

CONTENTS

PREFACE	vii	2.3 Chemical variation diagrams	14
ACKNOWLEDGEMENTS	ix	2.4 Geochemical characteristics of primary magmas	21
LIST OF TABLES	xv	2.5 Isotopes as petrogenetic indicators	22
SOME COMMON ABBREVIATIONS USED IN THE TEXT	xix	2.6 Geochemical criteria for the identification of the palaeotectonic setting of ancient volcanic sequences	32
		Further reading	34

PART ONE

Magmatism and global tectonic processes	1
---	---

CHAPTER ONE

<i>Relation of present-day magmatism to global tectonic processes</i>	3
1.1 Introduction	3
1.2 Characteristic magma series associated with specific tectonic settings	7
Further reading	11

CHAPTER TWO

<i>Geochemical characteristics of igneous rocks as petrogenetic indicators</i>	13
2.1 Introduction	13
2.2 Chemical analysis of igneous rocks	14

CHAPTER THREE

<i>Partial melting processes in the Earth's upper mantle</i>	37
3.1 Introduction	37
3.2 The physical state of the upper mantle	38
3.3 Chemical composition and mineralogy of the upper mantle	44
3.4 Partial melting processes in the upper mantle	58
3.5 The basaltic magma spectrum in relation to partial melting processes	67
3.6 Segregation and ascent of magma	70
Further reading	72

CHAPTER FOUR

<i>Processes which modify the composition of primary magmas</i>	73
4.1 Introduction	73
4.2 Convection and mixing in magma chambers	78

4.3 Fractional crystallization	82	processes	159
4.4 Crustal contamination	89	6.6 Segregation, ascent and storage of magma	162
4.5 Zone refining	96	6.7 Characteristic magma series	164
4.6 Liquid immiscibility	97	6.8 Spatial and temporal variations in island-arc magmatism	167
4.7 Gaseous transfer processes	97	6.9 Surface volcanic features	168
Further reading	97	6.10 Petrography of island-arc volcanic rocks	169
PART TWO		6.11 Chemical composition of erupted magmas	172
Magmatism at constructive plate margins	99	6.12 Detailed petrogenetic model	188
		Further reading	190
CHAPTER FIVE			
<i>Mid-ocean ridges</i>	101	CHAPTER SEVEN	
5.1 Introduction	101	<i>Active continental margins</i>	191
5.2 Simplified petrogenetic model	104	7.1 Introduction	191
5.3 Nature of the oceanic crust	106	7.2 Simplified petrogenetic model	196
5.4 Structure of mid-ocean ridges	110	7.3 The structure of active continental margins	198
5.5 Heat flow and metamorphism	119	7.4 Thermal structure and partial melting processes	201
5.6 Convection systems at constructive plate margins	124	7.5 Magma storage in the crust	203
5.7 Partial melting processes	125	7.6 Petrographic characteristics of the volcanic and plutonic rocks	206
5.8 Magma storage and release	126	7.7 Chemical composition of the magmas	208
5.9 Petrography of mid-ocean ridge basalts	129	7.8 Detailed petrogenetic model	223
5.10 Chemical composition of erupted magmas	132	Further reading	225
5.11 Detailed petrogenetic model	145		
Further reading	149		
PART THREE		CHAPTER EIGHT	
Magmatism at destructive plate margins	151	<i>Back-arc basins</i>	227
CHAPTER SIX		8.1 Introduction	227
<i>Island arcs</i>	153	8.2 Simplified petrogenetic model	229
6.1 Introduction	153	8.3 Petrography of the volcanic rocks	231
6.2 Simplified petrogenetic model	154	8.4 Chemical composition of the erupted magmas	231
6.3 Structure of island arcs	157	8.5 Detailed petrogenetic model	239
6.4 Earthquakes and magma genesis	158	Further reading	241
6.5 Thermal structure and partial melting			

PART FOUR

Magmatism within plates	243
-------------------------	-----

CHAPTER NINE

<i>Oceanic islands</i>	245
------------------------	-----

9.1 Introduction	245
9.2 Simplified petrogenetic model	250
9.3 Crustal structure of oceanic islands	253
9.4 Partial melting processes	255
9.5 High-level magma storage	256
9.6 Petrography of oceanic-island volcanic rocks	258
9.7 Chemical composition of erupted magmas	261
9.8 Detailed petrogenetic model	282
Further reading	285

CHAPTER TEN

<i>Continental tholeiitic flood basalt provinces</i>	287
10.1 Introduction	287
10.2 Simplified petrogenetic model	291
10.3 Crustal structure and magma storage reservoirs	294
10.4 Crustal contamination of magmas	295
10.5 Petrography of the volcanic rocks	296
10.6 Chemical composition of the erupted magmas	298
10.7 Detailed petrogenetic model	321
Further reading	323

CHAPTER ELEVEN

<i>Continental rift zone magmatism</i>	325
11.1 Introduction	325
11.2 Simplified petrogenetic model	332
11.3 Crust and upper mantle structure	335
11.4 Petrography of the volcanic rocks	339
11.5 Chemical composition of the erupted magmas	342
11.6 Detailed petrogenetic model	371
Further reading	374

CHAPTER TWELVE

<i>Potassic magmatism within continental plates</i>	375
12.1 Introduction	375
12.2 Simplified petrogenetic model	380
12.3 Partial melting processes in the upper mantle	384
12.4 Petrographic characteristics of kimberlites and ultrapotassic rocks	388
12.5 Chemical composition of kimberlites and ultrapotassic rocks	391
12.6 Detailed petrogenetic model	411
Further reading	416

APPENDIX

<i>Approximate ranges of D values for the partitioning of trace elements between the common rock-forming minerals and liquids of basic–intermediate composition</i>	417
---	-----

BIBLIOGRAPHY	423
