

Contents

Preface and Acknowledgments

| | |
|---|-----|
| I. Rocks | 3 |
| Minerals and Rocks | 3 |
| Igneous Rocks | 5 |
| Sedimentary Rocks | 9 |
| Problems | 15 |
| References | 16 |
| II. Porous Media | 17 |
| Porosity | 17 |
| Porosity Evolution | 21 |
| Surface Energy | 29 |
| Imbibition and Drainage | 33 |
| Surface Adsorption | 44 |
| Surface Roughness | 47 |
| Problems | 50 |
| References | 52 |
| III. Heterogeneous Media | 53 |
| Micro, Mini, Macro Scales | 53 |
| Calculation of Effective Properties | 56 |
| Percolation | 61 |
| Percolation through a Fractured Medium | 66 |
| Problems | 71 |
| References | 72 |
| IV. Mechanical Behavior of Dry Rocks | 73 |
| Stress and Strain | 73 |
| Deformations | 77 |
| Elastic Behavior | 80 |
| Fracture | 91 |
| Plasticity | 104 |
| Problems | 114 |
| References | 116 |
| V. Circulation of Fluids: Permeability | 117 |
| Darcy's Law and Permeability | 117 |
| Permeability Models | 126 |

| | |
|---|-----|
| Problems | 133 |
| References | 134 |
| VI. Mechanical Behavior of Fluid-Saturated Rocks | 135 |
| Linear Poroelasticity | 135 |
| Fracture | 145 |
| Plasticity | 149 |
| Problems | 157 |
| References | 158 |
| VII. Acoustic Properties | 159 |
| Velocity of Elastic Waves | 159 |
| Attenuation of Acoustic Waves | 168 |
| Velocity Anisotropy | 175 |
| Problems | 180 |
| References | 181 |
| VIII. Electrical Conductivity | 182 |
| Laws and Physical Processes | 182 |
| Conductivity of Rocks | 190 |
| Conductivity Models | 201 |
| Problems | 210 |
| References | 211 |
| IX. Dielectric Properties | 212 |
| Dielectric Polarization | 212 |
| Electromagnetic Waves | 226 |
| Dielectric Properties of Rocks | 233 |
| Problems | 252 |
| References | 253 |
| X. Thermal Conductivity | 254 |
| Law of Heat Conduction | 254 |
| Thermal Conductivity of Minerals | 256 |
| Thermal Conductivity of Rocks | 267 |
| Problems | 276 |
| References | 277 |
| XI. Magnetic Properties | 278 |
| Mineral Magnetism | 278 |
| Rock Magnetization | 288 |
| Problems | 291 |
| References | 292 |
| <i>Index</i> | 293 |
