

Contents

Preface xi

Acknowledgments xv

1 *Introduction: The Fitness of the Soil Environment*

Water as a Constituent of Soil 1

Elemental Constitution of Soil 5

How Soils Are Formed 6

Profile Development 6

Soil Texture 10

Clay Mineral Structure 11

Soil Structure 12

Summary 14

2 *Primary Production Processes in Soils*

Introduction 17

The Primary Production Process 18

Methods of Sampling 19

Destructive Techniques 19

The Harvest Method 19

Isotope Dilution Method 20

Root Ingrowth Technique 21

Nondestructive Techniques 23

Additional Sources of Primary Production	26
Symbiotic Associates of Roots	26
Mycorrhiza Structure and Function	26
Carbon Allocation in the Root/Rhizosphere	28
Carbon Allocation Costs of Development and Maintenance of Symbiotic Associations with Roots	29
Future Research on Roots and Belowground Processes	31
Summary	31

3 *Secondary Production: Activities of Heterotrophic Organisms—Microbes*

Introduction	33
Compounds Being Decomposed	34
Microbial Activities in Relation to Catabolism in Soil Systems	34
Techniques for Measuring Microbial Production and Turnover	38
Direct Measures of Numbers and Biomass	38
Indirect Measures of Biomass	39
<i>Chemical Methods</i>	<i>39</i>
<i>The Chloroform Fumigation and Incubation Technique (CFI)</i>	<i>39</i>
<i>Chloroform Fumigation and Extraction Procedure (CFE)</i>	<i>40</i>
<i>Physiological Methods</i>	<i>42</i>
<i>Additional Physiological Methods of Measuring Microbial Activity</i>	<i>43</i>
<i>Enzyme Assays and Measures of Biological Activities in Soils</i>	<i>44</i>
Direct Methods of Determining Biological Activity	46
Soil Sterilization and Partial Sterilization Techniques	47
Conceptual Models of Microbes in Soil Systems	47
Summary	47

4 **Secondary Production: Activities of Heterotrophic Organisms—The Soil Fauna**

Introduction 51

Microfauna 55

Flagellates 56

Naked Amoebae 56

Testate Amoebae 56

Ciliates 57

Methods for Extracting and Counting

Protozoa 58

Distribution of Protozoa in Soil Profiles 58

Impacts of Protozoa on Ecosystem Function 59

Mesofauna 59

Rotifera 59

Features of Body Plan and General Ecology 60

Nematoda 61

Nematode Feeding Habits 61

Nematode Zones of Activity in Soil 63

Nematode Extraction Techniques 63

Tardigrada 65

Collembola 68

Collembolan Feeding Habits 70

Mites 72

Oribatei 72

Prostigmata 78

Mesostigmata 79

Astigmata 81

Other Microarthropods 83

Protura 83

Diplurans 83

Pseudoscorpions 83

Symphylids 84

Pauropoda 84

Enchytraeidae 84

Macrofauna 86

Macroarthropods 86

Isopods 87

Diplopoda 88

Chilopoda 89

Scorpions 91

Araneae 91

Opiliones 92

<i>Other Apterygota</i>	92
<i>Oligochaeta: Earthworms</i>	98
General Attributes of Fauna in Soil	
Systems	105
Summary	106

5 *Decomposition and Nutrient Cycling*

Introduction	109
Integrating Variables	110
Climate and Litter Breakdown	111
Dynamics of Litter Breakdown	113
Direct Measurement of Litter Breakdown	114
Patterns of Mass Loss during	
Decomposition	120
Effects of Fauna on Litter Breakdown	
Rates	124
Nutrient Movement during	
Decomposition	125
Role of Soil Fauna in Organic Matter Dynamics	
and in Nutrient Turnover	128
Fauna and Nutrient Cycling	134
Faunal Impacts in Applied Ecology:	
Agroecosystems	134
Applied Ecology in Forested	
Ecosystems	136
Summary	139

6 *Detritivory and Microbivory in Soils*

Introduction	141
Physiological Ecology of Soil	
Organisms	143
Energy Available for Detrital Food	
Chains and Webs	146
Arenas of Interest	148
A Hierarchical Approach to Organisms	
in Soils	151
Future Research Prospects	152
Summary	153

7	<i>Future Developments in Soil Ecology</i>
	Introduction 155
	Roles of Soils in Global Change 155
	Functional Dynamics of Soils in Relation to Global Change 158
	Roles of Soils in the Global Carbon Cycle 159
	Problems in Modeling Soil Carbon Dynamics 162
	Biological Interactions in Soils, and Global Change 163
	A Hierarchical View of Soil Ecology 164
	Biodiversity and Soil Ecology 164
	Soils and "Gaia": Possible Mechanisms for Evolution of "The Fitness of the Soil Environment"? 167
