
Contents

Chapter 1

Application of GIS to Integrated Pest Management on U.S. Fish and Wildlife Service Land.....	1
<i>Bruce Seelig and James Alfonso</i>	

Chapter 2

Nitrogen Management in Sugar Beet Using Remote Sensing and GIS.....	35
<i>David W. Franzen</i>	

Chapter 3

Using Historical Management to Reduce Soil Sampling Errors.....	49
<i>David E. Clay, N. Kitchen, C. Gregg Carlson, Jonathan Kleinjan, and Jiyul Chang</i>	

Chapter 4

Developing Productivity Zones from Multiple Years of Yield Monitor Data.....	65
<i>Jonathan Kleinjan, David E. Clay, C. Gregg Carlson, and Sharon A. Clay</i>	

Chapter 5

Site-Specific Weed Management in Growers' Fields: Predictions from Hand-Drawn Maps.....	81
<i>Lori J. Wiles, R. Bobbitt, and Philip Westra</i>	

Chapter 6

Map Quality Assessment for Site-Specific Fertility Management	103
<i>T.G. Mueller</i>	

Chapter 7

Gleaning More Information from Yield Data	121
<i>T.S. Murrell, Q.B. Rund and H.F. Reetz, Jr.</i>	

Chapter 8

Soil Salinity Mapping Using ArcGIS	141
<i>Florence Cassel S.</i>	

Chapter 9

Using GIS and On-the-Go Soil Strength Sensing Technology for Variable-Depth Tillage Assessment.....	163
<i>Pedro Andrade-Sanchez and Shrinivasa K. Upadhyaya</i>	

Chapter 10

Collocating Multiple Self-Generated Data Layers	185
<i>Viacheslav I. Adamchuk and Chenguang Wang</i>	

Index	197
