
CONTENTS

<i>Foreword to the French Edition</i>	<i>v</i>
General Introduction	<i>ix</i>
1. Definitions, Objectives and Concepts	1
1.1 Definition of the Soil Map and its Components	1
1.2 Objectives and Applications of Mapping	8
1.3 The Russian School of Soil Science	17
1.4 The Issues	23
2. Various Kinds of Approaches	36
2.1 Various Mapping Procedures	36
2.2 Graphical Treatment of Pedological Objects	57
2.3 Types of Legend	63
2.4 Scales	67
3. Preparation of a Field Work Plan	71
3.1 Conditions of Contract	71
3.2 Estimation of Times and Costs	75
3.3 Ordering, Preparing and Utilizing Aerial Photographs	78
3.4 Photogrammetric Documents	85
3.5 Documents and Equipment	88
3.6 Problems of Practical Organization	95
4. Description of Soils in the Field	100
4.1 Generalities	100
4.2 Description of Certain Principal Properties	105
4.3 Design of a Description System for Computer Processing	124
4.4 Technique of Describing Soils	130
4.5 Quality Checks Related to Description of Soils	142
4.6 Organization of a Profile-Study Programme	147
5. Map Preparation and Quality Checks	160
5.1 Methodological Basis of Zoning	160
5.2 Preparation of the Map	172
5.3 Quality Checks Related to Graphic Information	181

6. Computer Processing of Data	200
6.1 Generalities	200
6.2 Treatment of Graphic Data	201
6.3 Processing Non-graphic Data Pertaining to the Map	214
6.4 Processing of Profile Data in France	222
6.5 Some International Efforts	229
7. Modelling and Automation	235
7.1 Soil Prediction from Aerial Photographs	236
7.2 Trial of Segmentation of Space	241
7.3 Generalization of Local Observations	244
7.4 Measurement of the Similarity between Soils	258
7.5 Simplification of Boundaries	268
8. Principles of Thematic Mapping	273
8.1 Procedures of Thematic Mapping	274
8.2 Diffuse Models and Complete Aggregation	281
8.3 Diffuse Models and Systems of Downgrading	288
8.4 Diffuse Models and Partial Aggregation	290
8.5 Diffuse Models and Comparative Reasoning	296
8.6 Sequence of Spatial Models	297
8.7 Critical Analysis	304
9. Soil Mapping and Multidisciplinary Approach	310
9.1 Soil Mapping and Agronomy	310
9.2 Soil Mapping and Civil Engineering	315
9.3 Soil Mapping and Ecology	320
9.4 Soil Maps and Climatic Data	325
10. Soil Maps of the World and French-speaking Countries	332
10.1 International Mapping Efforts	332
10.2 Soil Mapping in Canada	339
10.3 Soil Mapping in USA	342
10.4 Soil Mapping in Belgium	343
10.5 Soil Mapping in Great Britain	347
10.6 Soil Mapping in France	348
10.7 Soil Mapping in Switzerland	356
10.8 Soil Mapping in Africa	357
10.9 Soil Mapping in Some Other Countries	359
Appendices	363
A1 Planning a Field Programme	363
A2 Soils and Landscapes Zoning (Flaine Region, Haute-Savoie)	368
A3 Planning Land Use	373
Bibliography	377
Index	407
