

# TABLE OF CONTENTS

|                                                                                                                      |    |
|----------------------------------------------------------------------------------------------------------------------|----|
| Preface . . . . .                                                                                                    | 7  |
| Introduction . . . . .                                                                                               | 11 |
| 1. Some Theories of Language in Philosophy . . . . .                                                                 | 15 |
| 1.1. Philosophers' Preoccupation with Meaning . . . . .                                                              | 15 |
| 1.1.1. The Claim that the Notions of Truth and Reference are Central to the Semantics of Natural Languages . . . . . | 17 |
| 1.1.2. A Central Claim in Frege's Theory of Language . . . . .                                                       | 21 |
| 1.1.3. Sense and Reference, Meaning and Denotation . . . . .                                                         | 22 |
| 1.2. Formal Semantics . . . . .                                                                                      | 27 |
| 1.2.1. First Order Predicate Calculus and the Semantics of Natural Languages . . . . .                               | 29 |
| 1.2.2. The Semantics of Sense and Denotation . . . . .                                                               | 31 |
| 1.2.3. Possible World Semantics . . . . .                                                                            | 32 |
| 1.2.4. Montague Semantics . . . . .                                                                                  | 36 |
| 1.2.5. Beyond Montague . . . . .                                                                                     | 38 |
| 1.2.6. Problems with Montague's System . . . . .                                                                     | 39 |
| 1.2.7. Singular Terms . . . . .                                                                                      | 47 |
| 1.3. The Epistemology of Theories of Language . . . . .                                                              | 51 |
| 1.3.1. Rules, Regularities, and Tacit Knowledge . . . . .                                                            | 52 |
| 1.3.2. Linguistic Intentions . . . . .                                                                               | 53 |
| 1.3.3. Psychological Reality . . . . .                                                                               | 54 |
| 1.3.4. Rationalism and Empiricism . . . . .                                                                          | 54 |
| 2. The Relation of Theories of Language to Linguistics . . . . .                                                     | 57 |
| 2.1. The Syntax of Natural Languages . . . . .                                                                       | 57 |
| 2.1.1. Mathematical Foundations, the Formal Power of Grammars . . . . .                                              | 59 |
| 2.1.2. Explanations and Rules in Syntax . . . . .                                                                    | 61 |
| 2.1.3. The Myth of Pure Semantic Representation . . . . .                                                            | 64 |
| 2.1.4. Biological Foundations and Universals . . . . .                                                               | 66 |
| 2.1.5. Transformational Relatedness . . . . .                                                                        | 67 |
| 2.2. The Syntax of Natural and Artificial Languages . . . . .                                                        | 69 |
| 2.2.1. Syntactic Evidence . . . . .                                                                                  | 70 |
| 2.2.2. Logical Form . . . . .                                                                                        | 72 |

|                                                                         |    |
|-------------------------------------------------------------------------|----|
| 2.2.3. Autonomy of Syntax . . . . .                                     | 76 |
| 2.2.4. Semantics in Linguistics . . . . .                               | 78 |
| 2.3. Psychological Reality of Rules . . . . .                           | 81 |
| 2.3.1. Innateness . . . . .                                             | 82 |
| 2.3.2. Epistemology Again . . . . .                                     | 84 |
| 3. Conclusions . . . . .                                                | 85 |
| 3.1. On Semantics . . . . .                                             | 85 |
| 3.2. On Syntax . . . . .                                                | 87 |
| 3.3. Syntax and Semantics . . . . .                                     | 88 |
| 3.4. What Linguistics and Philosophy Can Do for Each<br>Other . . . . . | 89 |
| Bibliography . . . . .                                                  | 92 |
| Index . . . . .                                                         | 95 |
