## 1 The Assessment of Global Trends in Land Degradation

*Uriel N. Safriel*

1.1	Introduction . . . . .	2
1.1.1	Land degradation – what is it and how is it assessed . . . . .	2
1.1.2	The need for assessment at a global scale . . . . .	3
1.1.3	Assessment of land degradation at the global scale . . . . .	4
1.2	Assessment of current degradation. . . . .	5
1.2.1	Global land degradation and dryland desertification. . . . .	5
1.2.2	Is land degradation in drylands different than that in the non-drylands? . . . . .	7
1.2.3	Degradation degree and degradation severity . . . . .	11
1.2.4	The Spatial extent of global land degradation . . . . .	18
1.2.5	The spatial extent of dryland degradation . . . . .	18
1.2.6	Degradation and degradation vulnerability . . . . .	19
1.2.7	Degradation vulnerability and degradation risk . . . . .	20
1.3	Remote-sensing of productivity for assessing global degradation . . . . .	23
1.3.1	Soil or vegetation assessment? . . . . .	23
1.3.2	Degradation as a persistent reduction in land productivity . . . . .	26
1.3.3	Assessing degradation as deviation of productivity from its potential . . . . .	27
1.4	Assessment of degradation trends . . . . .	30
1.4.1	Rain Use Efficiency methodology . . . . .	31
1.4.2	The Residual Trends methodology . . . . .	34
1.5	Conclusions . . . . .	35
	Acknowledgements. . . . .	36
	References . . . . .	36

## 2 Status and Trends in Land Degradation in Africa

*Lamourdia Thiombiano and Ignacio Tourino-Soto*

2.1	Introduction . . . . .	39
2.2	Evaluating the trends in land degradation in Africa. . . . .	40
2.2.1	Diversity of Agro-ecological zones, soils and land use systems . . . . .	40
2.2.2	Methodological approach to estimate land degradation extent in Africa . . . . .	42

2.2.3 Extent and trend of land degradation in Africa according to agro-ecological zones . . . . .	44
2.2.4 Extent and trend of land degradation in the main river basins . . . . .	44
2.3 Estimates of soil loss . . . . .	48
2.4 Discussion . . . . .	49
Conclusions . . . . .	50
References . . . . .	51

### **3 Status and Trends in Land Degradation in Asia**

*Hong Ma, Hongbo Ju*

3.1 Introduction . . . . .	55
3.2 Desertification Monitoring and Assessment in Asia . . . . .	56
3.3 Status and Trends in Land Degradation in Asia . . . . .	58
3.3.1 West Asia . . . . .	58
3.3.2 South Asia . . . . .	59
3.3.3 Central Asia . . . . .	60
3.4 Causes of land degradation in Asia . . . . .	61
3.4.1 Increasing population . . . . .	61
3.4.2 Increasing pressure on land . . . . .	61
3.4.3 Decline in soil and water resources . . . . .	62
3.4.4 Decline in natural forests and grasslands . . . . .	62
3.4.5 Increasing atmospheric carbon and changing climate . . . . .	63
3.4.6 Deterioration in the living conditions for many people . . . . .	63
3.5 Conclusions . . . . .	63
Acknowledgments . . . . .	64
References . . . . .	64

### **4 Trends in Land Degradation in Latin America and the Caribbean, the Role of Climate Change**

*Fernando Santibáñez and Paula Santibáñez*

4.1 Introduction . . . . .	66
4.2 Soils . . . . .	66
4.3 Biodiversity . . . . .	67
4.4 Water . . . . .	67
4.5 Human drivers and ecosystems . . . . .	68
4.6 Desertification . . . . .	69
4.7 Present trends of Climate . . . . .	70
4.8 Ecosystems . . . . .	72
4.9 Agriculture . . . . .	74
References . . . . .	79

<b>5</b>	<b>Trends in Land Degradation in Europe</b>	
	<i>Luca Montanarella</i>	
5.1	Introduction . . . . .	83
5.2	Erosion . . . . .	84
5.2.1	Qualitative analysis . . . . .	84
5.2.2	Quantitative analysis . . . . .	86
5.3	Decline of soil organic matter . . . . .	87
5.3.1	Qualitative analysis . . . . .	87
5.3.2	Quantitative analysis . . . . .	90
5.4	Compaction . . . . .	90
5.4.1	Qualitative analysis . . . . .	90
5.4.2	Quantitative analysis . . . . .	92
5.5	Salinisation . . . . .	92
5.5.1	Qualitative analysis . . . . .	93
5.6	Landslides . . . . .	94
5.6.1	Qualitative analysis . . . . .	94
5.6.2	Quantitative analysis . . . . .	96
5.7	Contamination . . . . .	96
5.7.1	Qualitative analysis . . . . .	96
5.7.2	Quantitative analysis . . . . .	99
5.8	Sealing . . . . .	99
5.8.1	Qualitative analysis . . . . .	99
5.8.2	Quantitative analysis . . . . .	100
5.9	Biodiversity . . . . .	100
5.9.1	Qualitative analysis . . . . .	100
5.9.2	Quantitative analysis . . . . .	101
5.10	Conclusions . . . . .	102
	References . . . . .	104
<b>6</b>	<b>Climate and Land Degradation – an Overview</b>	
	<i>Mannava V.K. Sivakumar, Robert Stefanski</i>	
6.1	Introduction . . . . .	106
6.2	Extent and Rate of Land Degradation . . . . .	107
6.3	Land Degradation – causes . . . . .	109
6.4	Climatic consequences of land degradation . . . . .	110
6.5	Climatic Factors in Land Degradation . . . . .	111
6.5.1	Rainfall . . . . .	113
6.5.2	Floods . . . . .	116
6.5.3	Droughts . . . . .	118
6.5.4	Solar radiation, temperature and evaporation . . . . .	120
6.5.5	Wind . . . . .	121
6.6	Wild Fires, Land Degradation and Atmospheric Emissions . . . . .	125
6.7	Climate change and land degradation . . . . .	126
6.7.1	Carbon sequestration to mitigate climate change and combat land degradation . . . . .	127

6.8	Understanding the Interactions between Climate and Land Degradation – Role of WMO . . . . .	128
6.8.1	Advocating for enhanced observing systems at national, regional and international levels . . . . .	129
6.8.2	Promoting effective early warning systems . . . . .	129
6.8.3	Further enhancing climate prediction capability . . . . .	130
6.8.4	Assessing vulnerability and analyzing hazards . . . . .	130
6.8.5	Implementing risk management applications . . . . .	130
6.8.6	Contributing actively to the implementation of the UN system's International Strategy for Disaster Reduction (ISDR) .	131
6.8.7	Supporting the strengthening of the capabilities of the Parties and regional institutions with drought-related programmes .	131
6.9	Future perspectives . . . . .	131
	References . . . . .	132

**7 Climate, Extreme Events and Land Degradation***Michèle L. Clarke and Helen M. Rendell*

7.1	Introduction . . . . .	137
7.2	Classification of climate extremes . . . . .	138
7.3	Land Degradation . . . . .	141
7.4	Extreme rainfall events and their impacts. . . . .	141
7.4.1	Landslides, debris flows and floods in the northern Mediterranean . . . . .	141
7.4.2	Floods, gully incision and development in the Southwest USA .	142
7.4.3	Drought . . . . .	144
7.4.4	High Winds . . . . .	145
7.5	Future trends in extreme events . . . . .	148
7.6	Conclusions . . . . .	148
	References . . . . .	149

**8 Effects of Some Meteorological Parameters on Land Degradation in Tanzania***E. Matari*

8.1	Introduction . . . . .	153
8.2	Impact of rainfall on land degradation in Tanzania . . . . .	154
8.2.1	Loss of topsoil through water erosion. . . . .	156
8.2.2	Terrain deformation/mass movement through water erosion .	156
8.3	Floods . . . . .	158
8.4	Drought . . . . .	158
8.5	Wind Erosion . . . . .	160
8.5.1	Causes of wind erosion . . . . .	161
8.5.2	Climatic Implications of dust storms . . . . .	161
8.6	Climate change as cause and result of degradation of dryland areas .	162
8.7	Conclusions . . . . .	163
	References . . . . .	166

<b>9 Rainfall and Land Degradation</b>	
<i>Leo Stroosnijder</i>	
9.1 Introduction . . . . .	168
9.2 Land degradation . . . . .	170
9.2.1 Defining land degradation . . . . .	170
9.2.2 The land degradation debate . . . . .	170
9.2.3 Useful scales and proxies for land degradation . . . . .	171
9.2.4 Two conundrums . . . . .	175
9.3 Rainfall analysis for land degradation assessment . . . . .	176
9.3.1 Applications of the annual scale: trends and probabilities . . . . .	176
9.3.2 Application of the decadal scale: length of the growing season . .	177
9.3.3 Applications of the diurnal scale: classes of showers (threshold values), return period, dry spell analysis and agronomic and hydrological modelling with time steps of one day . . . . .	179
9.3.4 Application of the minute scale: rainfall erosivity . . . . .	181
9.4 The rain water balance . . . . .	183
9.4.1 The field water balance . . . . .	183
9.4.2 The infiltration water balance . . . . .	184
9.4.3 The soil water balance . . . . .	185
9.4.4 Stored and available water . . . . .	185
9.4.5 Farmers' perception of drought . . . . .	186
9.4.6 Green water use efficiency (GWUE) . . . . .	186
9.5 Dry spell mitigation and GWUE improvement . . . . .	187
9.6 Conclusions and recommendations . . . . .	188
9.6.1 Conclusions . . . . .	188
9.6.2 Recommendations . . . . .	190
References . . . . .	191
<b>10 Frequency of Wet and Dry Spells in Tanzania</b>	
<i>Faustine F. Tilya and Mohamed S. Mhita.</i> . . . . .	197
10.1 Introduction . . . . .	197
10.2 Data . . . . .	198
10.3 Methodology . . . . .	199
10.4 Results on the Frequency of wet/dry spells . . . . .	203
10.5 Conclusions . . . . .	203
