

# **Applications of Synchrotron Radiation in Low-Temperature Geochemistry and Environmental Science**

## ***Table of Contents***

<b>1</b>	<b>An Overview of Synchrotron Radiation Applications to Low Temperature Geochemistry and Environmental Science</b>	
	<i>Gordon E. Brown, Jr. and Neil C. Sturchio</i>	
INTRODUCTION .....		1
IMPORTANT ISSUES IN LOW TEMPERATURE GEOCHEMISTRY AND ENVIRONMENTAL SCIENCE.....		3
Water and atmospheric or soil gases are ubiquitous in low temperature geochemical and environmental systems .....		3
Knowledge of the molecular-level speciation of trace elements and environmental contaminants and pollutants is critical for understanding their behavior .....		3
Earth and environmental materials are complex .....		4
Complementary characterization methods are necessary .....		5
Parallel studies of real and model systems are essential .....		7
The nature of the solid/water interface and of sorbed species must be known .....		7
Nanoscale earth and environmental materials play a major role in interfacial chemical reactions .....		9
Reaction pathways and kinetics of environmental and low temperature geochemical reactions are of critical importance .....		11
Computational chemistry can play an important role in studies of interfacial reactions .....		11
Inorganic and organic ligands and coatings can have a major impact on the sorption behavior of metal ions as well as on mineral dissolution .....		11
Biota can have a major effect on the speciation and sorption of contaminant and pollutant species .....		13
Molecular-scale mechanisms of bioremediation and phytoremediation of environmental toxins are typically not known .....		13
Scaling of molecular-level observations to mesoscopic and macroscopic phenomena: the “Holy Grail” of low temperature geochemistry and environmental science .....		13
AN OVERVIEW OF SYNCHROTRON RADIATION METHODS USEFUL IN LOW TEMPERATURE GEOCHEMISTRY AND ENVIRONMENTAL SCIENCE .....		15
X-ray absorption fine structure (XAFS) spectroscopy .....		15
X-ray microprobe, spectromicroscopy, and microtomography methods .....		23
X-ray scattering .....		26
X-ray standing wave methods .....		27
X-ray photoemission spectroscopy, X-ray photoelectron diffraction, and X-ray emission spectroscopy .....		28
SR-based infrared spectroscopy .....		30
Comments on sample damage from high intensity synchrotron radiation .....		30

WATER AND METAL IONS IN AQUEOUS SOLUTIONS .....	31
CHEMISTRY AT MINERAL/AQUEOUS SOLUTION INTERFACES.....	35
The initial reaction of water with clean metal oxide surfaces.....	36
The structure of hydrated mineral surfaces.....	38
<i>In situ</i> X-ray reflectivity studies of water structure at mineral/water interfaces.....	40
Comments on the structure and properties of water at solid/aqueous solution interfaces.....	41
XSW and X-ray reflectivity studies of adions and the EDL at mineral/water interfaces .....	43
Sorption reactions of aqueous metal ions with mineral surfaces – the XAFS perspective.....	45
EXAFS studies of metal ion coordination sites in bacterial and fungal cell walls .....	46
Heavy metal speciation and catalysis at biofilm/mineral interfaces .....	47
Examples of SR-based studies of complex environmental samples .....	51
FUTURE SR DEVELOPMENTS AND THEIR POTENTIAL IMPACT ON RESEARCH IN LOW TEMPERATURE GEOCHEMISTRY AND ENVIRONMENTAL SCIENCE.....	64
ACKNOWLEDGMENTS .....	69
REFERENCES .....	69
APPENDIX — TABLES 1 AND 2 .....	107

## 2

### A Brief Overview of Synchrotron Radiation

*T. K. Sham and Mark L. Rivers*

ABSTRACT.....	117
INTRODUCTION .....	117
How does an electron emit light?.....	118
Figures of merit.....	120
SYNCHROTRON STORAGE RINGS .....	120
History of synchrotron radiation .....	123
Bending magnet radiation .....	128
INSERTION DEVICES .....	130
Wiggler radiation .....	130
Undulator radiation .....	131
Important storage ring parameters .....	134
BEAMLINE AND EXPERIMENTAL STATIONS .....	139
Beamline design.....	139
Synchrotron beamlines: general.....	139
OTHER CHARACTERISTICS OF SYNCHROTRON RADIATION .....	140
Polarization .....	140
Time structure .....	142
THE INTERACTION OF LIGHT WITH MATTER .....	142
Scattering .....	142
Absorption .....	143
The overall picture .....	145
ACKNOWLEDGMENTS .....	147
REFERENCES .....	147

### 3

## **X-ray Reflectivity as a Probe of Mineral-Fluid Interfaces: A User Guide**

*Paul A. Fenter*

INTRODUCTION .....	149
Review of relevant literature.....	150
ELEMENTARY SCATTERING THEORY: INTERFERENCE AND BRAGG'S LAW .....	151
Interference and reciprocal space.....	151
SCATTERING INTENSITY AND REFLECTIVITY .....	162
Intrinsic factors .....	164
Sample- and cell-dependent factors .....	167
Spectrometer-dependent factors.....	172
Absolute specular reflectivity .....	176
PRACTICAL ISSUES .....	177
Measuring reflectivity signals.....	177
Surface inhomogeneities.....	182
The spatial resolution of a CTR, or how many data are needed? .....	183
EXAMPLES .....	185
Deconstructing a CTR: the orthoclase(001)-water interface .....	185
Probing large molecule adsorption: stearate monolayers on calcite .....	195
Water structure near the muscovite-water interface.....	198
DEFECT STRUCTURES AT BARITE-WATER INTERFACES.....	201
Observing dissolution reactions in real-time .....	204
SUMMARY, CONCLUSIONS, AND PERSPECTIVES .....	211
Non-specular reflectivity .....	211
Anomalous reflectivity.....	212
Microbeams .....	212
Temporal resolution.....	212
Direct methods .....	213
ACKNOWLEDGMENTS .....	213
REFERENCES .....	213
APPENDIX 1 COMPLEX NUMBERS .....	217
APPENDIX 2 TERMINOLOGY, SYMBOLS AND DEFINITIONS .....	217
APPENDIX 3 STRUCTURE FACTORS.....	219
APPENDIX 4 SPECTROMETER ANGLES AND RECIPROCAL SPACE .....	220

### 4

## **X-ray Standing Wave Studies of Minerals and Mineral Surfaces: Principles and Applications**

*Michael J. Bedzyk and Likwan Cheng*

INTRODUCTION .....	221
X-RAY STANDING WAVES BY BRAGG DIFFRACTION FROM A SINGLE CRYSTAL.....	222
The X-ray standing wave field.....	222
XSW-induced yields from photo-effect.....	227
Extinction effect and evanescent-wave emission.....	228
Structure determination using coherent fraction and coherent position.....	229
“Ideal crystals” vs. “real crystals” in Bragg diffraction XSW .....	232

The special case of back-reflection XSW .....	233
The special case of thin-film Bragg diffraction XSW .....	234
X-RAY STANDING WAVES GENERATED BY TOTAL EXTERNAL REFLECTION .....	235
XSW generated by total external reflection .....	235
X-RAY STANDING WAVES FROM LAYERED SYNTHETIC MICROSTRUCTURES .....	238
EXPERIMENTAL CONSIDERATIONS OF X-RAY STANDING WAVE MEASUREMENTS .....	238
XSW setup at the Advanced Photon Source .....	239
The postmonochromator for XSW experiments .....	239
LOCATING IMPURITY LATTICE SITES IN MINERALS WITH X-RAY STANDING WAVES .....	243
Impurities in minerals .....	243
Mn <sup>2+</sup> lattice sites in calcite .....	243
Phengitic ion sites in muscovite .....	244
ION ADSORPTION STRUCTURES AT MINERAL SURFACES WITH X-RAY STANDING WAVES .....	244
Ion adsorption at the calcite-water interface .....	244
Cation adsorption on calcite .....	245
Molecular anion adsorption on calcite .....	250
Uranyl adsorption on calcite .....	251
PROBING METAL DISTRIBUTIONS IN ORGANIC FILMS WITH X-RAY STANDING WAVES .....	252
Metal in organic films at mineral surfaces .....	252
Zn <sup>2+</sup> in a Langmuir-Blodgett multilayer .....	253
Br <sup>-</sup> location and ordering in self-assembled multilayers .....	254
Pb <sup>2+</sup> partitioning at biofilm-oxide interfaces .....	255
PROFILING THE ELECTRICAL DOUBLE LAYER STRUCTURE WITH X-RAY STANDING WAVES .....	256
The electrical double layer at the solid-water interface .....	256
The diffuse layer profiled with long-period X-ray standing waves .....	257
The condensed layer measured with Bragg-diffraction X-ray standing waves .....	261
CONCLUSION .....	262
ACKNOWLEDGMENTS .....	263
REFERENCES .....	263

## 5

### Grazing-incidence X-ray Absorption and Emission Spectroscopy

*Glenn A. Waychunas*

INTRODUCTION .....	267
Grazing-incidence X-ray methods .....	267
DEFINITIONS .....	268
EARLY STUDIES AND QUANTITATIVE ISSUES .....	272
GI X-RAY ABSORPTION SPECTROSCOPY .....	272
Geometric considerations .....	272
Surface roughness and related effects .....	278
Fresnel analysis of total external reflection and sensitivity factors .....	281
SAMPLE CELLS, SURFACE LIQUIDS AND COVER MEMBRANES .....	283

Sample heating and damage.....	287
Surface symmetry and polarized measurements.....	289
SELF ABSORPTION AND CONTAMINATION PROBLEMS.....	291
DETECTOR LIMITATIONS.....	291
Examples of GI X-ray absorption spectroscopy.....	292
EXPERIMENTS AT SOFT X-RAY ENERGIES; ORGANICS ON SURFACES.....	299
TOTAL REFLECTION X-RAY ANALYSIS (TRXRF) SURFACE CHEMISTRY ANALYSIS.....	300
Comparison with other methods.....	301
Environmental Studies.....	303
Cape Cod aquifer synchrotron TRXRF measurements.....	305
Depth selective analysis.....	308
GRAZING-EXIT X-RAY FLUORESCENCE SPECTROSCOPY (GEXRF).....	308
OPPORTUNITIES FOR FUTURE WORK.....	308
Redox reactions at surfaces.....	308
Lower Z species GI-XAS.....	309
Defects on surfaces.....	310
TRXRF analysis.....	310
CONCLUSIONS.....	310
ACKNOWLEDGMENTS.....	311
REFERENCES.....	311

## 6 Applications of Storage Ring Infrared Spectromicroscopy and Reflection-Absorption Spectroscopy to Geochemistry and Environmental Science

*Carol J. Hirschmugl*

ABSTRACT.....	317
INTRODUCTION.....	317
INTERACTIONS BETWEEN LIGHT AND MATTER.....	319
Dielectric functions, complex indices of refraction and Maxwell's equations.....	319
IR absorption spectroscopy.....	320
INFRARED SYNCHROTRON RADIATION PROPERTIES AND CONSIDERATIONS.....	322
IRSR power.....	322
IRSR brightness.....	322
IRSR polarization and pulsed patterns.....	323
Conservation of brightness: storage ring emittance and experiment throughput.....	323
Diffraction limited infrared imaging.....	326
Spectral reproducibility and signal-to-noise.....	326
Status of IRSR facilities.....	327
APPLICATIONS: IRSR SPECTROMICROSCOPY.....	327
Single cell chemistry.....	328
Spatially resolved chemistry in inhomogeneous materials.....	332
APPLICATIONS: VIBRATIONAL SPECTROSCOPY AT SURFACES.....	336
Fe <sub>3</sub> O <sub>4</sub> -water interface.....	337
SYNOPSIS.....	338
ACKNOWLEDGMENTS.....	338
REFERENCES.....	338

# 7

## Quantitative Speciation of Heavy Metals in Soils and Sediments by Synchrotron X-ray Techniques

*Alain Manceau, Matthew A. Marcus,  
and Nobumichi Tamura*

INTRODUCTION .....	341
Chemical forms of metals in soils.....	342
ANALYTICAL APPROACH.....	348
Electrons vs. X-rays.....	348
Synchrotron-based X-ray radiation fluorescence (SXRF) .....	350
X-ray diffraction (XRD) .....	359
Extended X-ray absorption fine structure (EXAFS) spectroscopy .....	365
Tips, tricks and cautions for hard X-ray microprobe users.....	386
APPLICATION TO HEAVY METAL SPECIATION .....	398
Speciation of metal(loid)s in the contaminated environment .....	398
Speciation of trace metal(loid)s in uncontaminated soils .....	409
CONCLUDING REMARKS .....	419
ACKNOWLEDGMENTS .....	420
REFERENCES .....	420

# 8

## Microfluorescence and Microtomography Analyses of Heterogeneous Earth and Environmental Materials

*Stephen R. Sutton, Paul M. Bertsch,  
Matthew Newville, Mark Rivers,  
Antonio Lanzirotti and Peter Eng*

INTRODUCTION .....	429
X-RAY MICROPROBE ANALYSIS .....	430
Hard X-ray microprobes in the U.S. ....	430
X-ray fluorescence process .....	431
Synchrotron X-ray microprobe instrumentation .....	432
Sample preparation .....	436
Choice of excitation energy .....	436
Detector optimization.....	437
Data collection .....	437
Data analysis .....	439
Current capabilities .....	446
MICROTOMOGRAPHY .....	446
Microtomography facilities in the US.....	446
Basic principles.....	446
Instrumentation .....	447
Sample preparation and experiment setup .....	448
Data collection .....	449
Data processing.....	450
Current capabilities .....	451
APPLICATIONS .....	451

Microbial processes and biomineralization.....	452
Plant rhizosphere processes .....	455
Biota collected from contaminated environments .....	458
Vadose zone processes.....	464
Fluid transport.....	468
Hydrothermal fluids and seawater .....	470
Extraterrestrial materials .....	472
FUTURE DIRECTIONS .....	477
ACKNOWLEDGMENTS .....	477
REFERENCES .....	478

## 9

### Soft X-ray Spectroscopy and Spectromicroscopy Studies of Organic Molecules in the Environment

*Satish C. B. Myneni*

INTRODUCTION .....	485
SOFT X-RAY SPECTROSCOPY & CHEMICAL BONDING IN ORGANIC MOLECULES.....	486
INSTRUMENTATION FOR STUDYING ORGANIC MOLECULES .....	490
Probing the 1s electronic transitions of C, N and O.....	492
Probing the 1s electronic transitions of P, S and Cl.....	494
Detection limits.....	495
Soft X-ray spectromicroscopy facilities.....	495
FUNCTIONAL GROUP CHEMISTRY OF ORGANIC MOLECULES .....	498
C functional groups.....	498
N functional groups.....	504
O functional groups.....	515
P functional groups .....	515
S functional groups .....	520
Cl functional groups.....	533
APPLICATIONS OF SPECTROMICROSCOPY FOR STUDIES ON ORGANIC MOLECULE AGGREGATES .....	545
SUMMARY AND FUTURE DIRECTIONS .....	549
ACKNOWLEDGMENTS .....	549
REFERENCES .....	549
APPENDIX — TABLES 1-5 .....	559
