

CONTENTS

Editor's Foreword	XIII
Preface	XV
<i>Chapter 1. Introduction</i>	<i>1</i>
Setting the scene.	1
Biogeochemistry and geobotany.	1
General considerations and distinctions.	1
History of geobotany.	4
History of biogeochemistry	5
Plant evolution and chemistry	10
Barrier mechanisms	17
<i>Chapter 2. Plant Function, Chemistry and Mineralogy</i>	<i>21</i>
Plant requirements	21
Element uptake and function.	24
Root form and controls on element uptake.	27
Summary comments on chemical requirements of plants	28
Mineralogy of plants	30
<i>Chapter 3. Field Guide 1: Climatic and Geographic Zones.</i>	<i>37</i>
Selection of plant species.	37
Orientation.	38
Boreal (northern) forest	42
Black spruce	44
Balsam fir	47
Alder	48
Temperate coniferous forest	49
Temperate deciduous forest	50
Tundra.	51
Arid and semi-arid environments – general comments	52
North America – arid and semi-arid.	52
Northern basin and range.	52

Southern basin and range, and desert of the southwestern USA and Mexico	52
Central America	53
North Africa-arid – southern Morocco into the Sahara Desert	53
Mediterranean coast	53
Middle East – from Turkey and Armenia, through Saudi Arabia to Pakistan, and Africa east of the Sahara.	54
Central, West and South Africa	54
India	55
China, Mongolia and Japan	56
Australia	57
South America (excluding the Amazon)	58
Humid tropics – Amazon, West Africa, Indonesia	59
Summary notes	60

<i>Chapter 4. Field Guide 2: Sample Selection and Collection</i>	<i>63</i>
General considerations	63
Seasonal variations	66
Summary considerations of seasonal variations – a practical approach	72
Selection of tissue type	73
Element differences among plant species	74
The inhomogeneity of trees	77
Bark	81
Twigs	85
Foliage	86
Trunk wood	89
Treetops	90
Cones	96
Stunted trees of the Tundra	97
LFH/forest litter/humus	99
Flowers, seeds, spores and pollen	100
Summary	102
Sample collection	106
Precautions	106
Field accessories	109
Sample bags	111
Sample size	113
Samples required for quality control	113
Checklist for vegetation sample collection and site observations	114
Field drying and shipping	116
Alternative samples	116
Saps	116

Fungi	119
Moss	120
Seaweed	122
Geozoology	124
<i>Chapter 5. Survey Design and Comparisons with Other Sample Media</i>	<i>127</i>
Introduction	127
Survey design	129
Scale of survey	130
Low density (1 site per 10 km ² or greater) – Reconnaissance level	130
Moderate density (1 site per 1–10 km ²)	134
Semi-detailed surveys (1 site per 0.25–1 km ²)	136
Detailed surveys (25–200 m spacing)	139
Comparisons with other types of geochemical survey	143
Vegetation versus Soils	144
Vegetation versus Glacial Tills	146
Comparison of multi-media reconnaissance-level surveys using plants, soils, and sediments from lakes and streams	148
Summary	149
<i>Chapter 6. Sample Preparation and Decomposition</i>	<i>151</i>
Introduction	151
Washing	151
Thorough washing using solvents or dispersants	151
Washing in water	154
Particle and sample size	159
Sample decomposition	163
Dry ashing	165
Element volatilization	165
Dry ashing – the realities	169
A special case: Vegetation from sites near smelters or other sites of point-source metal emissions	174
Wet decomposition	178
Microwave digestion	179
Selective leaching	180
Fusions	185
Standard reference materials and analytical controls	186
Summary	189
<i>Chapter 7. Plant Analysis</i>	<i>191</i>
‘Fit for purpose’	192
Analytical techniques	194
Analytical instrumentation	196

Atomic absorption spectrometry.	196
Inductively coupled plasma emission spectrometry (ICP-ES) . .	197
Inductively coupled plasma mass spectrometry (ICP-MS)	200
Instrumental neutron activation analysis (INAA).	204
X-ray fluorescence (XRF)	208
Summary	209

<i>Chapter 8. The Eden Project – Source of a Biogeochemical Database.</i>	<i>213</i>
Introduction.	213
Samples in the collection.	213
Soil in the biomes.	214
Foliage collection from the biomes.	215

<i>Chapter 9. Biogeochemical Behaviour of the Elements.</i>	<i>229</i>
Introduction.	229
The importance of data quality	229
Elements in plants and their relevance to mineral exploration. . .	231
Aluminium (Al)	232
Antimony (Sb)	233
Arsenic (As)	234
Barium (Ba)	236
Beryllium (Be).	237
Bismuth (Bi).	239
Boron (B).	240
Bromine (Br)	241
Cadmium (Cd)	242
Calcium (Ca)	243
Cerium (Ce)	244
Cesium (Cs)	245
Chromium (Cr).	246
Chlorine (Cl)	248
Cobalt (Co)	248
Copper (Cu).	249
Dysprosium (Dy)	250
Erbium (Er)	250
Europium (Eu)	251
Fluorine (F)	251
Gadolinium (Gd)	251
Gallium (Ga)	251
Germanium (Ge).	252
Gold (Au)	253
Hafnium (Hf).	257
Halogens (F, Br, Cl and I).	258

Holmium (Ho)	259
Indium (In).	259
Iodine (I)	259
Iridium (Ir).	259
Iron (Fe)	259
Lanthanum (La), the rare earth elements (REE) and yttrium (Y)	260
Lead (Pb).	264
Lithium (Li)	266
Lutetium (Lu).	267
Magnesium (Mg)	267
Manganese (Mn).	268
Mercury (Hg)	269
Molybdenum (Mo)	275
Neodymium (Nd)	278
Nickel (Ni)	279
Niobium (Nb).	282
Osmium (Os)	283
Palladium (Pd)	283
Phosphorus (P)	283
Platinum (Pt) and the platinum group elements (PGEs) – palladium (Pd), iridium (Ir), osmium (Os), rhodium (Rh) and ruthenium (Ru).	285
Praseodymium (Pr)	290
Promethium (Pm)	290
Potassium (K).	291
Radium (Ra)	291
Rhenium (Re).	292
Rhodium (Rh)	295
Rubidium (Rb)	295
Ruthenium (Ru)	296
Samarium (Sm).	296
Scandium (Sc).	297
Selenium (Se)	298
Silver (Ag)	299
Sodium (Na).	302
Strontium (Sr)	303
Sulphur (S).	304
Tantalum (Ta)	306
Tellurium (Te)	308
Terbium (Tb)	310
Thallium (Tl)	310
Thorium (Th)	312
Thulium (Tm).	314

Tin (Sn)	314
Titanium (Ti)	316
Tungsten (W)	316
Uranium (U)	317
Vanadium (V)	320
Ytterbium (Yb)	321
Yttrium (Y)	321
Zinc (Zn)	322
Zirconium (Zr)	324
<i>Chapter 10. Data Handling and Analysis.</i>	327
First estimation of the data	327
Computer software tools	330
Data analysis	331
Univariate statistics	332
Bivariate statistics	335
Multivariate analysis	335
Map plots of data distributions	338
Unusual concentrations of selected elements	339
Analytical artefacts	339
Sampling and sample preparation artefacts	340
Contamination of the natural environment	340
Species-specific enrichments	341
<i>Chapter 11. Case Histories</i>	343
Gold	344
Canada: La Ronge and Glennie Domains, Northern Saskatchewan	344
Rod Zone – Jolu Mine – La Ronge Domain	344
Geology and mineralization	344
Biogeochemical survey	345
Post survey exploration	345
Jasper pond	345
Geology and mineralization	345
Biogeochemical surveys	346
Post survey development	347
Seabee Mine, Laonil Lake	347
Geology and mineralization	347
Biogeochemical survey	348
Post survey developments	348
Canada: Temperate forest of British Columbia	
QR (Quesnel River) deposit	349
Geology and mineralization	349

Environment	349
Scope of survey and analysis	349
Results	349
South America: Peru–Ecuador Border	350
Cordillera del Cóndor	
Geology and mineralization	350
Environment	351
Scope of survey and analysis	351
South America: Bolivia	
and Argentina	356
Geology and mineralization	356
Environment	356
Biogeochemical surveys	356
Summary of results from the orientation surveys	360
Platinum group metals/nickel/copper	361
Canada: Rottenstone Lake, northern Saskatchewan	361
Geology and mineralization	361
Environment	362
Exploration history	362
Biogeochemical surveys	363
Post survey exploration	366
Summary notes	366
Nickel	366
Canada: Thompson Nickel Belt, Northern Manitoba	366
Geology and mineralization	366
Environment	366
Biogeochemical survey	367
Post survey exploration	372
Uranium	373
Canada: Athabasca Basin, Northern Saskatchewan	373
Geology and mineralization	373
Exploration history	373
Environment	374
Biogeochemical surveys	374
Subsequent discoveries	380
Summary notes	381
Kimberlites	381
Canada: Ekati Trend, Lac de Gras, Northwest Territories	381
Geology	381
Environment	382
Biogeochemical survey	382
South Africa: Kimberley	384
Geology	384

Environment	386
Biogeochemical surveys	386
Expanded surveys – summary observations	387
Canada: Buffalo Head Hills, North-Central Alberta	388
Geology	388
Exploration history	389
Environment	390
Biogeochemical survey	390
Kimberlites – summary	391
 <i>Chapter 12. Exploration Geomicrobiology – The New Frontier</i>	393
Introduction	393
Significance of micro-organisms as biogeochemical agents	394
Methods for identifying micro-organisms and microbial processes	397
Culture-dependent techniques	397
Culture-independent methods	399
Molecular procedures	399
Extraction and purification of nucleic acids from soils	399
Amplification of target genes from extracted DNA or RNA	400
Assessing genetic diversity	402
Genetic fingerprinting	402
Case studies	403
Case Study 1 – The geomicrobiological cycling of gold	403
Case Study 2 – Microbial diversity in soils and sediments contaminated with Zn and Cu	409
Case Study 3 – Bacterial biosensors as alternatives for measuring heavy metals in soil extracts	410
Future technologies for bio-prospecting	410
Conclusions	413
 <i>Chapter 13. A Look to the Future</i>	415
Introduction	415
Hyperspectral imagery in relation to biogeochemistry	415
Exploration geomicrobiology	417
Forensic biogeochemistry	417
Plant mineralogy	418
Chemical analysis	418
Concluding remarks	419
 <i>References</i>	421
<i>Botanical Index</i>	451
<i>Subject Index</i>	455
<i>Contents of CD</i>	461
