

# MEDICAL MINERALOGY *and* GEOCHEMISTRY

64

*Reviews in Mineralogy and Geochemistry*

64

## TABLE OF CONTENTS

### **1 The Emergent Field of Medical Mineralogy and Geochemistry**

*Nita Sahai, Martin A. A. Schoonen, H. Catherine W. Skinner*

OVERVIEW .....	1
REFERENCES .....	3

### **2 The Toxicological Geochemistry of Earth Materials: An Overview of Processes and the Interdisciplinary Methods Used to Understand Them**

*Geoffrey S. Plumlee,  
Suzette A. Morman,  
Thomas L. Ziegler*

INTRODUCTION .....	5
EARTH MATERIALS LINKED OR POTENTIALLY LINKED TO HUMAN HEALTH.....	6
FACTORS INFLUENCING THE HEALTH EFFECTS OF EARTH MATERIALS .....	7
Intensity and duration of exposure (the dose) .....	11
Exposure route.....	11
Physical and chemical characteristics of the earth material .....	19
Potential microbial, parasitic pathogens present in the earth material .....	19
Fluid compositions and chemical environments present along the exposure route ....	20
Biosolubility and bioreactivity of earth materials in body fluids .....	24
Immune system mechanisms.....	26
Physiological processes by which potential toxicants from earth materials are absorbed, distributed, metabolized, and/or eliminated by the body (ADME)....	28
Extent to which earth materials or their contained toxicants can generate reactive oxygen species.....	29
Susceptibility of the exposed individual .....	30
Summary—an overview of how earth materials can cause toxicity.....	31
INTEGRATING EARTH AND HEALTH SCIENCE METHODS TO ASSESS THE HEALTH EFFECTS OF EARTH MATERIALS .....	32
ASBESTOS.....	36

Current views on how asbestos causes toxicity.....	40
Aspects of asbestos toxicity that are still under debate .....	40
Opportunities for further integrated health and earth science research on asbestos....	42
UPTAKE OF HEAVY-METAL TOXICANTS FROM EARTH MATERIALS .....	45
Uptake of lead from earth and environmental materials .....	45
SUMMARY .....	50
REFERENCES .....	51

### 3

## Metal Speciation and Its Role in Bioaccessibility and Bioavailability

*Richard J. Reeder,  
Martin A. A. Schoonen,  
Antonio Lanzirotti*

INTRODUCTION .....	59
METAL SPECIATION CONCEPTS.....	60
SIGNIFICANCE OF SPECIATION .....	61
ROLE OF METALS IN HUMAN HEALTH AND METAL TOXICITY CONCEPTS.....	62
BIOAVAILABILITY AND BIOACCESSIBILITY CONCEPTS .....	63
PATHWAYS OF METAL UPTAKE—FROM SOIL, WATER, AND AIR TO HUMAN ORGANS .....	66
Environmental processes .....	66
Internal processes .....	70
ROLE OF METAL SPECIATION: ARSENIC .....	71
Arsenic in the environment.....	72
Arsenic in the body .....	77
ROLE OF METAL SPECIATION: CHROMIUM .....	79
Chromium in the environment .....	79
Chromium in the body .....	81
ROLE OF METAL SPECIATION: LEAD .....	83
Lead in the environment .....	83
Lead in the body .....	88
ROLE OF METAL SPECIATION: MERCURY .....	91
Mercury in the environment .....	91
Mercury in the body .....	95
METHODS FOR CHARACTERIZATION OF METAL SPECIATION .....	95
Equilibrium modeling.....	96
Sequential extraction of solid species.....	96
Electrochemical methods: voltammetry and polarography .....	97
Liquid membrane techniques .....	97
Liquid chromatography .....	97
Capillary electrophoresis .....	98
Inductively coupled mass spectrometry (ICP-MS) .....	98
Magnetic spectroscopies (NMR, EPR, and Mössbauer spectroscopy) .....	98
X-ray diffraction and X-ray absorption spectroscopy .....	99

FUTURE RESEARCH AND ROLE OF GEOCHEMISTS .....	99
ACKNOWLEDGMENTS.....	100
REFERENCES .....	100
APPENDIX 1 .....	110

## 4

### Aluminum, Alzheimer's Disease and the Geospatial Occurrence of Similar Disorders

*Daniel P. Perl, Sharon Moalem*

INTRODUCTION .....	115
ALUMINUM AND ALZHEIMER'S DISEASE.....	115
IRON, ALUMINUM AND PARKINSON'S DISEASE.....	119
ALUMINUM-IRON AND AGE-RELATED NEURODEGENERATIVE DISORDERS, GENE-ENVIRONMENTAL INTERACTIONS.....	121
GUAM AMYOTROPHIC LATERAL SCLEROSIS/PARKINSONISM-DEMENTIA COMPLEX AND RELATED FOCI .....	122
ACKNOWLEDGMENTS.....	130
REFERENCES .....	130

## 5

### Potential Role of Soil in the Transmission of Prion Disease

*P. T. Schramm, C. J. Johnson,  
N. E. Mathews, D. McKenzie,  
J. M. Aiken, J. A. Pedersen*

BACKGROUND ON PRION DISEASES .....	135
Etiology of prion diseases .....	136
Resistance of prions to inactivation.....	138
ENVIRONMENTAL RESERVOIRS OF PRION INFECTIVITY .....	140
Epizootological and experimental evidence .....	140
Hypothesized environmental reservoirs .....	140
Soil as an environmental reservoir of prion infectivity .....	140
Introduction of prions into soil environments .....	141
Persistence of prions in soil.....	141
Retention of bioactivity by prions in soils.....	143
Mobility of prions in soils .....	144
Animal exposure through soil ingestion.....	145
Levels of infectivity in soils .....	146
CONCLUSIONS.....	146
ACKNOWLEDGMENTS.....	147
REFERENCES .....	147

## 6 Interaction of Iron and Calcium Minerals in Coals and their Roles in Coal Dust-induced Health and Environmental Problems

*Xi Huang, Terry Gordon,  
William N. Rom, Robert B. Finkelman*

ABSTRACT .....	153
INTRODUCTION .....	153
PATHOLOGIES AND CLINICAL DIAGNOSIS OF CWP .....	155
EPIDEMIOLOGICAL STUDIES ON CWP .....	156
PHYSICO-CHEMICAL CHARACTERISTICS THOUGHT TO BE IMPORTANT IN COAL DUST-INDUCED CWP .....	158
Quartz .....	158
Coal rank .....	158
Carbon-centered free radicals .....	159
Transition metals .....	159
Bioavailable iron (BAI) .....	160
OTHER ENVIRONMENTAL PROBLEMS RELATED TO COAL USE .....	165
Coal fly ash (CFA)-induced lung diseases .....	165
Role of pyrite oxidation in acid mine drainage .....	166
Role of pyritic sulfur in acid rain .....	167
PATHOGENESIS OF COAL DUST-INDUCED LUNG INJURY .....	168
Oxidative stress .....	168
Oxidative property of coal dusts .....	168
Oxidants, cytokines, and growth factors in CWP .....	168
Oxidant-signaling in cytokine formation and CWP .....	170
ACKNOWLEDGMENT .....	172
REFERENCES .....	172

## 7 Mineral-Induced Formation of Reactive Oxygen Species

*Martin A. A. Schoonen, Corey A. Cohn,  
Elizabeth Roemer, Richard Laffers,  
Sanford R. Simon, Thomas O’Riordan*

INTRODUCTION .....	179
PART I: BACKGROUND .....	180
Formation, function and reactivity of ROS species and related oxidants .....	183
Enzymatic formation of oxidants .....	183
Thermodynamics of ROS .....	187
Analytical methods to determine ROS .....	189
PART II: MECHANISMS OF MINERAL-INDUCED ROS FORMATION .....	195
Homogeneous catalysis of ROS (trans)formation by dissolved metal ions (mechanism 1) .....	195
Mineral surface-promoted formation of ROS by catalysis of O <sub>2</sub> reduction (mechanism 2) .....	198

Mineral defect-driven formation of ROS (mechanism 3).....	203
Cellular particle-induced formation of ROS (mechanism 4) .....	205
Minerals as carriers of ROS stimulants (mechanism 5) .....	209
PART III: SILICOSIS AS AN EXAMPLE OF A MINERAL-INDUCED DISEASE .....	209
Mineralogy .....	210
Surface chemistry .....	211
Metal impurities and Co-exposures .....	212
PART IV: CONCLUDING REMARKS .....	212
ACKNOWLEDGMENTS.....	212
REFERENCES .....	213

## 8

### **Bone: Nature of the Calcium Phosphate Crystals and Cellular, Structural, and Physical Chemical Mechanisms in Their Formation**

*Melvin J. Glimcher*

INTRODUCTION .....	223
BASIC TERMINOLOGY AND CONCEPTS OF BONE FORMATION .....	224
Bone as an organ and a tissue .....	224
Bone formation and turnover.....	224
Maturation of the crystals and organic matrix constituents of bone .....	227
CELLULAR PATHWAYS OF BONE FORMATION.....	229
STRUCTURAL PROPERTIES OF BONE .....	232
CHARACTERIZING THE MINERAL PHASE OF BONE .....	234
The mineral content of bone substance .....	234
Importance of experimental resolution and bone sample volume .....	235
Size and shape of bone crystals .....	236
The mineral phase of bone nanocrystals .....	237
Biological significance of nanocrystal surfaces: “form follows function” .....	238
BONE NANOCRYSTAL GROWTH .....	239
Chemical composition of bone nanocrystals.....	239
MECHANISMS OF BIOLOGICAL CALCIFICATION.....	241
Posing the problem .....	241
Homogeneous nucleation mechanism .....	241
Heterogeneous nucleation mechanism .....	243
Structure and hierarchical organization of the collagen matrix and Ca–Pi crystals .....	245
Combined mechanisms: role of non-collagenous proteins.....	259
OTHER NORMALLY MINERALIZED TISSUES .....	261
Dentin and enamel.....	261
Amelogenin, the major protein of enamel.....	262
Calcified cartilage.....	266
SIGNIFICANT IMPLICATIONS OF THE STRUCTURAL ORGANIZATION OF MINERALIZED TISSUES.....	266
Mineralized tissues as composite materials.....	266

Spatial architecture and volume of space to house the Ca–Pi crystals.....	267
“AMORPHOUS” VERSUS CRYSTALLINE CALCIUM-PHOSPHATE: CONCEPTUAL AND EXPERIMENTAL DEFINITIONS IN THE NANO-WORLD .....	268
THE CHEMISTRY AND STRUCTURE OF INORGANIC SYNTHETIC AND GEOGENIC APATITES .....	272
ACKNOWLEDGMENTS.....	274
REFERENCES .....	274

## 9

### **Silicate Biomaterials for Orthopaedic and Dental Implants**

*Marta Cerruti, Nita Sahai*

INTRODUCTION .....	283
Historical background .....	284
Classification of biomaterials according to the interface formed with tissue.....	286
Bioactive materials .....	287
SILICATE BIOACTIVE GLASSES.....	288
Melt-derived bioactive glasses .....	288
Sol-gel derived bioactive glasses.....	288
Deposition of HAP on pure silica gel.....	290
MECHANISM OF HCA LAYER DEPOSITION ON SILICATE GLASSES.....	291
Hench’s hypothesis.....	291
GLASS STATE AND BIOACTIVITY .....	291
Glass structure .....	291
Glass surface.....	292
Relation of glass structure and surface to bioactivity .....	293
SILICATE BIOCERAMICS .....	294
Experimental studies .....	294
Nucleation site and reaction mechanism for HCA layer deposition on pseudowollastonite and bioactive glasses .....	295
Bioactivity of diopside and wollastonite .....	298
General hypothesis for bioactivity of any material .....	298
Surface charge and diffuse layer potential .....	300
Relationship between proposed active-site density, porosity, bioactivity of gel- derived bioactive glasses .....	300
EFFECTS OF SOLUTIONS USED TO TEST <i>IN VITRO</i> BIOACTIVITY .....	300
INTERACTIONS WITH CELLS .....	302
METHODS FOR CHARACTERIZATION OF BIOACTIVE MATERIALS.....	304
Spectroscopic and microscopic methods for characterizing of bioceramics.....	304
Computational modeling.....	306
FUTURE DEVELOPMENT OF BIOCERAMICS: BIOCOMPOSITES AND TISSUE- ENGINEERING.....	306
Analogous reactions in the human body and in some geochemical environments .....	307
ACKNOWLEDGMENTS.....	307
REFERENCES .....	307

# 10

## Living Cells in Oxide Glasses

*Jacques Livage, Thibaud Coradin*

INTRODUCTION .....	315
SILICA AND LIVING ORGANISMS: THE EXAMPLE OF DIATOMS .....	316
BIOENCAPSULATION IN SOL-GEL SILICA .....	318
SILICA GELS FOR WHOLE CELL ENCAPSULATION .....	319
Cell encapsulation in silica .....	319
Bacteria .....	321
APPLICATIONS OF SOL-GEL ENCAPSULATED LIVING CELLS .....	324
Biosensors, bioreactors .....	324
Artificial organs .....	326
COMPARISON WITH INDUCED SILICA MINERALIZATION .....	327
PERSPECTIVES .....	328
ACKNOWLEDGMENTS .....	329
REFERENCES .....	329
