Foreword	v
Acknowledgements	vi
Preface	vii
 PART I. Investigation and assessment	 1
1. Introduction	3
1.1 What is contaminated land?	3
1.2 Why is contaminated land a potential problem?	5
1.3 Professional advice	7
 2. The risk management framework	 9
2.1 Scope	9
2.2 Risk assessment	10
2.3 Risk reduction	11
2.4 Communication aspects	13
 3. Site investigation and risk management	 15
3.1 Introduction	15
3.2 Site investigation	16
3.2.1 Purpose	16
3.2.2 Scope and objectives	17
3.2.3 Main phases of investigation	19
3.2.4 Sampling and analysis	23
3.2.5 Legal aspects	25
3.2.6 Health and safety	25
3.2.7 Quality assurance and control	28
3.3 Risk assessment	29
3.3.1 Objectives	29
3.3.2 Hazard identification and assessment	29
3.3.3 Risk estimation	31
3.3.4 Risk evaluation	33
3.3.5 Risk mitigation	33
3.4 Reporting	34

PART II. Remediation	37
4. Remediation as part of risk management	39
4.1 Introduction	39
4.2 Remedy selection	40
4.3 Design and implementation	41
5. Remediation options	43
5.1 Classification and terminology	43
5.2 Civil engineering-based methods	45
5.3 Process-based methods	46
5.4 Natural remediation	46
6. Remedy selection	48
6.1 The selection process	48
6.2 Selection criteria and procedures	50
6.2.1 Initial selection and evaluation	50
6.2.2 Development of remedial strategies	51
6.2.3 Selection of preferred remedy	51
6.2.4 Role of treatability studies	52
7. Design and implementation	54
7.1 Introduction	54
7.2 Planning and design	54
7.2.1 Project planning	54
7.2.2 Technical specification	55
7.2.3 Management and objectives plan	57
7.2.4 Quality assurance and control	63
7.3 Procurement	64
7.3.1 Project organisation	64
7.3.2 Approaches to procurement	65
7.3.3 Contracts	66
7.3.4 Selection of organisations	67
7.4 Implementation	68
7.4.1 Project supervision	68
7.4.2 Communication	68
7.4.3 Monitoring and validation	69
7.4.4 Post-treatment management	69
7.4.5 Documentation and reporting	70
Appendices	
A Summary of information sources for desk study	71
B Investigation techniques	72
C Summary of capabilities and limitations of civil engineering based remediation methods	73
D Summary of capabilities and limitations of process-based remedial methods	77
E Initial selection criteria	82
F Waste management related to contaminated land	84
References	88
