

## CONTENTS

Preface . . . . .	VII
QUANTITATIVE MODELS OF TRACE ELEMENT BEHAVIOR IN MAGMATIC PROCESSES . . . . .	
C.J. Allègre and J.F. Minster	1
1. Introduction . . . . .	1
2. Historical developments . . . . .	2
3. Quantitative models for trace elements . . . . .	4
4. Partition coefficients . . . . .	13
5. Process identification . . . . .	15
6. Parameter determination and inverse-problem solution . . . . .	17
7. Conclusions . . . . .	20
Acknowledgements . . . . .	21
References . . . . .	21
THE APPLICATION OF TRACE ELEMENTS TO THE PETROGENESIS OF IGNEOUS ROCKS OF GRANITIC COMPOSITION . . . . .	
G.N. Hanson	26
1. Introduction . . . . .	26
2. Use of mineral/melt distribution coefficients in petrogenesis . . . . .	27
3. Residual minerals in granitic melts . . . . .	31
4. Trace element modeling . . . . .	34
5. Late-stage residual fluids . . . . .	36
6. Examples of petrogenetic interpretations for granitic rocks . . . . .	37
7. Geodynamics and tectonic setting . . . . .	41
Acknowledgements . . . . .	42
References . . . . .	42
AN ASSESSMENT OF LOCAL AND REGIONAL ISOTOPIC EQUILIBRIUM IN THE MANTLE . . . . .	
A.W. Hofmann and S.R. Hart	44
1. Introduction . . . . .	44
2. The scale of isotopic disequilibrium . . . . .	46
3. Evidence based on analytical data from volcanic rocks . . . . .	47
4. Limits on the phlogopite and potassium content of the mantle . . . . .	49
5. Phlogopite stability . . . . .	50
6. Evidence derived from time constraints . . . . .	51
7. Fractional crystallization . . . . .	52
8. Evidence for mineral disequilibrium . . . . .	53
9. Application of kinetic data . . . . .	54
Acknowledgements . . . . .	58
References . . . . .	58

<b>ISOTOPIC COMPOSITION OF LEAD IN OCEANIC BASALT AND ITS IMPLICATION TO MANTLE EVOLUTION</b>	63
M. Tatsumoto	
1. Introduction	63
2. Background for lead isotope tracer studies	64
3. Uranium, thorium, and lead concentrations in basalts	66
4. Seawater alteration	70
5. Lead in basalts from the island of Hawaii	71
6. Thorium-uranium-lead systematics of basalts from Reykjanes Ridge	75
7. Lead isotopic compositions in abyssal basalts	77
8. Disequilibrium partial melting	79
9. Mantle evolution model	79
10. Conclusions	84
Acknowledgements	84
References	84
<b>STRONTIUM ISOTOPES IN BASALTS FROM THE PACIFIC OCEAN BASIN</b>	88
C.E. Hedge	
1. Introduction	88
2. Data and discussion	88
3. Conclusions	93
References	93
<b>TRACE ELEMENTS IN OCEAN RIDGE BASALTS</b>	95
R.W. Kay and N.J. Hubbard	
1. Introduction	95
2. Commonly assumed petrologic constraints	97
3. Trace elements in ocean ridge basalts	99
4. Variations in ocean ridge basalt chemistry	106
5. Comparison of ocean ridge basalts with other terrestrial basalts: large ion lithophile elements	107
6. Conclusions	111
Acknowledgements	111
References	111
<b>FACTORS CONTROLLING THE NOBLE GAS ABUNDANCE PATTERNS OF DEEP-SEA BASALTS</b>	117
J. Dymond and L. Hogan	
1. Introduction	117
2. Physical processes affecting noble gas composition	118
3. Applications to noble gas measurements of glassy deep-sea basalts	124
4. Conclusions	127
Acknowledgements	127
References	127
<b>ULTRAMAFIC INCLUSIONS FROM SAN CARLOS, ARIZONA: PETROLOGIC AND GEOCHEMICAL DATA BEARING ON THEIR PETROGENESIS</b>	129
F.A. Frey and M. Prinz	
1. Introduction	129
2. Basanites	133

3. Group I inclusions . . . . .	135
4. Group II inclusions . . . . .	158
5. Transitional inclusions . . . . .	170
6. Summary of inclusions . . . . .	170
Acknowledgements . . . . .	173
References . . . . .	173
 OXYGEN AND HYDROGEN ISOTOPE STUDIES OF PLUTONIC GRANITIC ROCKS . . . . .	
H.P. Taylor, Jr.	
1. Introduction . . . . .	177
2. Isotopically normal granitic rocks . . . . .	178
3. Interactions between meteoric groundwaters and igneous intrusions . . . . .	182
4. Cordilleran batholiths of western North America . . . . .	190
5. High- <sup>18</sup> O granitic rocks . . . . .	199
6. Conclusions . . . . .	206
Acknowledgements . . . . .	207
References . . . . .	207
 EARLY ARCHAEOAN ROCKS AND GEOCHEMICAL EVOLUTION OF THE EARTH'S CRUST . . . . .	
R.K. O'Nions and R.J. Pankhurst	
1. Introduction . . . . .	211
2. Occurrence of Early Archaean crustal remnants . . . . .	212
3. The geochemistry and petrogenesis of Archaean rocks . . . . .	217
4. Composition of Archaean mantle . . . . .	231
5. Concluding remarks . . . . .	232
Acknowledgements . . . . .	233
References . . . . .	233
 LEAD ISOTOPES IN ARCHAEOAN PLUTONIC ROCKS . . . . .	
V.M. Oversby	
1. Introduction . . . . .	237
2. Africa . . . . .	239
3. Greenland . . . . .	241
4. North America . . . . .	242
5. Australia . . . . .	244
6. Summary and conclusions . . . . .	246
References . . . . .	247
 TRACE ELEMENTS AND ANORTHOSITE GENESIS . . . . .	
J.C. Duchesne and D. Demaiffe	
1. Introduction . . . . .	249
2. Strontium and barium in plagioclase . . . . .	252
3. Potassium and rubidium . . . . .	257
4. Rare earth elements . . . . .	260
5. Transition elements . . . . .	263
6. Strontium isotopic composition . . . . .	265
7. Oxygen isotopic composition . . . . .	268
8. General conclusions . . . . .	268
Acknowledgements . . . . .	270
References . . . . .	270
