Preface	x
1 Classification and occurrence of granitoid rocks	1
1.1 Introduction	1
1.2 Classification schemes for granitoid rocks	3
1.3 The volumetric importance of granitoid rocks in the continental crust	16
1.4 The distribution of granitoid rocks in space and time	18
1.5 The granite problem	19
1.6 General constraints on the origin and evolution of granitoid rocks	22
2 Field relations	23
2.1 Introduction	23
2.2 Shape, size, and volume of granitoid bodies	25
2.3 Field observations	26
2.4 Determining the temperature and pressure conditions of emplacement	45
2.5 Models of ascent and emplacement	49
2.6 Constraints on the origin and evolution of granitoid rocks arising from field observations and modelling experiments	59
3 Mineralogy, texture, and mineral chemistry of granitoid rocks	60
3.1 Introduction	60
3.2 Fundamental mineralogical and textural description	61
3.3 Texturally encoded information	64
3.4 Compositionally encoded information	66
3.5 Mineralogical and textural constraints on the origin and evolution of granitoid rocks	74

4	Whole-rock geochemistry of granitoids	76
4.1	Introduction	76
4.2	Geochemical principles	77
4.3	A conundrum: which comes first, the mineralogy or the chemistry?	82
4.4	Causes of geochemical diversity in igneous rocks	83
4.5	Transitions between peraluminous, metaluminous, and peralkaline granitoids	93
4.6	Chemistry and tectonic environment	94
4.7	A gallery of variation diagrams with presumed petrogenetic significance	95
4.8	Constraints placed on the origin and evolution of granitoid rocks by major and trace element geochemistry	106
5	Geochronology: absolute age determinations	109
5.1	Introduction	109
5.2	Techniques	110
5.3	Four examples of the use of geochronology in granitoid terrains	118
5.4	Petrogenetic constraints arising from geochronology	126
6	Experimental petrology	128
6.1	Introduction	128
6.2	Crystallization histories of granitoid rocks	130
6.3	Melting experiments on possible source rocks	138
6.4	Distribution coefficients	148
6.5	Physical properties of siliceous melts and magmas	149
6.6	Petrogenetic constraints arising from experimental petrology	150
7	Economic geology of granitoid rocks	153
7.1	Introduction	153
7.2	The granophile elements	154
7.3	Processes of concentration and deposition of the granophile elements	156
7.4	Types of mineral deposits genetically related to granitic host rocks	172
7.5	Searching for granophile mineral deposits	175
7.6	Constraints placed on the origin, and largely subsolidus evolution, of granitoid rocks	177

8	Case studies and genetic classifications	179
8.1	Toward acceptable petrogenetic models	179
8.2	Case studies of petrogenetic investigations involving a wide variety of granitoid rocks	183
8.3	On genetic classifications again	215
9	Investigations of granitoid rocks: past, present, and future	222
9.1	Introduction	222
9.2	Where have we been?	222
9.3	Where are we now?	223
9.4	Where are we going?	223
9.5	Final word	227
	Appendix A: Checklist for field observations on granitic rocks	228
	Appendix B: Important collected works on granitoid rocks	234
	References	237
	Index	281
