

Contents

Editors' Preface	7
Authors' Preface	8
1. Architecture of the Soil World (B.N.K. Davis & D.F. Ball)	10
The soil surface and superficial plant remains	10
Humus	14
The mineral skeleton	17
Clays and soil chemistry	20
Soil pores, atmosphere and water	23
2. The Variety of Soils in Britain (D.F. Ball)	28
Soil-forming factors	31
Soil classification	37
3. Roots (A.H. Fitter)	44
Mycorrhizas	49
Root nodules	54
4. The Soil Fauna: Arthropods (B.N.K. Davis)	57
Soil micro-arthropods	58
Mites	58
Collembola	62
Woodlice and soil habitats	65
Millipedes and centipedes	69
Millipedes	69
Centipedes	72
Spiders	73
Vegetarian insects	76
Beetles as predators	80
Ants and ant-hills	84
5. Other Soil Animals (B.N.K. Davis)	89
Earthworms	89
Soil nematodes	94
Snails and slugs	97
Moles	100

6. Bacteria and Other Microorganisms of the Soil (N. Walker)	105
Activities of soil microbes	113
Fungi, yeasts, actinomycetes and algae	121
7. Natural Habitats (D.F. Ball & B.N.K. Davis)	126
Woodlands	127
Moorland and hill	129
Grassland habitats	132
8. Agricultural Soils: Productivity and Management (B.N.K. Davis)	138
A brief history	139
Cultivation	141
Fertilizers	143
Field drainage and irrigation	148
Straw disposal	152
Postscript	155
9. Agricultural Soils: A Sideways Look (B.N.K. Davis & N. Walker)	156
Cultivation	156
Pesticides	157
Breakdown of pesticides	162
Leaching of nitrates	164
Erosion	165
Organic farming	169
10. Reclamation and Restoration (B.N.K. Davis)	171
Natural processes	171
Soil reclamation	177
Selected References and Further Reading	186
Index	190
