic analysis of seam profiles	256
4.22 Maceral analysis on polished surfaces of particulate coal samples by M.-Th. MACKOWSKY (translation: F. Zierke and G. H. Taylor)	256
4.221 General remarks	256
4.222 Instruments	256
4.223 Procedure and evaluation	256
4.224 Evaluation of the results and accuracy of analysis	256
4.23 Microlithotype analysis on particulate coal samples by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	256
4.231 General remarks	256

4.232 Instruments	256
4.233 Procedure for the analysis	257
4.233.1 Microlithotype analysis	257
4.233.11 Grouping of microlithotypes	257
4.233.12 Procedure	258
4.233.13 Evaluation and presentation of results	259
4.233.14 Accuracy of analysis	259
4.233.2 Combined maceral-microlithotype analysis	259
4.233.21 Procedure of analysis	259
4.233.22 Accuracy of analysis	263
4.24 Rank determination by measurement of reflectance on vitrinites by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	263
4.241 General remarks	263
4.242 Equipment for reflectance measurements	270
4.243 Measuring procedure	270
4.244 Evaluation and presentation of the results	271
4.245 Accuracy of the measurement	272
4.246 Reflectance measurements on other macerals or maceral groups	273
4.25 Determination of the rank of coals contained in a blend by reflectance measurements on vitrinite by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	273
4.251 General remarks	273
4.252 Equipment and checking of the measuring system	274
4.253 Procedure	274
4.254 Evaluation and expression of the results	275
4.255 Mean error of the as-determined proportions	276
4.26 Mineral distribution analysis by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	276
4.261 General remarks	276
4.262 Instruments	277
4.263 Distribution of the total mineral content	278
4.264 Distribution of individual minerals	279
4.265 Distribution of different types of association	280
4.27 Etching of polished coal surfaces by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	281
4.271 General remarks	281
4.272 Procedure	281
4.28 Determination of hardness and strength by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	285
4.281 Hardness testing	285
4.281.1 General remarks	285
4.281.2 Method of measurement	285
4.282 Mechanical strength	289
4.282.1 General remarks	289
4.282.2 Testing methods	290
4.282.21 Vickers' macrostrength	290
4.282.22 Compressive strength	290
4.282.23 Grindability and structural strength	290
4.282.24 Vibro-impact strength (after SPÄTH)	292
4.29 Fluorescence microscopy by E. STACH (translation: F. ZIERKE and G. H. TAYLOR)	292
4.291 General remarks	292
4.292 The modern fluorescent-light microscope	293
4.293 Practical aspects	294
4.294 Quantitative determination of intensity and spectrometry	295

4.295 Photography in fluorescent light	296
4.3 Coke microscopy by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	298
4.31 General remarks	298
4.32 Examination of Rose specimens	299
4.33 Quantitative determination of the coke structure after E. HOFFMANN	300
4.34 Determination of the optical character of coke	302
4.4 Rank determination on sedimentary rocks other than coal by M. TEICHMÜLLER (translation: D. G. MURCHISON)	303
4.41 Selection of samples	303
4.42 Concentration of coaly inclusions	304
4.43 Section preparation	304
4.44 Reflectivity measurement	305
4.45 Spectral fluorescence measurement	309
5. Applied coal petrology	310
5.1 Seam identification by E. STACH (translation: F. ZIERKE and G. H. TAYLOR)	310
5.11 Methods of seam identification	310
5.12 Seam identification using petrological methods	310
5.121 Marker seams	310
5.122 Macroscopic seam sections and seam formation curves	311
5.123 Microscopic seam identification — dull layers	313
5.124 Crassidurite seams	314
5.125 Maceral analysis	314
5.13 Seam identification using sporology	314
5.131 Spore analysis	314
5.132 Spore frequency diagrams	315
5.14 Seam identification using determination of rank	315
5.15 Seams showing particular petrographic features	315
5.2 Application of coal petrological methods in geology including oil and natural gas prospecting by M. TEICHMÜLLER (translation: D. G. MURCHISON)	316
5.21 The importance of coal petrology in the solution of stratigraphic, palaeogeographic and tectonic problems	317
5.22 Application of coal petrology in the solution of geothermal problems	322
5.23 Coal petrology and ore prospecting	325
5.24 The importance of coal petrology in prospecting for oil and natural gas	326
5.25 Further possible applications of coal petrological methods	331
5.3 The application of coal petrography in technical processes by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	331
5.31 General remarks	331
5.32 Coal getting	332
5.33 Coal preparation	334
5.331 General remarks	334
5.332 Cleaning	336
5.332.1 Possibilities to reduce the sulphur content	338
5.332.2 Possibilities to concentrate pyrite	338
5.332.3 Determination of 'misplaced' material	339
5.332.4 The electrostatic cleaning processes	339
5.34 Carbonization	341
5.341 Properties of coking coal	342
5.342 Transition from coal to coke	351
5.343 Influence of grain size distribution	357
5.344 Prediction of coke properties	358
5.344.1 The method of BROWN, TAYLOR & COOK	360
5.344.2 The method of AMMOSOV et al. and SCHAPIRO et al.	360

5.344.3 The method of SIMONIS & MACKOWSKY	363
5.35 Formed coke and hot briquetting — Smokeless fuels	367
5.36 Briquetting (using pitch as a binder)	374
5.37 Combustion of coal	379
5.38 Spontaneous combustion of coal	386
