

| | |
|---|---------------|
| CHAPTER 1. CLIMATE, ENVIRONMENT AND SOCIETY: GLOBAL AND REGIONAL PERSPECTIVES | 1 |
| 1.1. Global climate, environment and society over the past 5,000 years | 2 |
| 1.1.1. Climate change during the late Holocene | 3 |
| 1.1.2. Environmental change during the late Holocene | 4 |
| 1.1.3. Societal change during the late Holocene | 7 |
| 1.2. The approach to the last millennium | 9 |
| 1.3. Dividing the last millennium | 10 |
| 1.4. Medieval Warm Period | 12 |
| 1.5. The A.D. 1300 Event (the transition between the Medieval Warm Period and the Little Ice Age) | 13 |
| 1.6. Little Ice Age | 15 |
| 1.7. Recent Warming | 16 |
| 1.8. The Pacific Basin | 17 |
| 1.8.1. Climate of the Pacific Basin and its evolution | 19 |
| 1.8.2. Environments of the Pacific Basin and their evolution | 20 |
| 1.8.3. Societies of the Pacific Basin and their evolution | 20 |
| 1.9. Organization of this book | 23 |
| Key points | 23 |
| CHAPTER 2. ARRIVAL AND SPREAD OF HUMANS IN THE PACIFIC BASIN | 25 |
| 2.1. Human beginnings | 25 |
| 2.2. Humans on the Pacific Rim | 27 |
| 2.2.1. Crossing the Wallace Line: from Southeast Asia to Australasia | 29 |
| 2.2.2. Eastwards and northwards along the western Pacific Rim | 29 |
| 2.2.3. Into the Americas | 30 |
| 2.3. Colonization of the Pacific Islands | 31 |
| Key points | 33 |
| CHAPTER 3. INFLUENCES OF CLIMATE AND SEA-LEVEL CHANGES ON HUMANS | 35 |
| 3.1. Climate change and human evolution | 35 |
| 3.2. Human adaptation to late Pleistocene climate and sea-level changes | 36 |
| 3.2.1. Adaptation to rapid climate change: the Younger Dryas and agriculture | 37 |
| 3.2.2. Latest Pleistocene large-mammal extinctions: climate or humans? | 38 |

| | |
|--|---------------|
| 3.3. Effects of Holocene climate changes on humans | 39 |
| 3.3.1. Climate change and societal collapse | 40 |
| 3.3.2. Climatic control of long-distance voyaging | 42 |
| 3.4. Effects of Holocene sea-level changes on humans | 44 |
| 3.4.1. Human response to early Holocene sea-level rise | 45 |
| 3.4.2. Lowland agriculturalists displaced from East Asia by early Holocene sea-level rise | 46 |
| 3.4.3. Human response to middle Holocene sea-level stability | 49 |
| 3.4.4. Human response to late Holocene sea-level fall | 51 |
| 3.4.4.1. Sea-level fall and delta occupation | 52 |
| 3.4.4.2. Sea-level fall and the shift from uplands to lowlands | 53 |
| 3.4.4.3. Sea-level fall and island colonization | 53 |
| 3.4.4.4. The role of sea-level fall in rendering atolls habitable | 57 |
| Key points | 58 |
| CHAPTER 4. THE MEDIEVAL WARM PERIOD (A.D. 750–1250) IN THE PACIFIC BASIN | 59 |
| 4.1. Climates during the Medieval Warm Period in the Pacific Basin | 59 |
| 4.1.1. Climates of the eastern Pacific Rim (including Antarctica) | 60 |
| 4.1.2. Climates of the western Pacific Rim | 66 |
| 4.1.3. Climates of the Pacific Islands and Ocean | 68 |
| 4.1.4. ENSO frequency and storminess | 69 |
| 4.2. Environments during the Medieval Warm Period in the Pacific Basin | 70 |
| 4.2.1. Sea-level changes | 71 |
| 4.2.2. Environmental change driven by sea-level rise in the Kurile and Komandar Island groups, northwest Pacific | 72 |
| 4.2.3. Lake salinity changes driven by sea-level rise: Nakaumi Lagoon, Honshu Island, Japan | 73 |
| 4.2.4. Evidence for higher sea level from the Pacific Islands during the terminal Medieval Warm Period | 75 |
| 4.3. Societies during the Medieval Warm Period in the Pacific Basin | 77 |
| 4.3.1. Societies of the eastern Pacific Rim | 77 |
| 4.3.2. Climate change and culture, Jequetepeque Valley, coastal Peru | 79 |
| 4.3.3. Collapse of the complex Tiwanaku society, Andean South America | 80 |
| 4.3.4. Drought impacts on the Chumash people of coastal Southern California | 80 |
| 4.3.5. Societies of the western Pacific Rim | 81 |
| 4.3.6. Societies of the Pacific Islands | 82 |
| 4.3.7. Long-distance voyaging across the Pacific Ocean | 84 |
| Key points | 86 |
| CHAPTER 5. THE A.D. 1300 EVENT (A.D. 1250–1350) IN THE PACIFIC BASIN | 87 |
| 5.1. The nature of the A.D. 1300 Event | 88 |
| 5.2. Climates during the A.D. 1300 Event in the Pacific Basin | 90 |
| 5.2.1. Climates of the eastern Pacific Rim (including Antarctica) | 90 |
| 5.2.2. Climates of the western Pacific Rim | 93 |

| | | |
|--------|---|-----|
| 5.2.3. | Abrupt change in the Asian summer monsoon | 96 |
| 5.2.4. | Climates of the Pacific Islands and Ocean | 96 |
| 5.2.5. | ENSO frequency and storminess | 98 |
| 5.2.6. | Increased storminess on Tahiti, French Polynesia | 101 |
| 5.3. | Environments during the A.D. 1300 Event in the Pacific Basin | 102 |
| 5.3.1. | Sea-level change: continental versus island records | 103 |
| 5.3.2. | Direct measurements of sea-level fall | 104 |
| 5.3.3. | Coastal-environmental evidence for sea-level fall | 105 |
| 5.3.4. | Coastal changes on Tikopia, Solomon Islands | 109 |
| 5.4. | Societies during the A.D. 1300 Event in the Pacific Basin | 112 |
| 5.4.1. | Societies of the eastern Pacific Rim | 113 |
| 5.4.2. | Societies of the western Pacific Rim | 115 |
| 5.4.3. | Nearshore subsistence at Bass Point, New South Wales, Australia | 116 |
| 5.4.4. | Societies of the Pacific Islands | 117 |
| | Key points | 120 |

CHAPTER 6. THE LITTLE ICE AGE (A.D. 1350–1800) IN THE PACIFIC BASIN 121

| | | |
|----------|--|-----|
| 6.1. | Climates of the Little Ice Age in the Pacific Basin | 121 |
| 6.1.1. | Climates of the eastern Pacific Rim (including Antarctica) | 122 |
| 6.1.2. | Climates of the western Pacific Rim | 124 |
| 6.1.3. | Storm erosion in New Zealand | 125 |
| 6.1.4. | Climates of the Pacific Islands and Ocean | 126 |
| 6.1.5. | ENSO variability and a two-phase Little Ice Age | 127 |
| 6.2. | Environments of the Little Ice Age in the Pacific Basin | 128 |
| 6.2.1. | Coastal-environmental change | 128 |
| 6.2.2. | Offshore environmental change | 132 |
| 6.2.3. | Inland environmental change | 133 |
| 6.3. | Societies of the Little Ice Age in the Pacific Basin | 135 |
| 6.3.1. | Overview of societal change along the Pacific Rim | 136 |
| 6.3.2. | Crisis in New Zealand | 137 |
| 6.3.3. | Overview of societal change in the Pacific Islands | 139 |
| 6.3.4. | Population dispersal | 140 |
| 6.3.4.1. | Occupation of inland areas | 141 |
| 6.3.4.2. | Occupation of drier and/or less fertile areas | 142 |
| 6.3.4.3. | Occupation of smaller islands | 143 |
| 6.3.4.4. | Creation of artificial islands | 144 |
| 6.3.4.5. | Population dispersal on atolls | 145 |
| 6.3.5. | Changing patterns of resource utilization | 147 |
| 6.3.6. | Reduced interaction | 149 |
| 6.3.6.1. | End of long-distance voyaging | 150 |
| 6.3.6.2. | Abandonment of remote islands | 152 |
| 6.3.7. | Conflict | 153 |
| 6.3.7.1. | Fortifications in the Pacific Islands | 155 |
| 6.3.7.2. | Cannibalism | 157 |
| 6.3.7.3. | Warfare in Fiji | 158 |
| 6.3.8. | Other societal responses to resource depletion | 160 |
| 6.4. | The end of the Little Ice Age | 161 |
| | Key points | 163 |

CHAPTER 7. THE A.D. 1300 EVENT: AN EXPLANATORY MODEL FOR SOCIETAL RESPONSE TO CLIMATE CHANGE DURING THE LAST MILLENNIUM IN THE PACIFIC BASIN

| | |
|---|------------|
| | 165 |
| 7.1. Outline of the model of the A.D. 1300 Event | 167 |
| 7.2. Alternative models | 169 |
| 7.3. Cause–effect linkages for climate change in the A.D. 1300 Event model | 171 |
| 7.3.1. Linking temperature change to sea-level change | 172 |
| 7.3.2. Climatic effects of increased El Niño frequency | 173 |
| 7.4. Cause–effect linkages for environmental change in the A.D. 1300 Event model | 174 |
| 7.5. Cause–effect linkages for societal change during and after the A.D. 1300 Event | 175 |
| 7.5.1. Population dispersal | 175 |
| 7.5.2. Changing patterns of resource utilization | 177 |
| 7.5.3. Reduced interaction | 178 |
| 7.5.4. Conflict | 179 |
| 7.6. Case studies of the A.D. 1300 Event along the Pacific Rim | 181 |
| 7.6.1. Case study: upland and lowland Peru, east Pacific Rim | 181 |
| 7.6.2. Case study: southern California, east Pacific Rim | 183 |
| 7.6.3. Case study: east Australia and New Zealand, southwest Pacific Rim | 184 |
| 7.7. Case studies of the A.D. 1300 Event in the Pacific Islands | 186 |
| 7.7.1. Case study: Nuku Hiva and Tahuata Islands, Marquesas Islands, French Polynesia | 186 |
| 7.7.2. Case study: Lakeba Island, Fiji | 188 |
| 7.7.3. Case study: Palau Islands, Micronesia | 189 |
| 7.7.4. Case study: Kaua'i Island, Hawaii group | 190 |
| 7.7.5. Case study: Easter Island | 192 |
| 7.7.6. Case study: the mystery islands of Polynesia | 194 |
| 7.8. Key issues concerning cause and effect | 195 |
| 7.8.1. Predictability of system responses | 196 |
| 7.8.2. Lag times | 196 |
| 7.8.3. Spatial variations in climate forcing as an explanation for variations in the timing of human response | 197 |
| 7.8.4. Why island environments and societies are more sensitive than those of continents | 198 |
| 7.9. Verifying the A.D. 1300 Event model | 199 |
| Key points | 200 |

CHAPTER 8. RECENT WARMING AND SEA-LEVEL RISE (SINCE A.D. 1800) IN THE PACIFIC BASIN

| | |
|---|------------|
| | 201 |
| 8.1. Climate change during the period of Recent Warming in the Pacific Basin | 201 |
| 8.1.1. Climates of the eastern Pacific Rim (including Antarctica) | 202 |
| 8.1.2. Climates of the western Pacific Rim | 204 |
| 8.1.3. Climates of the Pacific Islands and Ocean | 206 |
| 8.1.4. ENSO, PDO/IPO and Pacific Basin climate change | 207 |
| 8.1.5. Tropical cyclones (hurricanes) | 207 |
| 8.2. Climate-linked environmental change during the period of Recent Warming in the Pacific Basin | 208 |
| 8.2.1. Climate-linked environmental change along the Pacific Rim | 211 |
| 8.2.2. Climate-linked environmental change in the Pacific Islands | 212 |
| 8.2.3. Effects of changed tropical-cyclone regime | 213 |

| | | |
|--------------------|---|------------|
| 8.3. | Climate-linked societal change during the period of Recent Warming in the Pacific Basin | 214 |
| 8.3.1. | Climate-linked societal changes along the Pacific Rim | 215 |
| 8.3.2. | Climate-linked societal changes on Pacific Islands | 215 |
| 8.4. | Future climate change and its effects on Pacific Basin environments and societies | 217 |
| 8.4.1. | Effects of future climate change on Pacific environments | 219 |
| 8.4.2. | Effects of future climate and environmental change on Pacific societies | 220 |
| 8.4.3. | Effects of future changes in Pacific societies on climate and environment | 221 |
| | Key points | 223 |
| CHAPTER 9. | TELECONNECTIONS AND GLOBAL CLIMATE TRENDS | 225 |
| 9.1. | Climate change outside the Pacific Basin during the last millennium | 226 |
| 9.1.1. | Environmental proxies for last-millennium climate change | 229 |
| 9.1.2. | Direct measurements of recent climate change | 231 |
| 9.1.3. | Societal proxies of last-millennium climate change | 233 |
| 9.1.4. | Climate change during the A.D. 1300 Event beyond the Pacific Basin | 233 |
| 9.2. | Environmental change outside the Pacific Basin during the last millennium | 234 |
| 9.2.1. | Sea-level changes A.D. 750–1800 | 234 |
| 9.2.2. | Sea-level rise during the period of Recent Warming (A.D. 1800 to present) | 238 |
| 9.3. | Societal change outside the Pacific Basin during the last millennium | 238 |
| 9.3.1. | Middle last-millennium changes in subsistence agriculture, central United States | 239 |
| 9.3.2. | The “calamitous fourteenth century” in Europe and its aftermath | 239 |
| 9.3.3. | The history of Norse exploration and settlement of the northernmost Atlantic | 240 |
| 9.4. | Global climate trends during the last millennium | 242 |
| | Key points | 244 |
| CHAPTER 10. | CAUSES OF LAST-MILLENNIUM CLIMATE CHANGE | 245 |
| 10.1. | Ultimate causes of last-millennium climate change | 246 |
| 10.1.1. | Solar irradiance variations | 247 |
| 10.1.2. | Contribution of volcanic forcing to climate change | 249 |
| 10.1.3. | Contribution of anthropogenic forcing to recent climate change | 252 |
| 10.2. | Ultimate causes of last-millennium sea-level change | 253 |
| 10.3. | Proximate causes of last-millennium climate and sea-level changes in the Pacific Basin | 255 |
| 10.3.1. | Regional climate modifiers of global climate forcing | 256 |
| 10.3.2. | Oceanic influences on climate change | 257 |
| 10.3.3. | Proximate causes of last-millennium sea-level change | 258 |
| 10.4. | Abrupt climate change | 258 |
| 10.4.1. | Abrupt climate-change events during the late Quaternary | 259 |
| 10.4.2. | Amplification of the A.D. 1300 Event signal in the Pacific? | 261 |
| 10.5. | A last word | 261 |
| | Key points | 262 |
| | <i>References</i> | 263 |
| | <i>Index</i> | 299 |
