Preface by <i>A. H. Schumann, M. C. Acreman, R. Davis, M. A. Marino, D. Rosbjerg & Xia Jun</i>	v
--	---

1 Lessons Learned from Past Management Practices

Measures of sustainability and their utilization in practical water management planning (keynote paper) <i>Slobodan P. Simonovic</i>	3
Sustainable reservoir development—a case study from Zimbabwe <i>Simon Tadiwa Makoni, Thomas Rodding Kjeldsen & Dan Rosbjerg</i>	17
Sustainable regional water management in the Yamuna River basin: case study of the Delhi region (India) <i>R. B. Singh</i>	25
Limpopo River: steps towards sustainable and integrated water resources management <i>R. A. Jean Boroto</i>	33
Enlightenment on sustainable management of water resources from past practices in the Bositeng Lake basin, Xinjiang, China <i>Xia Jun, Zuo Qiting & Pang Jinwu</i>	41
Indira Gandhi Nahar Pariyojana—lessons learnt from past management practices in the Indian arid zone <i>K. D. Sharma</i>	49
Implementation of new tasks for old dams: a non-trivial problem <i>Gert A. Schultz & Andreas H. Schumann</i>	57
Integrated approach for water resources management in the Delhi region: problems and perspective <i>P. S. Datta, S. K. Rohilla & S. K. Tyagi</i>	65
Effects of damming the Hadejia River in semiarid northern Nigeria—lessons learnt for future management <i>B. J. M. Goes</i>	73
Sustainability characterization and modelling of water supply management practices <i>Carlos Oliveira Galvão, Janiro Costa Rêgo, Márcia Maria Rios Ribeiro & José do Patrocínio Tomaz Albuquerque</i>	81
Current understanding of the eutrophication process in Australia <i>J. R. Davis & K. Koop</i>	89
An urban water scenario: a case study of the Bangalore metropolis, Karnataka, India <i>T. S. Suresh</i>	97

2 Sustainable Regional Water Management for Conflicting Interests

A framework for assessing the sustainability of a water resources system <i>Thomas Rodding Kjeldsen & Dan Rosbjerg</i>	107
Development of methodologies for setting integrated water quantity and quality objectives for the protection of aquatic ecosystems <i>Heather MacKay</i>	115
Towards the sustainable management of groundwater-fed catchments in Europe <i>Mike Acreman</i>	123
Variation des ressources souterraines du Dobrogea du Sud (Roumanie), effet conjugué des causes climatiques et anthropiques <i>Augustin Tenu, Florin Davidescu, Razvan Petres & Gabriela Stanescu</i>	131
Is the clearing of riparian alien invasive vegetation a viable water resources management strategy? <i>Steve Gillham & Mike Haynes</i>	139

Monitoring—the neglected key to improving environmental management <i>Ian Cordery</i>	147
Shifting system boundaries in vision-building for river basin management <i>Annemiek J. M. Verhallen, Marc Huygens, Martine Ruijgh-van der Ploeg, Gabrielle Bouleau & Patrick Meire</i>	155
3 Tools for Water Resources Management	
Conjunctive management of surface water and groundwater (keynote paper) <i>Miguel A. Mariño</i>	165
Opportunities for balancing conflicting economic, social and environmental pressures on river basins through an integrated approach with stakeholder involvement <i>Susan Walker</i>	175
Using stakeholder analysis to increase the effectiveness and relevance of water resources systems modelling <i>Leon M. Hermans</i>	183
The use of role-playing in integrated water management <i>Anne Ubbels & Annemiek J. M. Verhallen</i>	191
Competition for water resources of the Volta basin <i>Nick van de Giesen, Marc Andreini, Annette van Edig & Paul Vlek</i>	199
Spatially-oriented methodology for management of complex hydro-environments: the Senegal delta situation <i>Philippe Gourbesville, Stéphanie Duvail & Michel Mietton</i>	207
An integrated model for water resources management at basin level <i>Francesco Mannocchi, Francesca Todisco & Stefano Casadei</i>	215
Improving the quality of model-based decision support: Good Modelling Practice in water management <i>H. Scholten, R. H. van Waveren, S. Groot, F. C. van Geer, J. H. M. Wösten, R. D. Koeze & J. J. Noort</i>	223
Hydrological criteria for durable water systems <i>Victor Jan Witter & Tim Raats</i>	231
River flow prediction: an artificial neural network approach <i>A. W. Jayawardena & T. M. K. G. Fernando</i>	239
Probabilistic characterization of uncertainties of climate change impact assessments <i>A. H. Schumann & M. Antl</i>	247
A field-based hydrological model to study the impacts of urbanization on regional water resources <i>Jens Lange, Chris Leibundgut, Samar Husary, Ronit Nativ, Marwan A. Hassan, Asher P. Schick</i>	255
Development of a metamodel for large-scale assessment of water and nutrient fluxes—first components and initial tests for the Elbe River basin <i>U. Haberlandt, V. Krysanova, B. Klöcking, A. Becker & A. Bárdossy</i>	263
Methodology development for wetland restoration planning based on topography and soil hydrology <i>Francien van Soest, Andrew Williams, Robert Parkinson & Martin Kent</i>	271
Effects of grazing on soil properties and hydrology of a small Dartmoor catchment, southwest England <i>E. W. Meyles, A. G. Williams, J. L. Ternan & J. M. Anderson</i>	279
Key word index	287
