Preface and acknowledgements	vii
List of tables	xvii
List of contributors	xxi
1 Classification, petrogenesis and tectonic setting of boninites <i>A. J. Crawford, T. J. Falloon and D. H. Green</i>	
1.1 Classification of boninites	2
1.2 Chemical subdivision of the boninite spectrum	5
1.3 Petrography—mineral chemistry of boninite suites	11
1.4 Phase relationships and their significance	17
1.5 Discussion	21
1.6 Petrogenesis of boninites: a summary	26
1.7 Tectonic setting of boninite generation	29
1.8 A new model for boninite petrogenesis	37
1.9 Directions and problems for further study	41
1.10 Conclusions	42
Acknowledgements	44
References	44
2 Boninites and high-Mg andesites: tectonics and petrogenesis <i>Y. Tatsumi and S. Maruyama</i>	
2.1 Introduction	50
2.2 Geological constraints	52
2.3 Petrological constraints	57
2.4 Discussion	63
2.5 Conclusions	68
Acknowledgements	68
References	68
3 High-K ₂ O rocks with high-MgO, high-SiO ₂ affinities <i>S. F. Foley and G. Venturelli</i>	
3.1 Introduction	72
3.2 Geological setting and mineralogical features	75
3.3 Wholerock chemistry	78

3.4	Petrogenesis	82
	Acknowledgements	85
	References	85
4	Experimental studies on boninite petrogenesis <i>S. Umino and I. Kushiro</i>	
4.1	Introduction	89
4.2	Petrography and mineralogy of selected boninites	91
4.3	Experimental methods	98
4.4	Experimental results	99
4.5	Conditions of boninite generation and crystallization	105
4.6	Summary	108
	Acknowledgements	109
	References	109
5	Experimental evidence for the origin of boninites: near-liquidus phase relations to 7.5 kbar <i>S. R. Van der Laan, M. F. J. Flower and A. F. Koster van Groos</i>	
5.1	Introduction	113
5.2	The simple system analogue for boninite	114
5.3	Previous experimental work relevant to boninite genesis	115
5.4	Experiments	117
5.5	Results	121
5.6	Discussion	135
5.7	Tectonic implications	143
	Acknowledgements	145
	References	145
6	Geochemistry and petrogenesis of Archaean and early Proterozoic siliceous high-magnesian basalts <i>S.-S. Sun, R. W. Nesbitt and M. T. McCulloch</i>	
6.1	Introduction	149
6.2	Brief description of sample occurrences	151
6.3	Analytical methods and results	152
6.4	Geochemical distinction between Archaean and early Proterozoic SHMB and modern boninites	154
6.5	SHMB: komatiitic parent magmas and the role of crustal contamination	156
6.6	Continental lithosphere as a magma source for SHMB	165
6.7	PGE mineralization in Archaean and early Proterozoic layered complexes	166
6.8	Development of a continental lithosphere modified by subduction processes	167

6.9	Concluding remarks	169
	Acknowledgements	170
	References	170
7	Significance and origin of boninite-like rocks associated with the Bushveld Complex	
	<i>C. J. Hatton and M. R. Sharpe</i>	
7.1	Introduction	174
7.2	Geological setting and stratigraphy of the eastern Bushveld Complex	175
7.3	The parental magmas to the Bushveld Complex	180
7.4	Field relations of boninites	183
7.5	Wholerock geochemistry	186
7.6	Discussion	189
7.7	Summary	202
	References	203
8	Petrology and geochemistry of early Proterozoic high-Mg dykes from the Vestfold Hills, Antarctica	
	<i>S. M. Kuehner</i>	
8.1	Introduction	209
8.2	Characterization of subgroups	210
8.3	Age relationships of the HMG subgroups	211
8.4	Petrography	212
8.5	Wholerock geochemistry	216
8.6	Rare-earth-element geochemistry	224
8.7	Crustal contamination	225
8.8	Estimation of the depth of magma genesis	225
8.9	Summary	227
	Acknowledgements	229
	References	229
9	Geological setting, petrology and chemistry of Cambrian boninite and low-Ti tholeiite lavas in western Tasmania	
	<i>A. V. Brown and G. A. Jenner</i>	
9.1	Introduction	233
9.2	Regional geological setting	235
9.3	Field relationships of the boninitic and low-Ti lavas	237
9.4	Petrography	239
9.5	Mineral chemistry	241
9.6	Geochemistry	241
9.7	Discussion	255

9.8	Conclusions	259
	Acknowledgements	260
	References	260
10	Boninitic lavas in Appalachian ophiolites: a review	
	<i>R. A. Coish</i>	
10.1	Introduction	264
10.2	Regional setting	266
10.3	Local geological setting	266
10.4	Petrography of boninitic lavas	268
10.5	Mineral chemistry	269
10.6	Wholerock geochemistry	271
10.7	Volcanic rocks associated with the boninitic lavas	276
10.8	Petrogenesis of Appalachian boninites	279
10.9	Tectonic models for boninite generation	280
10.10	Appalachian boninites and plate tectonics	281
10.11	Conclusions	284
	Acknowledgements	284
	References	284
11	Petrogenesis of boninitic lavas from the Limassol Forest Complex, Cyprus	
	<i>N. W. Rogers, C. J. MacLeod and B. J. Murton</i>	
11.1	Introduction	289
11.2	Geology	289
11.3	Petrography	291
11.4	Results	293
11.5	Discussion	301
11.6	Possible re-evaluation of Western Pacific boninites?	309
11.7	Conclusions	309
	Acknowledgements	310
	References	311
12	Contrasting boninite–tholeiite associations from New Caledonia	
	<i>W. E. Cameron</i>	
12.1	Introduction	314
12.2	Massif de Koh	315
12.3	Formation des Basaltes	322
12.4	Sr–Nd isotopes and tectonic setting	331
	Acknowledgements	336
	References	336

13	Boninites and tholeiites from DSDP Site 458, Mariana forearc	
	<i>R. Hickey-Vargas</i>	
13.1	Introduction	340
13.2	Summary of section and major- and trace-element data	341
13.3	Isotopic data	345
13.4	Discussion	347
13.5	Origin of the high Zr/Sm and Hf/Sm in boninites	351
13.6	Summary and conclusions	353
	Acknowledgements	354
	References	354
14	Petrogenesis of high-Mg and associated lavas from the north Tonga Trench	
	<i>T. J. Falloon, D. H. Green and M. T. McCulloch</i>	
14.1	Introduction	358
14.2	Petrography and mineral chemistry	359
14.3	Implications of mineral chemistry for magma mixing	375
14.4	Geochemistry	376
14.5	Petrogenesis	379
14.6	Conclusions	391
	Acknowledgements	392
	References	392
15	Th, U and Pb systematics of boninite series volcanic rocks from Chichi-jima, Bonin Islands, Japan	
	<i>P. F. Dobson and G. R. Tilton</i>	
15.1	Introduction	396
15.2	Analytical techniques	398
15.3	Results	398
15.4	Secondary processes affecting Th/U	400
15.5	Primary processes affecting Th/U	402
15.6	Th/U systematics in boninite lavas	406
15.7	Pb isotopic data: implications for sediment involvement in boninite genesis	409
15.8	Conclusions	411
	Acknowledgements	412
	References	412
16	Magnesian andesites from Mexico, Chile and the Aleutian Islands: implications for magmatism associated with ridge-trench collision	
	<i>G. Rogers and A. D. Saunders</i>	
16.1	Introduction	417
16.2	Tectono-magmatic setting	418

CONTENTS

16.3	Geochemistry	423
16.4	Comparisons with boninitic magmas	431
16.5	Discussion	434
	Acknowledgements	442
